# CARPOOL NOW

A NEW DYNAMIC RIDESHARE OPTION FOR COMMUTERS IN THE WASHINGTON DC REGION

LOGGING IN

Each user will be greeted with a login screen upon launching the app for the first time

Members will login using their existing Commuter Connections credentials *or* create a new account

CREATING A NEW ACCOUNT

New users will have access to a signup form nearly identical to the TDM interface

Once finished, users will have a fully functional account with Commuter Connections

REQUEST A RIDE OR OFFER TO DRIVE?

Upon logging in, users will have to choose between two options: Requesting a Ride or Offering to Drive

Simple, modern design and oversized icons limit user error
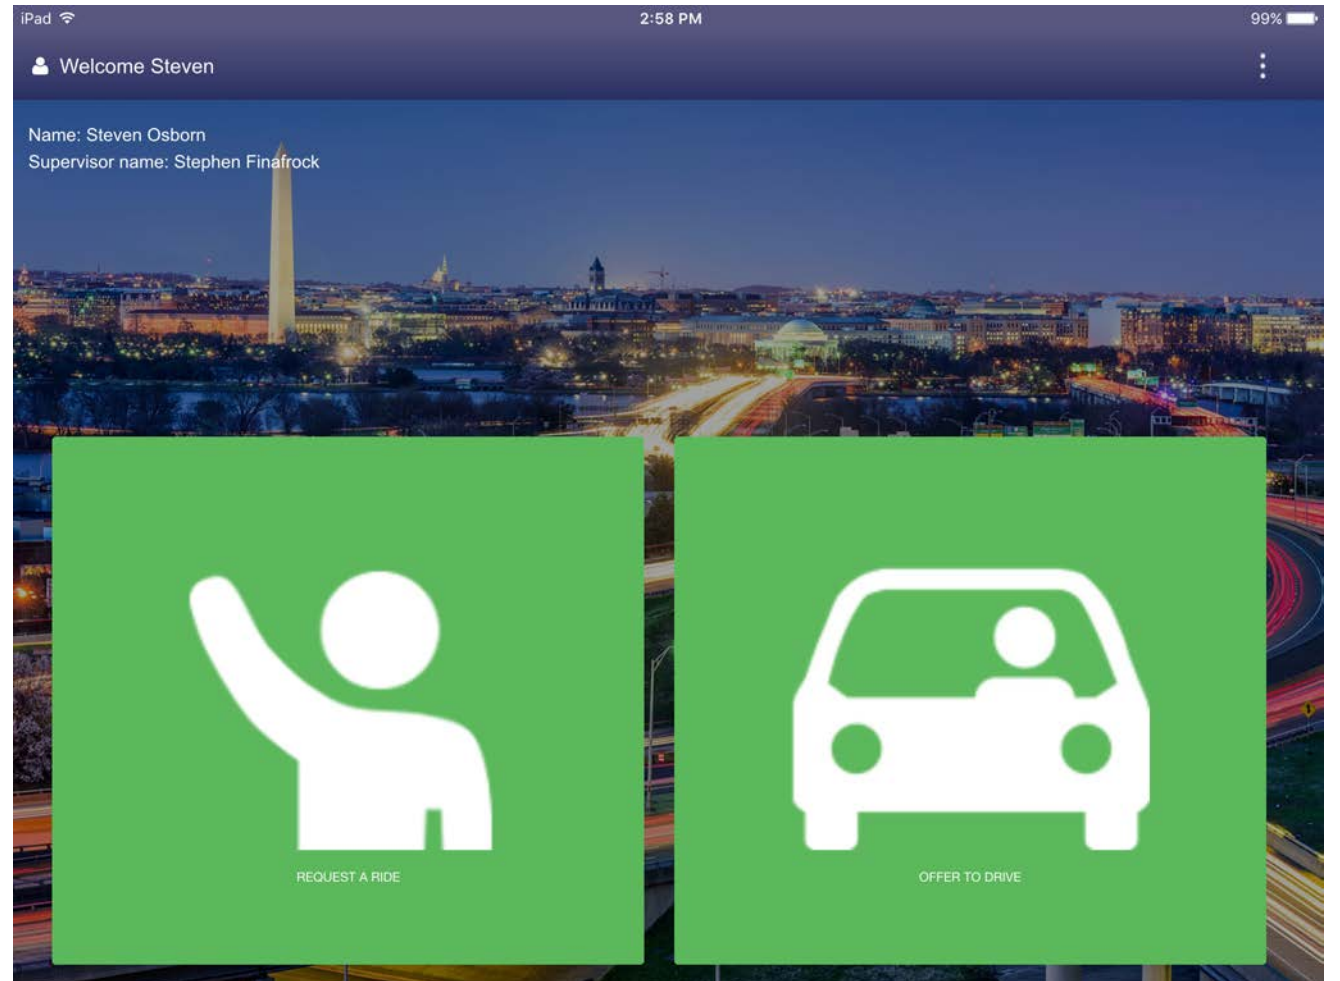

