

# **Appendix I**

**Information to support board action on Visualize 2045:  
Regional and Federal Policy Alignment for All Projects**

**Projects in Loudoun County, Virginia**

## MEMORANDUM

**TO:** Transportation Planning Board  
**FROM:** Stacy Cook, TPB Transportation Planner/Long-Range Transportation Plan Manager  
**SUBJECT:** Information to support board action on Visualize 2045: Regional and Federal Policy Alignment for All Projects  
**DATE:** May 13, 2021

---

At its June 2021 meeting, the TPB staff will ask the board to approve the inputs to the air quality conformity analysis (conformity analysis) of the long-range transportation plan (Visualize 2045) and Transportation Improvement Program (TIP) and the scope of work for the conformity analysis. They will also be asked to accept the comments from the 2021 comment period on these inputs, in the form of the comment /response summary.

Please note, the projects proposed to be included in the air quality conformity analysis are a subset of projects in Visualize 2045 and TIP. Not all projects in the plan and TIP can, nor should be, included in the conformity analysis. Federal conformity analysis regulations inform the projects and programs to be included in the analysis and publishes a list of projects that are exempt from such analysis. Also, the inputs, assumptions, and methodology used to conduct the conformity analysis are guided by the federal requirements to ensure that estimated levels of criteria pollutants comply with the federally established emissions levels.

This memorandum and its associated [appendices](#) with the responses to policy questions (32-45 of the Technical Inputs Solicitation) for all capital projects provide information to assist board members as they continue their review and discussions, from last month, of the projects proposed to be included in the regional conformity analysis. The focus of the last month's review and discussions were the policy related information sought for the various projects.

### Project Inputs for Conformity Analysis

The Technical Inputs Solicitation document was approved by the TPB on December 20, 2020. The document provides an overview of the process used by TPB to solicit technical inputs (projects, programs and policies) to be included in Visualize 2045, the TIP and the conformity analysis. The solicitation documents place a particular emphasis on projects that would have to be included in the regional air quality conformity analysis.

### Regionally Significant Projects

Federal regulations (40.CFR.Part 93), based in the Clean Air Act Amendments (section 176(c); 42 U.S.C. 7506(c)), prescribes the process and method for conformity. These regulations dictate that "regionally significant projects" shall be included in the conformity analysis. While all projects across our region are important because of the local and regional benefits they provide, the term 'regional significance' has a specific meaning as used by the TPB and the federal agencies in reference to air quality conformity.

The definition from federal regulation document (40 CFR § 93.101) is:

"Regionally significant project means a transportation project (other than an exempt project) that is on a facility which serves regional transportation needs (such as access to and from the area outside of the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals themselves) and would normally be included in the modeling of a metropolitan area's transportation network, including at a minimum all principal arterial highways and all fixed guideway transit facilities that offer an alternative to regional highway travel."

At the TPB, the staff interpret this definition for the purposes of the technical inputs solicitation as below, irrespective of the funding used for the project.

- 1) Any project on a facility that is included in the TPB model's coded regional network that adds or removes at least one continuous vehicular lane from one major road to the next, or adds a new access/egress location or capacity; or
- 2) Any transit project that adds or modifies fixed-guideway transit facilities (heavy rail, light rail, streetcar, bus rapid transit).

These technical inputs are what the TPB staff include in the air quality conformity project input tables which the TPB staff makes available for comment. After this review the TPB staff asks the TPB to approve the projects along with the scope of work to conduct the conformity analysis so that the required analysis may begin. While the TPB periodically conducts studies to explore alternative or aspirational scenarios regarding future land use, travel demand, transportation projects, programs, policies and fuel types to identify strategies for future implementation, the air quality conformity analysis must be based on official latest planning assumptions with a demonstration of the funding availability to implement all projects, programs and policies assumed in the conformity analysis.

