RTS Public File Release

- The RTS data files are now available for public use by practitioners, researchers, and other stakeholders
- The data files include household, person, vehicle, and trip information for the TPB model region
- The public file release will include technical documentation that provides an overview of the data files
- The public file release will protect the confidentiality of survey participants
- For more information about the RTS and to request data, go to: <https://www.mwcog.org/transportation/data-and-tools/household-travel-survey/>

Some Final Thoughts about the RTS

- The RTS provides the most recent and comprehensive picture of travel in the Washington metropolitan region before the COVID-19 pandemic
- It will be a baseline to compare with a post-COVID “new normal”
- The RTS will help address questions about transportation equity by providing critical insights on access and opportunities for low income and communities of color
