TPB Technical Committee September 5, 2014 Item #4

MEMORANDUM

August 29, 2014

To: TPB Technical Committee

From: Andrew Austin

Department of Transportation Planning

Re: Briefing on the Draft 2014 CLRP and FY 2015-2020 TIP

The TPB Technical Committee will be briefed on the draft 2014 Update to the National Capital Region's Financially Constrained Long-Range Transportation Plan (CLRP) and the FY 2015-2020 Transportation Improvement Program (TIP) under Item 4 of the September 5, 2014 meeting.

The 2014 Update to the CLRP

The CLRP covers a 26 year span through the year 2040 and includes capital improvements, maintenance and preservation projects, as well as operational programs for the region's roadway network and transit systems. The 2014 Update to the CLRP includes a Financial Plan which breaks out the cost of these various components. Details on the Financial Plan will be presented to the committee under Item 6 of the September 5 meeting.

Those capital improvement projects that have impacts on the capacity of the region's road and transit systems are listed in the "2014 CLRP and FY 2015-2020 TIP Air Quality Conformity Inputs" table, included in the materials for Item 5 of this meeting's agenda. That table includes more than 500 projects or project segments, and highlights more than 250 changes to limits and/or completion dates for previously approved projects or new projects. Included with this memo are highlights of 10 major new projects or changes to existing projects, summarized below.

Summary of Major Additions and Changes to Projects In the CLRP

In the **District of Columbia**, DDOT is proposing three new transit projects; the Union Station to Georgetown Streetcar Line, the M Street SE/SW Streetcar Line, and the Benning Road Streetcar Spur. DDOT is proposing to remove the planned implementation of Peak Period Bus-Only Lanes on H Street NW and I Street NW from the CLRP, pending further study. DDOT is also proposing three studies to examine managed lanes on the 14th Street/ Rochambeau Bridge, I-395/I-695 (SE/SW Freeway), and I-295.

777 North Capitol Street NE, Suite 300, Washington, DC 20002-4290 Web: www.mwcog.org/tpb Phone: (202) 962-3315 Fax: (202) 962-3202

In **Maryland**, the Maryland Transit Administration is updating the MARC Growth and Investment Plan. The State Highway administration is resubmitting the construction of an interchange on I-95/I-495, the Capital Beltway at the Greenbelt Metro Station in Prince George's County. This project had previously been included in the CLRP, but was removed in 2010 to meet financial constraint requirements.

In **Virginia**, VDOT is proposing to widen a segment of US 1 in Prince William County and to widen a portion of VA 123, Chain bridge Road in Fairfax County. Virginia Railway Express is updating its System Plan as a part of the CLRP.

See the attached materials for further information on these projects and plans.

FY 2015-2020 TIP

Portions of the FY 2015-2020 TIP will be emailed directly to the committee members and agency staff responsible for reviewing the tables prior to the September 5 meeting. Further information will be provided on the financial summary of the TIP at that meeting.

Schedule for Approval of the CLRP and TIP

The TPB will release the draft CLRP and TIP for a 30-day public comment period on Thursday, September 11, 2014. The comment period will close on Saturday, September 11. Interested parties may submit their comments via any of these means:

- Online at www.mwcog.org/TPBcomment
- Via email at TPBcomment@mwcog.org
- By phone at (202) 962-3262, TDD: (202) 962-3213

The TPB will be asked to approve the CLRP and TIP at their meeting on October 15.

Major Additions and Changes to the 2014 Update to the Financially Constrained Long-Range Transportation Plan

