II. METROPOLITAN WASHINGTON COUNCIL OF GOVERNMENTS

The Metropolitan Washington Council of Governments (“COG”) is the regional organization of the Washington area's 24 major local governments and their governing officials, plus area members of the Maryland and Virginia legislatures and the U.S. Senate and House of Representatives. COG provides a focus for action on issues of regional concern such as comprehensive transportation planning, air and water quality management, environmental monitoring, tracking economic development and population growth and their effects on the region, coordinating public safety programs, and promoting child care and housing for the region. COG is supported by financial contributions from its participating local governments, federal and state government grants and contracts, and through grants and contracts from foundations and the private sector.

III. PROJECT OVERVIEW AND BACKGROUND

This project ("Project") will involve supporting a community stakeholder planning process for the United States Department of Defense Office of Economic Adjustment ("DoD OEA"), specifically to handle planning work for their Military Installation Resilience Review ("MIRR") Program for four military installations in the District of Columbia:

1. Joint Base Anacostia Bolling
2. The Navy Research Laboratory
3. The Washington Navy Yard
4. Fort Lesley J. McNair

The core purpose of the MIRR is to identify the risks, hazards, and vulnerabilities of concern as it relates to ability of the military to carry out its missions on the base that could be mitigated through investments and solutions outside the fence line in the community.

The FY2019 National Defense Authorization Act (NDAA) defined military installation resilience as: “The capability of a military installation to avoid, prepare for, minimize the effect of, adapt to, and

recover from extreme weather events, or from anticipated or unanticipated changes in environmental conditions, that do, or have the potential to, adversely affect the military installation or essential transportation, logistical, or other necessary resources outside of the military installation that are necessary in order to maintain, improve, or rapidly reestablish installation mission assurance and mission-essential functions.”

COG anticipates the focus of the MIRR project will involve an all hazards approach in terms of screening threats, risks, and vulnerabilities (either natural or manmade, including from the effects of climate change), to identify and prioritize areas of concern that should be the subject of further study and evaluation. A primary goal of the study is to identify and recommend actions or investments outside the fence line to mitigate risks of highest concern.

COG is seeking a consultant or consultants ("Contractor") who can: (1) facilitate the stakeholder engagement process; (2) work with project participants and carry out a process to identify threats of concern; (3) conduct a vulnerability and risk assessment based on identified threats; (4) identify mitigation opportunities to reduce risk; and (5) carry out analysis and other work activities as outlined in the Scope of Work below.

COG's role on the project will be to serve as the prime applicant for the MIRR, handle all required federal reporting, identify and develop an initial list of key stakeholders and resources, establish and coordinate both a technical and policy committee, and oversee Contractor activities, assignments, and deliverables.

IV. SCOPE OF WORK

COG seeks Contractor support for the Project, including the following:

- Subject matter expertise to conduct research, analysis, strategic guidance, advising, resolution strategies and outreach support.
- Additional technical services to complete planning tasks.
- Support for outreach, meetings, workshops, and other engagement activities with project stakeholders.
- Technical support services for developing maps of locations of resilience risks and impacts in the study area that are readable within standard Geographic Information Systems (GIS) software (e.g., Esri's ArcMap, etc.).

Note: The military installations that will be the subject of this Contract will include: Joint Base Anacostia Bolling, Fort McNair, the Naval Research Laboratory, and the Washington Navy Yard. Please include statement of applicability of your proposed approach and budget for use in handling identical planning activities for other military installations in the United States, including the National Capital Region.