### **TPB Policy Framework and Federal Planning Factors**

The TPB's Visualize 2045 includes a policy element that informs its planning and programming activities. There are a set of documents that comprise this policy framework communicating the region's transportation goals, priorities, and needs that member agencies ought to consider making transportation investment and implementation decisions on projects that have to be part of the regional plan and TIP. The TPB takes strides to achieve its goals and address its priorities through the projects, programs, and policies in Visualize 2045.

Additionally, federal law identifies a list of planning factors meant to guide metropolitan planning. Collectively, the projects, programs, and policies in Visualize 2045 must address these factors. Please visit [Visualize2045.org](https://www.visualize2045.org) to learn more about these planning factors. A summary of these policy elements is included in each of the appendices.

### **REGIONAL AND FEDERAL POLICY QUESTIONS AND RESPONSES**

The TPB's project description form has several questions needed to help staff develop the Plan, TIP and prepare for the conformity analysis. Among these, questions 32 thru 45 relate to the TPB's policy priorities and federal planning factors. When projects are submitted to the TPB through the technical inputs solicitation process, the sponsoring agency technical staff are asked to provide

responses these policy questions. The responses help the project sponsor communicate how the project supports the TPB goals, Aspirational Initiatives, and the federal planning factors. A listing of the policy questions is included in each appendix. While most questions are binary (yes/no), four questions seek narrative responses to explain if and how the project addresses issues of equity, greenhouse gas reduction, and how it supports the Aspirational Initiatives and TPB goals. Not all projects that were reviewed by the TPB members during their April work session had this information.

While agencies were asked to provide these responses, by April 1, for all new projects and existing projects for which major changes were being proposed, agencies had requested and secured additional time (end of April) to provide the information for remaining projects that were in previous editions of the plan. All of the information received for the policy questions, for existing and new projects, have now been compiled for the board's use. Given the large number of projects, the information has been arranged and included in appendices and tables. The following section is a guide on how to use the appendices and tables.

## **VISUALIZE 2045 UPDATE: PROJECT LEVEL POLICY QUESTIONS AND RESPONSES**

For each existing or proposed project, staff from the sponsoring agencies have responded to policy questions including narrative responses. These responses are listed in tables 1-4 as described below.

The projects listed are the same in each table 1-4. These tables are mapped against the policy questions of the Technical Inputs Solicitation document, showing how projects support:

- Table 1: the goals of the TPB's Regional Transportation Priorities Plan (regional policy questions 32-42 that require a binary response)
- Table 2: Aspirational Initiatives, (regional policy question 43, binary response)
- Table 3: Federal Planning Factors (federal policy question 45, binary response).
- Table 4: narrative responses
  - If a person that reviews the binary responses in the matrices would like more information, the following questions include a narrative response:
    - equity (question 34b),
    - GHG reduction (question 40b),
    - support for the Aspirational Initiatives (44a) or
    - the regional goals (44b).

Each project has a project identification number listed, to quickly find this project across the various tables, this number is a useful reference. (*Hint: If one views the file on a computer, use of a search feature (such as pressing control+f on the keyboard) to search this project number, to expedite one finding the same project throughout the document*).

### **Organization of the Appendices:**

Each appendix starts with this memorandum, followed by the TPB policy summary and questions, then the responses in summary tables 1-4. The sponsoring agency(ies) provided the yes/no and written responses for each project for questions 32-45 for each project. The TPB staff facilitated the administrative development of appendices A-K to present the capital projects (existing and proposed, by geographic area) in Visualize 2045 and the TIP.

The [appendices](#) are organized by state and county for projects that are within those geographies (in other words, the projects are organized by geography, not lead agency). Appendix A-K include this memorandum and the policy framework and questions. To find state-level projects that traverse more than one jurisdiction please see the MDOT and VDOT multijurisdictional appendices E and K. Not all geographies, jurisdictions or member agencies have projects that must be in the constrained element of Visualize 2045. Some agencies, such as WMATA, may not have projects listed in the constrained element but do have regular activity such as WMATA maintenance and vehicle replacement programs which are not listed here. To learn more about local or operational projects, please visit the local jurisdiction's or agency's website.