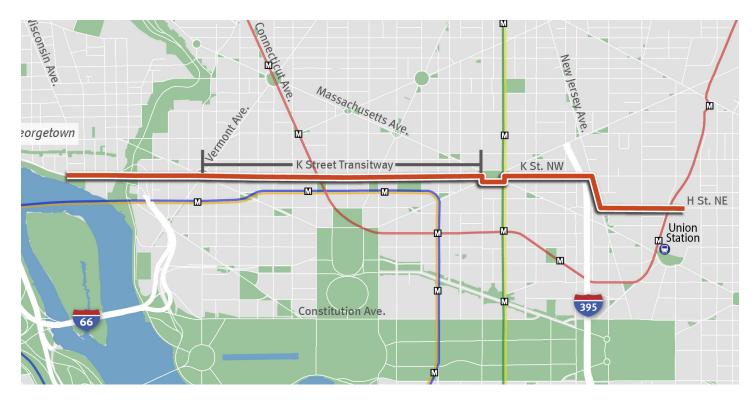

District of Columbia

1. Union Station to Georgetown Streetcar Line from H Street NE to Wisconsin Avenue NW

Length: 3.4 miles

Complete: 2020

Cost: \$348 million

Construct a streetcar line from H Street NE near Union Station, running along H Street NW to New Jersey Avenue NW, and continuing on K Street NW into Georgetown, ending at Wisconsin Avenue NW. This line will connect to the H Street NE – Benning Road line, already under construction. The streetcars will travel in mixed traffic lanes through the eastern portion of the route, but will travel in dedicated transit lanes on K Street between Mount Vernon Square/9th Street NW and Washington Circle/23rd Street NW (a project previously approved in the CLRP called the "K Street Transitway").

See CLRP Project Description Form in Attachment A for more information.

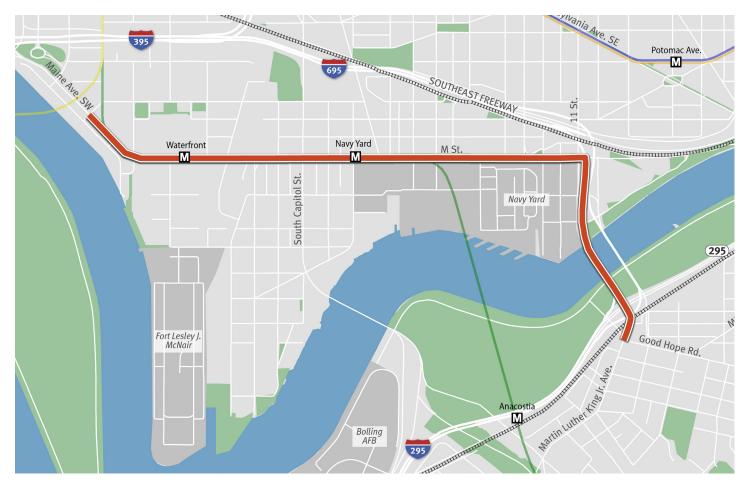

2. M Street Southeast/Southwest Streetcar Line from Good Hope Road SE to Maine Avenue SW

Length: 3 miles

Complete: 2020

Cost: \$250 million

Construct a streetcar line running from Good Hope Road SE, across the 11th Street Bridge, to M Street SE/SW, ending at Maine Avenue SW. This line will connect to the planned Anacostia Initial Streetcar Line at Good Hope Road SE.

See CLRP Project Description Form in Attachment A for more information.

3. Benning Road Streetcar Spur from Benning Road to Minnesota Avenue Metro Station

Length: < 1 mile

Complete: 2018

Cost: \$40 million

Construct a spur from the Benning Road Streetcar Line heading north along Minnesota Ave to the Minnesota Avenue Metro Station.

4. Removal of Proposed H and I Streets NW Peak Period Bus-Only Lanes

The approved CLRP contains two projects which proposed to implement bus-only lanes during peak periods. The H Street NW lane was planned between 17th Street NW and New York Avenue NW and the I Street NW lane was planned between 13th Street NW and Pennsylvania Avenue NW. These projects will be removed from the CLRP, pending further study.

5. Studies: Managed Lanes on 14th Street/Rochambeau Bridge, I-395/I-695, and I-295

Length: ≈9 miles

Complete: 2015

Cost: \$5.9 million

A. 14th Street/Rochambeau Bridge

The first study will look at converting the two northbound lanes on the 14th Street/Rochambeau Bridge to High Occupancy Vehicle (HOV 3+) during the morning peak period on weekdays and the two southbound lanes on the same facility to HOV 3+ during the evening peak period on weekdays, to mirror existing HOV operations in Virginia. The existing four northbound lanes on the Arland Williams, Jr. Bridge and four southbound lanes on the George Mason Memorial Bridge would remain as general purpose lanes. The study will also consider a subsequent conversion of the HOV lanes into High Occupancy/Toll (HOT) lanes.

