

RFP 21-019

**SUPPORT FOR
ELECTRIC VEHICLE PURCHASING COOPERATIVE (EVPC)
PILOT PROGRAM**

ADDENDUM 1

This addendum answers questions submitted by the August 20, 2021 deadline. Answers are in **BOLD**.

1. Given the requested timeline of performance, is there any anticipated need to push back the end of performance date from March 31, 2022? The timeline given would ultimately require more than 6 months of work, despite the RFP closing with approximately 7 months of viable time left to perform (anticipating fast contracting process).
 - a. **The March 31, 2022 date is an estimate, and subject to revision, particularly as implementation of the program begins. Proposers can provide an alternate timeline as part of their proposal.**
