HANDOUT – DRAFT Virginia Critical Urban Freight Corridor Info

TPB staff analyzed the truck volumes, intermodal access, and "freight intensity" of nearby commercial buildings for each roadway segment within the Virginia portion of the National Capital Region. Based on this analysis, 50 miles of potential Critical Urban Freight Corridor (CUFC) candidates were identified. Because only a small, yet to be determined, number of miles can be officially designated as CUFCs, these initial candidate corridors were then compared with the locations of projects identified in the VDOT Six-Year Improvement Program to winnow the list down to 17.8 miles (identified in red). To help VDOT in their effort to allocate their 83.35 miles among Virginia's many MPOs. Staff has identified additional corridor segments that could be identified as CUFCs if more miles are allocated. If TPB is allocated 22.4 miles, staff would propose the addition of the segments identified in blue. If 30.1 miles were allocated, the additional segments in orange could be added (see map and table below).