All of the appendices can be found by online by [clicking here](#) or using the following webpage: <https://www.mwcog.org/documents/2021/05/12/information-to-support-board-action-on-the-update-to-visualize-2045-regional-and-federal-policy-alignment-for-all-capital-projects-tpb-visualize-2045/>

APPENDIX	CONTENT	JURISDICTION
A	Responses to policy questions in Tables 1 thru 4	District of Columbia
B	As above	Frederick County
C	As above	Montgomery County
D	As above	Prince George's County
E	As above	Multi-jurisdictional projects in Maryland/MARC <sup>1</sup>
F	As above	City of Alexandria
G	As above	Arlington County
H	As above	Fairfax County
I	As above	Loudoun County
J	As above	Prince William County and the City of Manassas
K	As above	VDOT / VDRPT / VRE/ multiple jurisdiction/owner projects

## HOW TO USE THE APPENDICES

### Overview:

- If there is a particular area of the region you are interested in, find the appendix by state/county.
- If there is a particular type of project you are interested in, note each table lists projects in categories of roadway or transit as the primary project types, many of these projects also include bicycle and pedestrian improvements as indicated in Table 1.
- If there is a particular type of question you are interested in, see the guidance above as to what questions are addressed in Tables 1-4.

<sup>1</sup> Note, while the local government is advancing transportation projects in Charles County and the Maryland Department of Transportation (MDOT) has projects that traverse the county, there is not a county-specific appendix. Please see the Appendix E for the projects that traverse Charles County.

## Regional and Federal Policies

### Regional Policy Framework and Priorities

The TPB’s LRTP seeks to respond to both federal requirements and its own adopted set of policy goals and priorities. To a large extent, federal and regional goals intersect. The following pages summarize the federal requirements and the region’s policy goals.

The TPB has worked continually to develop and adopt a set of consensus-based policy goals and priorities to inform local decision making on the types of projects, programs and policies it seeks for its LRTP and TIP. The [Vision](#), adopted in 1998, is the overarching policy document that describes regional goals and objectives as well as strategies to achieve them. This vision informed the 2014 [Regional Transportation Priorities Plan](#). The vision and goals focus on multimodal transportation solutions that give people greater choice in finding the travel

mode that works best for them. It emphasizes the important role of land-use, especially strengthening the region’s Activity Centers by providing high-quality connections between centers and improving non-auto travel options within them. System maintenance is also paramount, recognizing that our existing roadways and transit systems must be in a state of good repair to be safe, efficient, and reliable.

### Climate Resiliency

In 2010, the TPB joined MWCOC’s action to set greenhouse gas (GHG) reduction targets to mitigate the impact of climate change. Over the last decade the TPB completed two studies to evaluate strategies to address these targets, including the [What Would It Take](#) analysis and the [Multisector Working Group](#) study that identified the various types of projects, programs and policies that have the greatest potential to reduce GHG in the transportation sector.

In October 2020, the TPB endorsed new interim GHG reduction goals and new climate resiliency goals. These include a 2030 interim regional greenhouse gas reduction goal of 50% below 2005 levels by 2030; the region’s climate resilience goals of becoming a Climate Ready Region and making significant progress to be a Climate Resilient Region by 2030; and the need to incorporate equity principles and expand education on climate change into CEEPC, COG and TPB members’ actions to reach the climate mitigation and resiliency goals. This will require a reduction in vehicle miles traveled and associated emissions in Visualize 2045.

### Equity

In 2020, the TPB established equity as its fundamental value and as an integral part of all its activities and decisions. TPB asks the member agencies explicitly consider the equity impacts of the projects, programs and policies that they sponsor and propose for inclusion in the TPB’s LRTP.

