

INVITATION FOR BID (IFB) NO. 19-001
Ice Melt
Addendum No. 1

This Addendum No. 1:

1. Provides technical/administrative questions and responses received for IFB #19-001, as follows:

Questions	Responses
For Line Item No. 001 (p.4), the spec asks for round particles, not flakes or <u>irregularly shaped granules</u> . Later it asks that it must not easily roll or blow away after being applied. Our material has density of 0.90 – 0.95 kg/L, heavy enough to not blow away. It is not round because round material tends to roll, which is why we offer consistent 2 – 4 mm particle size granules. Is this acceptable?	Yes, the material is acceptable. Material density of 0.90 – 0.95 kg/L, it is heavy enough to not easily blow away, and the material is not round, but consistent 2-4mm particle size granules.
Will your agency accept 55-lb poly bags?	Yes, 55-lb bags are acceptable.
Is it 1 (one) year firm with price escalation/reduction allowed each of the optional 4 annual renewals, or is it firm for all 5 years?	Please see the revised Attachment E – Bid Form to provide pricing for each potential year of the contract.
Section VI.G.1 (p.7) discusses a 3% administrative fee. Is that to be added to our bid price and then reimbursed (or rebated) back to COG on the semi-annual due dates listed in Section VI.G.2? If not, can you please clarify?	The awarded contractor(s) is/are required to provide a 3% administrative fee to COG. Please use your discretion structuring your bid price, however, pricing submitted shall be deemed final.

2. Revises the Attachment E - Bid Form to add multiple year pricing and a “Total Price” column.

All other terms and conditions of the RFP remain unchanged.