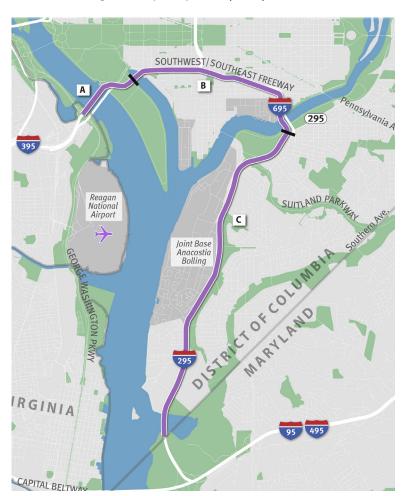

B. I-395/I-695, Southeast-Southwest Freeway

The second study will look at implementing HOV lanes on the Southeast/Southwest Freeway (I-395/I-695) from the Case Bridge to the 11th Street Bridge, and subsequently converting those to HOT.

C. I-295

The third study will consider implementing HOV and then HOT lanes on I-295 from the 11th Street Bridge to the DC/Maryland Line.

See CLRP Project Description Forms in Attachment A for more information.

Maryland

6. MARC Growth and Investment Plan

Complete: 2040

Cost: \$1.06 billion (Washington region)

MDOT is including \$1.06 billion of project improvements for MARC as identified in the MARC Growth and Investment Plan. The MARC Growth and Investment Plan is a multiphased, multi-year plan to increase the capacity of MARC,

Maryland's commuter rail system. MARC is a key component of Maryland's commuter network providing rail service for more than 30,000 commuters a day traveling between Washington's Union Station and northern, central and western Maryland.

Primary objectives of the plan include providing better service for current riders and addressing existing problems with capacity, frequency and reliability. This package of projects will increase passenger-carrying capacity and increase share of trips by MARC during peak travel periods, among other benefits. The \$1.06 billion shown reflects the Washington region's proposed contribution towards projects in the larger \$2.3 billion Growth and Investment Plan, which also includes the Baltimore area.

7. I-95/495 Interchange at Greenbelt Metro Station

Length: <1 mile

Complete: 2020

Cost: \$78.21 million

Construct a full interchange along I-95/I-495 at the Greenbelt Metro Station. The existing partial interchange provides access from the inner loop of the Capital Beltway to the Greenbelt Metro Station. The project includes the addition of auxiliary lanes on I-95/I-495 between the Greenbelt metro and MD 201 interchanges.

See CLRP Project Description Form in Attachment A for more information.

Virginia

8. Virginia Railway Express System Plan

Cost: 2040

Cost: \$977.4 million

The VRE System Plan provides a framework for VRE service expansion through 2040. The Plan includes system investments and expansion of peak service on the Fredericksburg and Manassas Lines, introduction of reverse-peak service, additional mid-day service, and service extension to the Gainesville-Haymarket area of Prince William County. Major railroad capacity projects focus on the relief of key capacity bottlenecks on the VRE system, including additional track capacity in the Long Bridge corridor and completion of a third main track on the Fredericksburg Line from Alexandria to Spotsylvania County.

The VRE System Plan outlines capital investments totaling \$3.2 billion to implement plan recommendations. It builds upon prior VRE growth plans included in the CLRP financial analysis and transit-modeling

assumptions proposed for implementation by 2020, for which funding has been identified. Funding for projected VRE station, yards and equipment needs through 2040 has also been identified and is reflected in the \$977 million CLRP project cost. Full funding for long-term system investments in railroad capacity, including the expansion of the Long Bridge and Fredericksburg Line third main track, and service enhancements such as reverse-peak service, additional mid-day trains or the future run-through of VRE and MARC trains has not been identified. Those recommendations are included for information purposes. As funding is identified for those initiatives they will be added to the CLRP and air quality conformity analysis.