# Strategies for our Future: Seven Aspirational Initiatives

In 2018, the TPB adopted seven transportation initiatives grounded in the TPB’s Vision to advance the Regional Transportation Priorities Plan. TPB noted that these ideas, if funded and enacted, would have the potential to significantly improve the region’s transportation system performance compared to current plans and programs. The realization of these initiatives would not only improve mobility, accessibility and air quality in the region it would also contribute to the region’s greenhouse gas reduction and climate resiliency goals.

The seven Aspirational Initiatives are:

1. **Bring Jobs and Housing Closer Together** by having more housing and jobs in central locations to take advantage of underused Metro stations and reducing single occupant auto commute trips.
2. **Expand Bus Rapid Transit and Transitways** throughout the region to provide people not only more transit options but also a reliable and fast bus service for work and non-work trips.
3. **Move More People on Metrorail**, having restored it to an excellent state of good repair, provide more frequent services with longer trains and expanded stations that are accessible by non-motorized modes.
4. **Provide More Telecommuting and Other Options for Commuting** to take advantage of the many jobs suitable to telework and provide employees with transit and non-motorized travel benefits and disincentivize commute parking.

5. **Expand Express Highway Network** strategically, in an environmentally sensitive manner to create a network that connects much of the region, with express bus systems operating and where carpools and vanpools are exempt from tolls.
6. **Improve Walk and Bike Access to Transit**, as investments that remove barriers to walking and biking to transit stations not only help to reduce auto travel but also helps to fully utilize the investments already made in high capacity transit.
7. **Complete the National Capital Trail Network** to create an extensive network of trails that provides walk and bicycle access to jobs and other activities by connecting communities across the region to activity centers.

The project submission form seeks detailed project information that will help staff assess how the next set of projects in the LRTP and TIP address regional priorities and federal planning requirements.

Through this project technical inputs solicitation process the TPB requires its member agencies to prioritize investments on projects, programs, and policies to reduce greenhouse gas emissions, prioritize the aspirational strategies, and achieve COG’s land use and equity goals as they submit their inputs for inclusion in the TPB’s LRTP and TIP.

# Shared Regional Goals and Priorities

When agencies submit new projects, policies or programs for inclusion in the Visualize 2045 update, they will be asked to document how the initiatives support or advance regional goals, including equity and climate considerations, as shown in the table below. Agencies will also be asked how projects implement the Aspirational Initiatives.

<p>Provide a Comprehensive Range of Travel Options</p>	<ul style="list-style-type: none"> <li>• Does this project promote non-auto travel or can it be expected to reduce VMT? Identify all travel mode options that this project provides, enhances, supports or promotes.</li> <li>• Is this project physically in an Equity Emphasis Area (EEA)? How does it improve equity?</li> <li>• Does this project improve accessibility for historically transportation-disadvantaged individuals (i.e., persons with disabilities, low incomes, and/or limited English proficiency)?</li> </ul>
<p>Promote Regional Activity Centers</p>	<ul style="list-style-type: none"> <li>• Does this project begin or end in an Activity Center?</li> <li>• Does this project connect two or more Activity Centers?</li> <li>• Does this project promote non-auto travel within one or more Activity Centers?</li> <li>• Does this project connect an Equity Emphasis Area to an Activity Center?</li> </ul>
<p>Ensure System Maintenance, Preservation, and Safety</p>	<ul style="list-style-type: none"> <li>• Does this project contribute to enhanced system maintenance, preservation?</li> </ul>
<p>Maximize Operational Effectiveness and Safety</p>	<ul style="list-style-type: none"> <li>• Is this project primarily designed to reduce travel time on highways and/or transit without building new capacity (e.g., ITS, bus priority treatments, etc.)?</li> <li>• Is this project expected to significantly reduce fatalities or injuries among motorists, transit users, pedestrians, and/or bicyclists?</li> </ul>
<p>Protect and Enhance the Natural Environment</p>	<ul style="list-style-type: none"> <li>• Is this project expected to contribute to reductions in emissions of criteria pollutants, specifically, to attainment of ozone levels consistent with the National Ambient Air Quality Standard (NAAQS)?</li> <li>• Is this project expected to contribute to meeting the regional goal of reducing greenhouse gasses by 50% below 2005 levels by 2030?</li> </ul>
<p>Support Interregional and International Travel and Commerce</p>	<ul style="list-style-type: none"> <li>• Does this project enhance, support, or promote the following freight carrier modes: long-haul truck, local delivery, rail, or air freight carrier modes?</li> <li>• Does this project enhance, support, or promote the following passenger carrier modes: air, Amtrak intercity passenger rail, intercity bus?</li> </ul>

