BEEAC Committee Members

Local government considerations for the following panel discussion:

- 1- *What are the challenges and opportunities your jurisdiction faces in employing high performance building strategies, like net zero design, in your jurisdiction's building stock?*
- 2- *What resources (policy, education, incentives, financing, etc.) does your jurisdiction need to move towards net-positive building?*

10:45 A.M. 5. TAKING IT TO THE NEXT LEVEL: FROM NET ZERO TO NET POSITIVE

(Linkage to 2018 BEEAC Priorities: [High Performance Buildings](#))
(Linkage to Climate Action Plan: [Table 2: Local Actions to Reduce Energy Consumption, 1t](#))

A study done by the [New Building Institute in 2014](#) indicated that between 2012-2014 the public sector was leading in the number of net-zero buildings. With the increase in the number of net-zero buildings by both the public and private sectors, the building sector is pushing the envelope moving to net-positive building. The panel discussion will include dialogue on what are the similarities and differences between net-zero and net-positive building and the resources local governments need to move towards net-positive building.