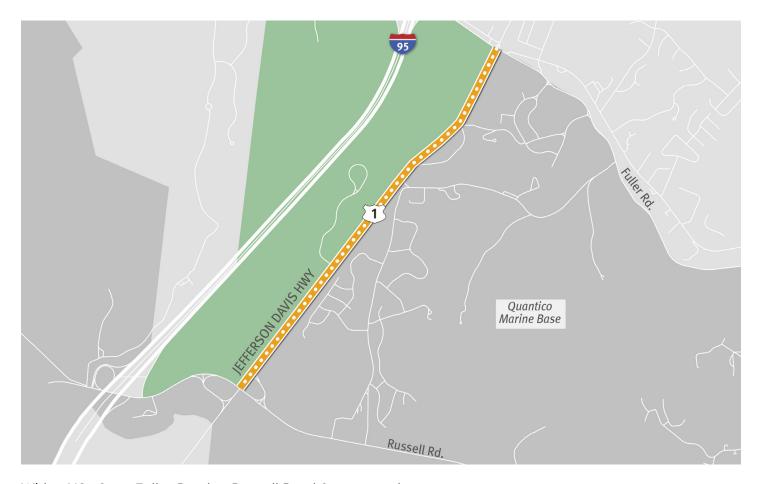

9. Widen US 1 from Fuller Road to Russell Road Interchange

Length: 2.38 miles

Complete: 2025

Cost: \$76 million

Widen US 1 from Fuller Road to Russell Road from 4 to 6 lanes.

See CLRP Project Description Form in Attachment A for more information.

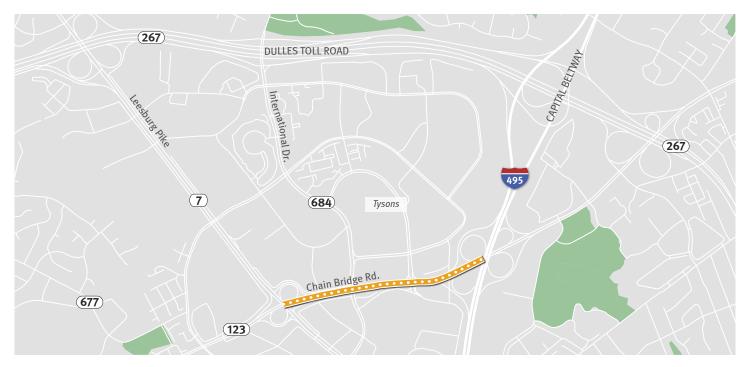

10. Widen VA 123 from VA 7, Leesburg Pike to I-495, Capital Beltway

Length: <1 mile

Complete: 2021

Cost: \$22 million

Widen VA Route 123 from Leesburg Pike to the Capital Beltway from 6 to 8 lanes.

See CLRP Project Description Form in Attachment A for more information.

Attachment A

Project Description Forms

FINANCIALLY CONSTRAINED LONG-RANGE TRANSPORTATION PLAN FOR 2040 PROJECT DESCRIPTION FORM

1. Union Station to Georgetown Streetcar Line

1. Submitting Agency: DDOT

2. Secondary Agency:

3. Agency Project ID: STC12A, SA306C

4. Project Type: _ Interstate X_ Primary _ Secondary _ Urban _ Bridge _ Bike/Ped _X Transit _ CMAQ

_ ITS _ Enhancement _ Other _ Federal Lands Highways Program

_ Human Service Transportation Coordination _ TERMs

5. Category: __System Expansion; __System Maintenance; __Operational Program; __Study; X__Other

(Intermodal Improvement)

6. Project Name: Union Station to Georgetown Streetcar Line

| | | PIEIIX | Route | Name | Modifier |
|----|--------------|--------|-------|----------------------------------------------|----------|
| 7. | Facility: | | | | |
| 8. | From (_ at): | | | 3 rd / H Street NE | |
| 9. | To: | | | Wisconsin Avenue under Whitehurst Freeway NW | |

10. Description: DDOT is proposing a transportation improvement and the introduction of streetcar along the K Street NW corridor from Union Station to Georgetown. This project will provide an efficient east-west connection for transit and improve transportation mobility, and improve transit reliability. The streetcar alignment is primarily located along K Street, NW, New Jersey Avenue NW, and H Street, NE. Below are the proposed station locations and corridor links (to be finalized in the NEPA process):