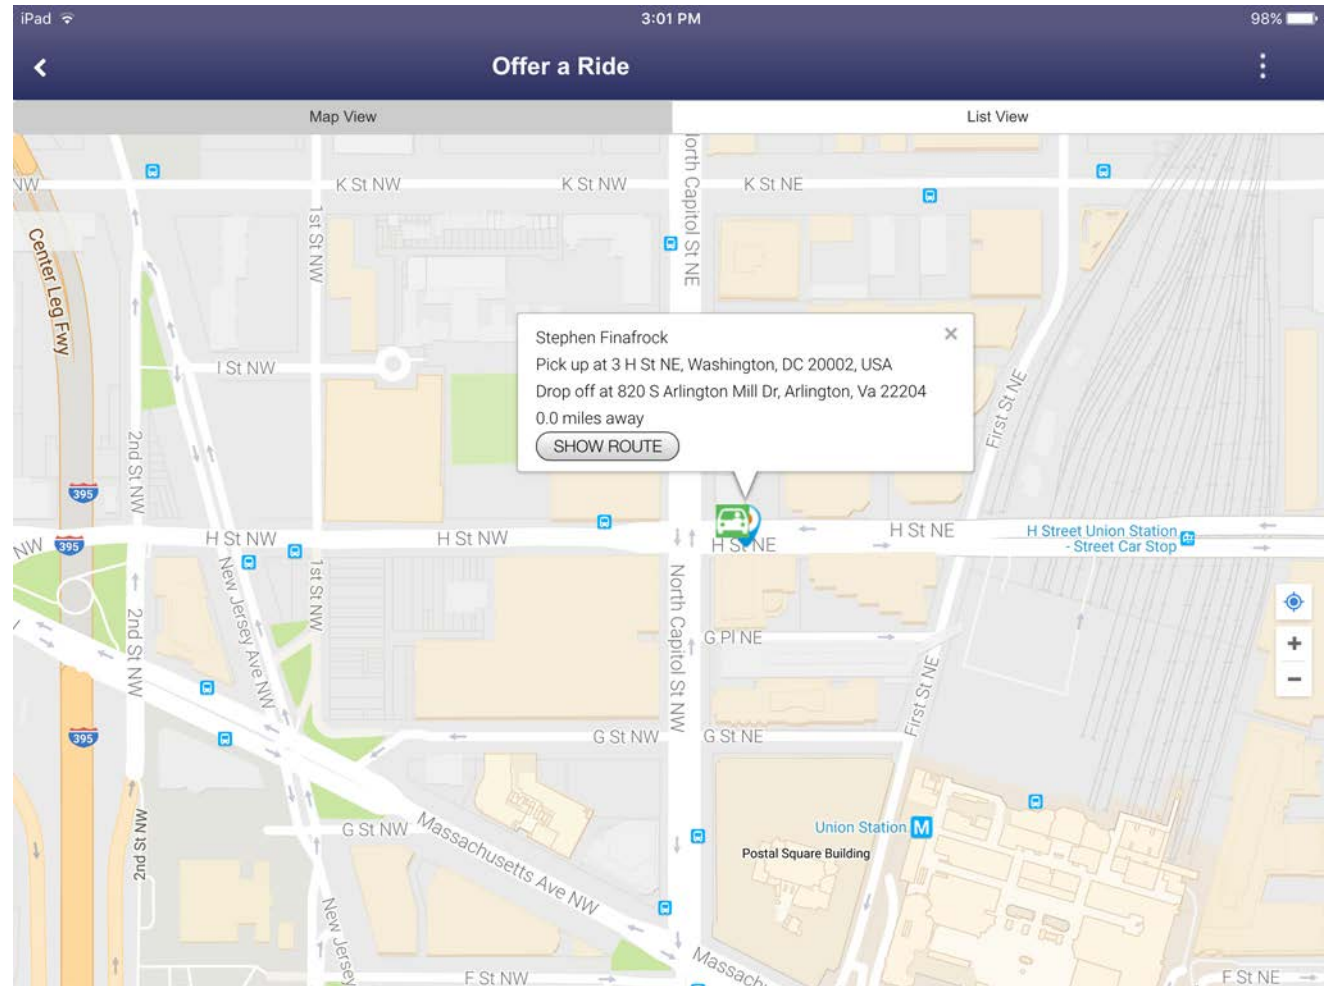

OFFERING A RIDE

The App defaults as a map view

Any other users logged in requesting a ride will appear at their current location

You can tap the icon to display that individuals information and show a suggested route to their destination

SHOWING THE USERS SUGGESTED ROUTE

Tapping "Show Route" will display the suggested route and give you the option to offer the ride!

