

**RFP 24-009 – CBRNE DETECTION EQUIPMENT, SUPPORT, AND MAINTENANCE
ADDENDUM 1
Q&A**

This addendum answers questions submitted by the December 6, 2023 deadline for questions.

Questions are in bold, **Answers** are in red.

- 1. Can you provide the sensors used or sensor configuration for the region's gas monitors?**
 - a. Please see Exhibit A. Future purchases may be at the discretion of individual using jurisdictions.

- 2. Will COG provide an updated Exhibit A with serial numbers?**
 - a. Serial numbers will be provided following contract award.

- 3. Please define the training standard for Hazard-3 Equivalent.**
 - a. Training topics, not necessarily standards, would include Battery Emergencies, Compressed Gas Cylinder training, ERDSS training, Advanced Chemical Properties training and the ability to produce custom designed trainings that meet the needs of our regional partners. This may also include being able to provide training courses from outside companies that provide specific training courses that COG member jurisdictions would like to host.

- 4. When will demonstration equipment be needed and for how long will it be needed?**
 - a. Demonstration equipment should be able to be supplied upon the request of an individual using jurisdiction. The length of time is flexible, but a minimum of one week would be preferable.