Station locations:

| Location | Platform | Serves |
|--------------------------------------|---------------|-------------------|
| H Street @ Hopscotch Bridge | side platform | Union Station |
| K Street between 3rd and 4th Streets | side platform | NoMa |
| Mount Vernon Square | side platform | Mount Vernon |
| | | 14th and 15th |
| K Street @ McPherson Square | side platform | Streets |
| | | 17th and 18th |
| K Street @ Farragut Square | side platform | Streets |
| | | 19th and 20th |
| K Street @ 19th and 20th Streets | side platform | Streets |
| K Street @ 25th and 26th Streets | split center | Foggy Bottom / GU |
| K Street @ Wisconsin Avenue | center | Georgetown |

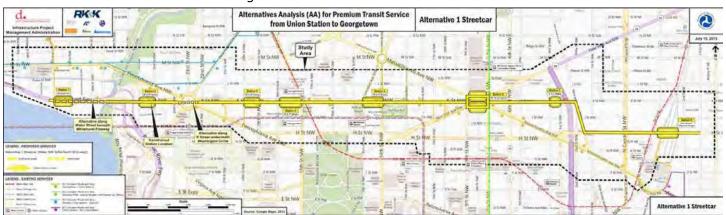

Link-by-link connection:

| Link | Roadway | shared/exclusive | streetcar |
|------------------------------------------|-------------------|------------------|-----------|
| Georgetown to Washington Circle | Along K Street NW | shared lanes | center |
| At Washington Circle | Under circle | shared lanes | center |
| Washington Circle to Mount Vernon Square | Along K Street NW | exclusive | center |
| At Mount Vernon Square | WB: north side | shared lanes | curb |
| | EB: south side | | curb |
| Mount Vernon Square to Union Station | K Street | shared lanes | curb |
| | New Jersey | shared lanes | center |
| | H Street | shared lanes | curb |
| At Union Station | Hopscotch Bridge | shared lanes | curb |
| Connection to existing tracks | at 3rd Street NE | shared lanes | curb |

The streetcar program will operate with a 10 minute headway.

NEPA Status: DDOT will begin NEPA in the first quarter of CY 2014; it will be 12 - 18 months.

Map of preferred alternative from Alternatives Analysis. The NEPA process will build from this alternative and information gathered in the AA.

MAP-21 PLANNING FACTORS

- 22. Please identify any and all planning factors that are addressed by this project:
 - a. _X Support the **economic vitality** of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency.
 - b. _ Increase the **safety** of the transportation system for all motorized and non-motorized users.
 - i. Is this project being proposed specifically to address a safety issue? _ Yes; _ No
 - ii. If yes, briefly describe (in quantifiable terms, where possible) the nature of the safety problem:
 - c. _ Increase the ability of the transportation system to support **homeland security** and to safeguard the personal security of all motorized and non-motorized users.
 - d. _X Increase accessibility and mobility of people.
 - e. _ Increase accessibility and mobility of freight.
 - f. X_ Protect and enhance the **environment**, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns.
 - g. X_ Enhance the **integration and connectivity** of the transportation system, across and between modes, for people and freight.
 - h. X_ Promote efficient system management and operation.
 - i. X_ Emphasize the **preservation** of the existing transportation system.

ENVIRONMENTAL MITIGATION

- 23. Have any potential mitigation activities been identified for this project? _ Yes; X_No
 - a. If yes, what types of mitigation activities have been identified?
 - _ Air Quality; _ Floodplains; _ Socioeconomics; _ Geology, Soils and Groundwater; Vibrations;
 - _ Energy; _ Noise; _ Surface Water; _ Hazardous and Contaminated Materials; _ Wetlands