## Federal Requirements and Policy Considerations

Visualize 2045 meets all federal requirements for a Metropolitan Planning Organization's long-range plan and was approved by the Federal Highway Administration and the Federal Transit Administration in December 2018. Any updates to Visualize 2045 must continue to meet these federal requirements in order to receive federal approval and for federal funding to flow to transportation projects in our region. The two main requirements are that the plan must:

- Identify all regionally significant projects and programs for which funding is reasonably expected to be available between now and 2045. Regionally significant projects and programs are those that add or remove capacity on the existing transportation system.
- Demonstrate that these projects and programs together support regional air quality improvement goals. An official Air Quality Conformity Analysis carried out by the TPB must show that forecast vehicle-related emissions under the plan will not exceed approved regional limits.

Under federal law, the plan must also address ten federal planning factors, as identified by the U.S. Department of Transportation (USDOT). (See sidebar)

Updates to the constrained element of Visualize 2045 must meet a number of other federal requirements as well, including non-discrimination and equity, congestion management documentation, public participation, and others. For a full listing of these requirements, refer to the Resources and Maps section of this document.

### FEDERAL PLANNING FACTORS

Federal law also identifies a list of planning factors meant to guide metropolitan transportation planning. Collectively, the projects, programs, and policies in Visualize 2045 must address these factors. Agencies will therefore be asked to identify which of the federal.

1. Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
2. Increase the safety of the transportation system for all motorized and non-motorized users;
3. Increase the ability of the transportation system to support homeland security and to safeguard the personal security of all motorized and non- motorized users;
4. Increase accessibility and mobility of people and freight;
5. Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
6. Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
7. Promote efficient system management and operation;
8. Emphasize the preservation of the existing transportation system;
9. Improve resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation (New under the FAST Act); and
10. Enhance travel and tourism. (New under the FAST Act)

---

## Regional Policy & Federal Planning Factor Support

---

The questions in this section address the goals identified in the Regional Transportation Priorities Plan (RTPP). Question 39 should be used to provide additional context of how this project supports the TPB Aspirational Initiatives the RTPP goals or other regional needs identified in the Technical Inputs Solicitation Project Submission Guide.

- 32. Non Auto Travel** a. ----- Does the project promote non-auto travel or can it be expected to reduce VMT?
- b. Transportation Options ----- Identify all travel mode options that this project provides, enhances, supports, or promotes.
- Single Driver
  - Carpool/HOV
  - Metrorail
  - Commuter Rail
  - Streetcar/Light Rail
  - Walking
  - BRT
  - Express/Commuter Bus
  - Metrobus
  - Local Bus
  - Bicycling
  - Other
- 33. Accessibility Improvement** ----- Does this project improve accessibility for historically transportation-disadvantaged individuals (i.e., persons with disabilities, low-incomes, and/or limited English proficiency?)
- 34. Equity Emphasis Areas** a. ----- Is this project physically in an Equity Emphasis Area (EEA)?
- b. Additional Equity Response ----- Please provide additional written information that describes how this project further supports or advances equity as described by the TPB July 2020 resolution.
- 35. Activity Centers** ----- Indicate if the project begins or ends within an activity center, connects two or more centers, and/or promotes non-auto travel within one or more centers
- a. Begins or Ends in ----- Does this project begin or ends in an Activity Center?
- b. Activity Center without ----- Does this project connect two or more Activity Centers?
- c. Non-Auto Travel within ----- Does this project promote non-auto travel within one or more Activity Centers?
- d. EEA-Activity Center Connect ----- Does this project connect an Equity Emphasis Area to an Activity Center?

