Data Migration Plan for Metropolitan Washington Council of Governments (MWCOG) Commuter Connections Software System

REVISED

Background

Testing of the new MWCOG Commuter Connections TDM Software System began on Monday, November 19, 2007 and is scheduled to continue through February 15, 2008.

The purpose of the plan is to outline a scheduled move from the current Commuter Connections Ridematching System to the new web-based TDM Software System after all jurisdictions have attended mandatory training on March 4, 2008.

The first four jurisdictions to be migrated will be the test jurisdictions: Montgomery County, MD; Prince George's County, MD; Fairfax County, VA; and Prince William County, VA (PRTC). The remaining Commuter Connections Client members will be migrated according to the attached calendar.

COMMUTER CONNECTIONS WEB-BASED TDM