- 24. Congested Conditions
 - a. Do traffic congestion conditions necessitate the proposed project or program? Yes; X No
 - b. If so, is the congestion recurring or non-recurring? Recurring; Non-recurring
 - c. If the congestion is on another facility, please identify it:
- 25. Capacity
- a. Is this a capacity-increasing project on a limited access highway or other principal arterial? _ Yes; X_ No
- b. If the answer to Question 26.a was "yes", are any of the following exemption criteria true about the project? (Choose one, or indicate that none of the exemption criteria apply):
 - _ None of the exemption criteria apply to this project a Congestion Management Documentation Form is required
 - _ The project will not use federal funds in any phase of development or construction (100% state, local, and/or private funding)
 - The number of lane-miles added to the highway system by the project totals less than one lane-mile
 - _ The project is an intersection reconstruction or other traffic engineering improvement, including replacement of an at-grade intersection with an interchange
 - The project, such as a transit, bicycle or pedestrian facility, will not allow private single-occupant motor vehicles
 - _ The project consists of preliminary studies or engineering only, and is not funded for construction
 - _ The construction costs for the project are less than \$10 million.
- c. If the project is not exempt and requires a Congestion Management Documentation Form, click here to open a blank Congestion Management Documentation Form.

Project Name: Study: Managed Lanes Conversion to HOV Lanes/HOT Lanes

| Prefix | Route | Name | Modifier |
|--------|-------|-------------------------------------------|----------|
| | | Rochambeau Bridge (I-395) | |
| | | Va State Line | |
| | | Southeast/Southwest Freeway (I-395/I-695) | |

7. Facility:

8. From (_ at):

9. To:

10. Description:

The managed lanes study consists of a network of three independent corridors linked to provide access into and through the District of Columbia to provide a predictable travel time. The project will promote multi-modal and High Occupancy Vehicle (HOV) use and promote the reduction of Single Occupancy Vehicle (SOV) travel into the District. The project utilizes the existing transportation network and makes improvements to that network as appropriate and required to provide a managed lane facility. Eventually HOV will be converted to HOT.

The District Department of Transportation completed a feasibility study on the Managed Lanes Corridor, which consisted of Rochambeau Bridge/I-395 (Corridor I); Southeast Southwest Freeway/I-395,I-695 (Corridor II); I-295 (Corridor III). Corridors II and III will have additional NEPA needs.

There are currently three bridges that cross into the District of Columbia from Virginia along the I-395 corridor. The Arland Williams Jr Memorial Bridge (Route 1/I-395) carries the northbound traffic coming into DC, has four General Purpose Lanes. These lanes will remain as GP Lanes and are not being changed.

The George Mason Memorial Bridge (Route 1/I-395) carries the southbound traffic coming into Va, has four GP Lanes, which will remain as GP Lanes and are not being changed.

The Rochambeau Bridge carries in total four lanes, two northbound and two southbound lanes. Traffic from these lanes feed into or come out of the existing HOV system in Va.

The operation of HOV will mirror the existing operation in Va, which is HOV 3+, 6am to 9am/3:30pm to 6pm Mon-Fri.

We are planning to convert the HOV to HOT by March 2015, with the NEPA being a Documented Categorical Exclusion. Corridor 2 and 3 will go through NEPA process.

There have been continuous and on-going coordination with state dot's and jurisdictions.

 - d. _X Increase accessibility and mobility of people.
 - e. _ Increase accessibility and mobility of freight.
 - f. _ Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns.
 - g. _ Enhance the **integration and connectivity** of the transportation system, across and between modes, for people and freight.
 - h. X Promote efficient system management and operation.
 - i. _ Emphasize the **preservation** of the existing transportation system.

ENVIRONMENTAL MITIGATION

- 23. Have any potential mitigation activities been identified for this project? _ Yes; X_No
 - a. If yes, what types of mitigation activities have been identified?
 - _ Air Quality; _ Floodplains; _ Socioeconomics; _ Geology, Soils and Groundwater; Vibrations;
 - _ Energy; _ Noise; _ Surface Water; _ Hazardous and Contaminated Materials; _ Wetlands

- 24. Congested Conditions
 - a. Do traffic congestion conditions necessitate the proposed project or program? _X Yes; _ No
 - b. If so, is the congestion recurring or non-recurring? _X Recurring; _ Non-recurring
 - c. If the congestion is on another facility, please identify it:

25. Capacity

- a. Is this a capacity-increasing project on a limited access highway or other principal arterial? _X Yes; _
 No
- b. If the answer to Question 26.a was "yes", are any of the following exemption criteria true about the project? (Choose one, or indicate that none of the exemption criteria apply):
 - _ None of the exemption criteria apply to this project a Congestion Management Documentation Form is required
 - _ The project will not use federal funds in any phase of development or construction (100% state, local, and/or private funding)
 - _ The number of lane-miles added to the highway system by the project totals less than one lane-mile
 - _ The project is an intersection reconstruction or other traffic engineering improvement, including replacement of an at-grade intersection with an interchange
 - _ The project, such as a transit, bicycle or pedestrian facility, will not allow private single-occupant motor vehicles
 - _ The project consists of preliminary studies or engineering only, and is not funded for construction
 - _X The construction costs for the project are less than \$10 million.
- c. If the project is not exempt and requires a Congestion Management Documentation Form, click here to open a blank Congestion Management Documentation Form.

FINANCIALLY CONSTRAINED LONG-RANGE TRANSPORTATION PLAN FOR 2040 PROJECT DESCRIPTION FORM

Modifier

5B/C. Study: Managed Lanes on the 14th Street/Rochambeau Bridge

Submitting Agency: DDOT
 Secondary Agency: DDOT
 Agency Project ID: PM0A4A

4. Project Type: X Interstate _ Primary _ Secondary _ Urban _ Bridge _ Bike/Ped _ Transit _ CMAQ

_ ITS _ Enhancement _ Other _ Federal Lands Highways Program

_ Human Service Transportation Coordination _ TERMs

5. Category: __System Expansion; __System Maintenance; __Operational Program; X Study; __Other

6. Project Name: Managed Lanes Corridor II and III NEPA

Route Name

Prefix

7. Facility: {Corridor 2 SE/SW Freeway (I-395/I-695)} 8. From (_ at): {Corridor 3 (I-295)} 9. To: {Corridor 2 At Case Bridge} 10. Description: {Corridor 3 at the junction of (I-295/I-695)}

10. Description:

\[
\{\text{Corridor 3 at the junction of (I-295/I-695)}\} \\
\{\text{Corridor 2 11}^{th} Street Bridge}\} \\
\{\text{Corridor 3 DC/MD Line}\}
\]

The managed lanes project consists of a network of three independent corridors linked to provide access

The managed lanes project consists of a network of three independent corridors linked to provide access into and through the District of Columbia to provide a predictable travel time. The project will promote multi-modal and High Occupancy Vehicle (HOV) use and promote the reduction of Single Occupancy Vehicle (SOV) travel into the District. The project utilizes the existing transportation network and makes improvements to that network as appropriate and required to provide a managed lane facility.

DDOT has plans to perform an environmental study on the Managed Lanes Corridor II and III. The study level of the NEPA document will be determined at later time but it will be at a higher level NEPA document.

Corridor II will be along SE/SW Freeway (I-395/I-695) beginning near the Case Bridge to the 11^{th} Street Bridge. Corridor III will be along I-295 beginning near the 11^{th} Street Bridge to the DC/MD line. The lanes along these corridors would either be converted to HOV/HOT or built into HOV/HOT lanes.

MAP-21 PLANNING FACTORS

- 22. Please identify any and all planning factors that are addressed by this project:
 - a. _ Support the **economic vitality** of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency.
 - b. _X Increase the **safety** of the transportation system for all motorized and non-motorized users.
 - i. Is this project being proposed specifically to address a safety issue? Yes; No
 - ii. If yes, briefly describe (in quantifiable terms, where possible) the nature of the safety problem:
 - c. _ Increase the ability of the transportation system to support **homeland security** and to safeguard the personal security of all motorized and non-motorized users.
 - d. _X Increase accessibility and mobility of people.
 - e. _ Increase accessibility and mobility of freight.
 - f. _ Protect and enhance the **environment**, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns.
 - g. _ Enhance the **integration and connectivity** of the transportation system, across and between modes, for people and freight.
 - h. _X Promote efficient system management and operation.
 - i. _ Emphasize the **preservation** of the existing transportation system.