- 
36. **Maintenance** ----- Does this project contribute to enhanced system maintenance or preservation?
37. **Operations and Travel Demand** ----- Does this project reduce travel time on highways and/or transit without building new capacity, (e.g., ITS, bus priority treatments, etc.)?
38. **Safety** ----- Is this project expected to significantly reduce fatalities or injuries among motorists, transit users, pedestrians, and/or bicyclists?
39. **Reduce Emissions Pollutants** ----- Is the project expected to contribute to reductions in emissions of criteria pollutants, specifically, to attainment of ozone levels consistent with the National Ambient Air Quality Standard (NAAQS)?
40. **Reduce Greenhouse Gases** a. ----- Is this project expected to contribute to reductions in emissions of greenhouse gases by 50% below 2005 levels by 2030?
- Additional response. b ----- If the answer to question #40 regarding contributing to greenhouse gas emission reductions was yes, then how is this project anticipated to reduce emissions? If 'No', please describe how the project will mitigate increased greenhouse gas emissions or vehicle miles traveled.
41. **Promotes Freight** ----- This project enhances, supports, or promotes the following freight carrier modes (select all that apply):
- Air
  - Local Delivery
  - Long-Haul Truck
  - Rail
42. **Passenger Carrier Modes** ----- This project enhances supports, or promotes the following passenger carrier modes (select all that apply):
- Air
  - Amtrak Intercity Passenger Rail
  - Intercity Bus
43. **Aspirational Initiatives** ----- Please check each initiative that is implemented by this project. The aspirational initiatives are: (see next page)

- 
- Bring Jobs and Housing Closer Together.
  - Expand Bus Rapid Transit and Transitways Regionwide.
  - Move More People on Metrorail.
  - Provide More Telecommuting and Other Options for Commuting.
  - Expand Express Highway Network.
  - Improve Walk and Bike Access to Transit.
  - Complete the National Capital Trail Network
- 44. Additional Policy a. Framework** ----- Please provide additional written information that describes how this project further supports or advances the TPB Aspirational Initiatives.
- b.** ----- Please provide additional written information that describes how this project further supports or advances other regional goals or needs.
- 45. Federal Planning Factors** ----- This project supports the following planning factors (select all that apply):
- Emphasize the preservation of the existing transportation system.
  - Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight.
  - Enhance travel and tourism
  - Improve resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation
  - Increase accessibility and mobility of people
  - Increase accessibility and mobility of freight
  - Increases the ability of the transportation system to support homeland security and to safeguard the personal security of all motorized and non-motorized users.
  - Increases the safety of the transportation system for all motorized and non-motorized users.
  - Promote efficient system management and operation.
  - Protect and enhance the environment, promote energy conservation, improve the quality of life and promote consistency between transportation improvements and State and local planned growth and economic development patterns.
  - Support the economic vitality of the metropolitan area especially by enabling global competitiveness productivity and efficiently.

