II. METROPOLITAN WASHINGTON COUNCIL OF GOVERNMENTS

The Metropolitan Washington Council of Governments (“COG”) is the regional organization of the Washington area’s 24 major local governments and their governing officials, plus area members of the Maryland and Virginia legislatures and the U.S. Senate and House of Representatives.

COG provides a focus for action on issues of regional concern such as comprehensive transportation planning, air and water quality management, environmental monitoring, tracking economic development and population growth and their effects on the region, coordinating public safety programs, and promoting childcare and housing for the region. COG is supported by financial contributions from its participating local governments, federal and state government grants and contracts, and through grants and contracts from foundations and the private sector.

III. PROJECT OVERVIEW

The Anacostia River watershed covers 176 square miles of land in Maryland and the District of Columbia that drain into the Anacostia River. Trash is an identified pollutant in this urbanized watershed. In 2010 Environmental Protection Agency (EPA) approved a trash total maximum daily load (TMDL), a maximum amount of a trash allowed to enter the waterbody so that the waterbody will meet and continue to meet water quality standards for trash. In 2018, the Court vacated this TMDL approval and requested that EPA replace the Anacostia River trash TMDL. Since that time Maryland, District of Columbia, EPA and the Metropolitan Washington Council of Governments (COG) (Workgroup) have convened to discuss various approaches to replace the TMDL.

This scope of work requested builds upon the Workgroup's proposed approach to draft a survey instrument to understand how different qualitative and quantitative trash characterization may support or impair the potential recreational use of the river and streams. This project will draft a survey instrument, pretest that draft survey instrument, finalize the survey instrument and administer the survey to a web panel. The tasks are expected to be completed by December 31, 2022 with a possible extension limited to 3 months.

IV. SCOPE OF WORK

A. Task 1: Visualization Survey Development

The Proposer will be tasked to develop innovative visualization survey approach that display river and stream trash conditions to potential survey respondents. The survey should provide pictures and/or videos of trash conditions in the river and streams to solicit survey response. Various trash conditions should be represented and should also capture post stream trash cleanup conditions in the river and streams. The Proposer will work closely with the Workgroup for site selection of existing trash conditions present in and along the river and streams.

Deliverable:

- A draft survey instrument as described above.

B. Task 2: Survey Testing Environments

The Proposer will be tasked to test the draft survey instrument on a sample of participants. Through a market research panel platform, representative survey participants will be selected possibly by demographics and locations. Survey comprehension and other survey experience metrics will be analyzed. These findings will be communicated to the Workgroup for review and for survey revision, where appropriate.

After the survey revision, a second round of survey testing will be executed to analyze survey responses to revisions. Findings to the second survey will be presented to the Workgroup. Additional survey revisions will be incorporated into the final version and submitted for Workgroup approval.

Deliverables:

- Document that: a) contains individual testing records, b) summarizes overall testing findings and c) describes the path forward for resolving any survey issues identified in the testing.
- Collection of survey responses.
- The final survey instrument, ready for survey implementation, administered to a web panel and executable across any web-enabled device.
- Development and/or revisions of any Quality Assurance Project Plan to incorporate final survey instrument and data management and analyses.

C. Task 3: Survey Administration

Through a market research panel platform, the Proposer will be tasked to administer the final survey and collect responses, which will be shared with the Workgroup.

Deliverables:

- Administer the survey
- Collect final survey responses and share that data with the Workgroup.

D. Task 4: Project Management

The Proposer will prepare for and co-lead a project Kickoff Meeting and subsequent monthly meetings. The initial meeting will describe this Scope of Work (SOW) and will establish points of contact, roles and responsibilities, and general project administrative information. The Proposer will co-lead monthly meetings, providing a status update on project progress, identifying key decision points that require the input of the broader team, discussing any project challenges and potential solutions to these challenges.

Deliverables:

- A shared folder (e.g., Google Drive) accessible to all members of the team that organizes all project information.
- A Kickoff Meeting summary that establishes a timeline for project deliverables, conference calls, and bi-monthly technical reports, and other information.
- Monthly meeting minutes summary.
- Bi-monthly technical progress reports detailing progress on completing tasks, identifying any challenges, and proposed solutions for addressing challenges.

4. In the event COG elects to waive its remedies for any breach by the SUBRECIPIENT of any covenant, term or condition of this Contract, such waiver by COG shall not limit COG's remedies for any succeeding breach of that or any other term, covenant, or condition of this Contract.