Project	Project ID	Question 34b How this project further supports or advances equity as described by the TPB July 2020 resolution.	Question 40b If the answer to question 40a regarding contributing to greenhouse gas emission reduction was yes, then how is this project anticipated to reduce emissions? If No, please describe how the project will mitigate increased greenhouse gas emissions or vehicle miles traveled.	Question 44a How this project further supports or advances the TPB Aspirational Initiatives, other regional goals, or needs.	Question 44b How this project further supports or advances other regional goals or needs.
Local Streets and Roadways					
Route 50 /North Collector Road	CEID3739	<p>Transportation Equity assures communities have accessible and affordable transportation for everyone in the community resulting in fair distribution of transportation resources, benefits, costs, programs, and services based upon differences in income, ability and other factor affecting transportation choice and impact. <u>All projects in Loudoun County</u>, are guided by the 2019 Comprehensive Plan (Plan) and is driven by the following vision and goals:</p> <ol style="list-style-type: none"> <li>1. Enhanced multimodal safety for all system users.</li> <li>2. A reliable and efficient multimodal transportation network.</li> <li>3. Transportation choices that connect people to their communities, employment centers, educational institutions, activity centers, and other amenities.</li> <li>4. Integration with neighboring jurisdictions to improve regional and statewide connectivity and to attract residents and businesses to Loudoun County.</li> <li>6. Context-sensitive planning and design that addresses the different characteristics and needs of the Urban, Suburban, Transition, Towns, and Rural Policy Areas; Towns; and Joint Land Management Areas (JLMA).</li> <li>7. A transportation network supportive of the County's overall vision to support economic development, create vibrant, safe communities and public spaces, and protect natural and heritage resources</li> </ol>	<p>The answer to question 40a was NO, because the project has not reached the stage where an air quality study is required. However, based on:</p> <ol style="list-style-type: none"> <li>1. Reduced congestion, including less time a vehicle idle in traffic, will reduce emission particulates, and,</li> <li>2. This project is planned to alleviate existing and or projected congestions, therefore,</li> </ol> <p>The project assumption is that building this project will reduce congested streets and or intersections leading to a reduction in vehicle emissions.</p>	<p>This road is designated as a Transit Corridor. These streets will serve as the primary routes for the countywide transit network through the Urban Policy Areas, providing efficient and logical routes between locations throughout the County and the Metrorail Stations</p> <p>Loudoun County aspires to be a place where pedestrians and cyclists of all abilities have a safe, secure and convenient transportation network of walkways and bikeways that enable efficient movement to and from home, work, school, shopping, libraries, parks, and community centers. <b>This project follows the Countywide Bicycle and Pedestrian Policies</b> that prioritize construction of bicycle and pedestrian accommodations and connections associated with construction and improvements to arterial and collector roadways with emphasis on the completion of connections between existing facilities in an effort to provide regional connections, and to the provision of safe walking and bicycling routes to new and existing public schools</p>	<p>The project supports the Goals of the “2019 Loudoun County Transportation Plan” and meets the needs of Loudoun County in developing a safe, efficient, and sustainable transportation system. As stated in the Plan Goals, projects are prepared with the intent to:</p> <ol style="list-style-type: none"> <li>1. Enhance multimodal safety for all system users.</li> <li>2. Provide a reliable and efficient multimodal transportation.</li> <li>3. Provide where possible transportation choices that connect people to their communities, employment centers, educational institutions, activity centers, and other amenities.</li> <li>4. Consider context-sensitive planning and design that addresses the different characteristics and needs of the Urban, Suburban, Transition, Towns, and Rural Policy Areas; Towns; and Joint Land Management Areas (JLMA).</li> </ol> <p>Supports RTTP Goal(s) GOAL 1: Provide a Comprehensive Range of Transportation Options. GOAL 2: Promote a Strong Regional Economy, including a Healthy Regional Core and Dynamic Activity Centers. GOAL 4: Maximize Operational Effectiveness and Safety of the Transportation System. GOAL 6: Support Inter-Regional and International Travel and Commerce</p>

Project	Project ID	Question 34b - Equity	Question 40b – GHG Reductions	Question 44a- Aspirational Initiatives,	Question 44b – Regional Goals.
Braddock Road, Segment 2	CEID3732	<p>Transportation Equity assures communities have accessible and affordable transportation for everyone in the community resulting in fair distribution of transportation resources, benefits, costs, programs, and services based upon differences in income, ability and other factor affecting transportation choice and impact. <u>All projects in Loudoun County</u>, are guided by the 2019 Comprehensive Plan (Plan) and is driven by the following vision and goals:</p> <ol style="list-style-type: none"> <li>1. A transportation network supportive of the County’s overall vision to support economic development, create vibrant, safe communities and public spaces, and protect natural and heritage resources</li> </ol>	Project is planned to promote transit uses and reduce VMT.	The County continues to encourage employers to support alternative travel modes by engaging employers, providing County staff support, and encouraging adoption of private TDM programs. The County considers existing and proposed TDM programs as a factor when evaluating requests for modifications and reductions to parking requirements. The County encourages private provision of car sharing and bicycle sharing in public and private commercial and residential areas to decrease the demand for private vehicle ownership and parking. The County shall encourages public and private entities to provide opportunities for employees to telework, hold alternative hours, or provide opportunities for a compressed work schedule in order to improve travel along the County's roadways. The County supports the extension of Metrorail into Loudoun County and seeks opportunities to increase ridership through improved mobility, access, and amenities in the vicinity of the station areas.	<p>The project supports the Goals of the “2019 Loudoun County Transportation Plan” and meets the needs of Loudoun County in developing a safe, efficient, and sustainable transportation system. As stated in the Plan Goals, projects are prepared with the intent to:</p> <ol style="list-style-type: none"> <li>1. Enhance multimodal safety for all system users.</li> <li>2. Integration with neighboring jurisdictions to improve regional and statewide connectivity and to attract residents and businesses to Loudoun County.</li> <li>6. Context-sensitive planning and design that addresses the different characteristics and needs of the Urban, Suburban, Transition, Towns, and Rural Policy Areas; Towns; and Joint Land Management Areas (JLMA).</li> <li>7. A transportation network supportive of the County's overall vision to support economic development, create vibrant, safe communities and public spaces, and protect natural and heritage resources</li> </ol>	Project is planned to promote transit uses and reduce VMT.	<p>The County continues to encourage employers to support alternative travel modes by engaging employers, providing County staff support, and encouraging adoption of private TDM programs. The County considers existing and proposed TDM programs as a factor when evaluating requests for modifications and reductions to parking requirements. The County encourages private provision of car sharing and bicycle sharing in public and private commercial and residential areas to decrease the demand for private vehicle ownership and parking. The County shall encourages public and private entities to provide opportunities for employees to telework, hold alternative hours, or provide opportunities for a compressed work schedule in order to improve travel along the County's roadways. The County supports the extension of Metrorail into Loudoun County and seeks opportunities to increase ridership through improved mobility, access, and amenities in the vicinity of the station areas.</p>	<p>The project supports the Goals of the “2019 Loudoun County Transportation Plan” and meets the needs of Loudoun County in developing a safe, efficient, and sustainable transportation system. As stated in the Plan Goals, projects are prepared with the intent to:</p> <ol style="list-style-type: none"> <li>1. Enhance multimodal safety for all system users.</li> <li>2. Provide a reliable and efficient multimodal transportation.</li> <li>3. Provide where possible transportation choices that connect people to their communities, employment centers, educational institutions, activity centers, and other amenities.</li> <li>4. Consider context-sensitive planning and design that addresses the different characteristics and needs of the Urban, Suburban, Transition, Towns, and Rural Policy Areas; Towns; and Joint Land Management Areas (JLMA).</li> </ol> <p>Supports RTTP Goal(s) GOAL 1: Provide a Comprehensive Range of Transportation Options.</p>
Sterling Park and Ride Lot	CEID3357	<p>Transportation Equity assures communities have accessible and affordable transportation for everyone in the community resulting in fair distribution of transportation resources, benefits, costs, programs, and services based upon differences in income, ability and other factor affecting transportation choice and impact. <u>All projects in Loudoun County</u>, are guided by the 2019 Comprehensive Plan (Plan) and is driven by the following vision and goals:</p> <ol style="list-style-type: none"> <li>1.