Users will also have the option to select a list view of all commuters requesting a ride
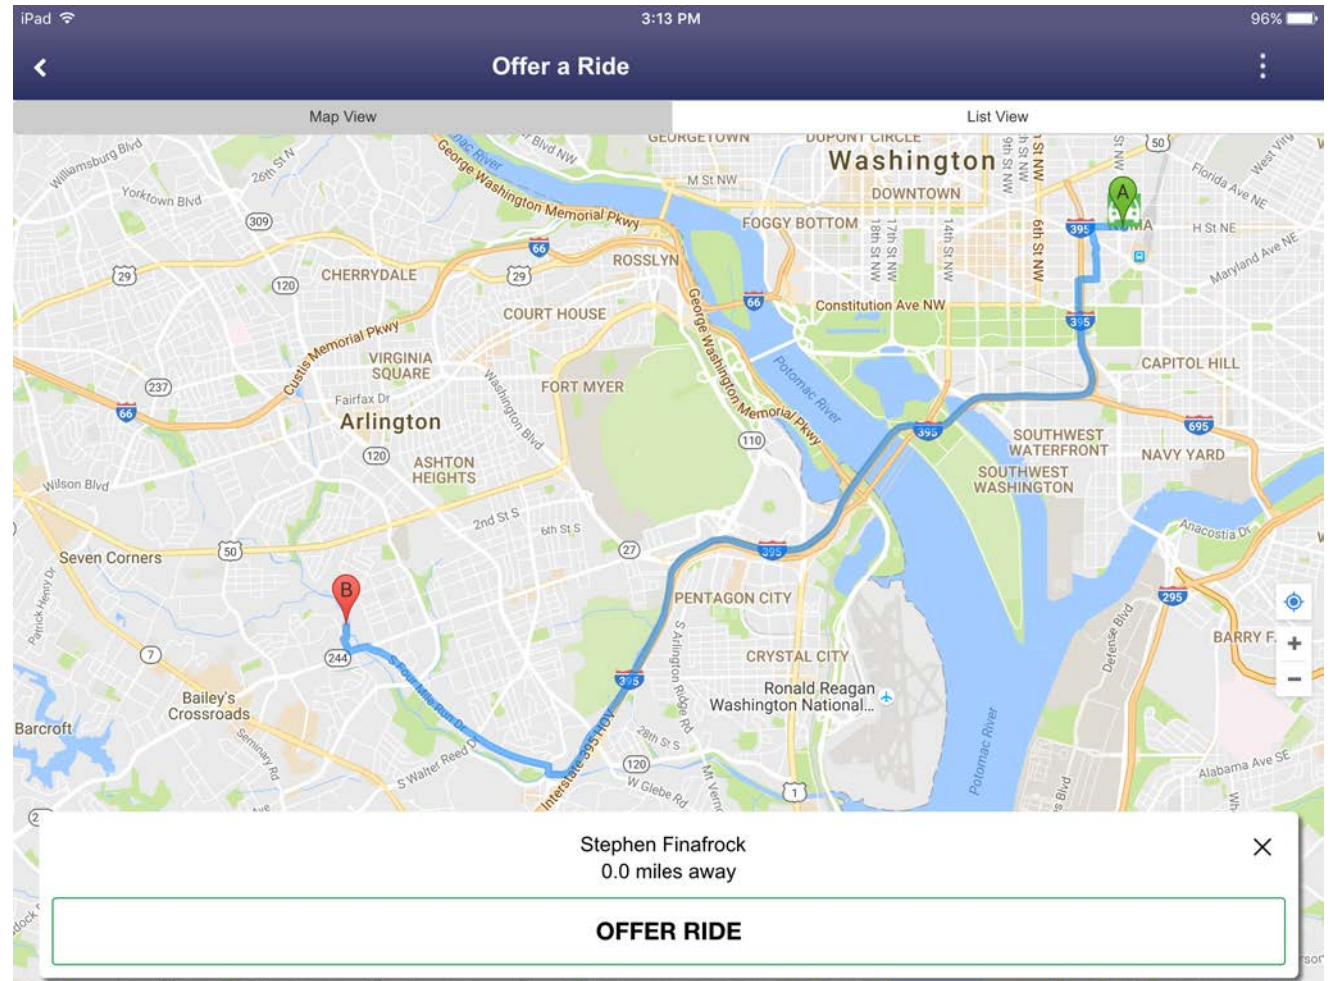

LIST VIEW

Selecting the "List View" tab at the top of the screen will give the user access to each commuter requesting a ride
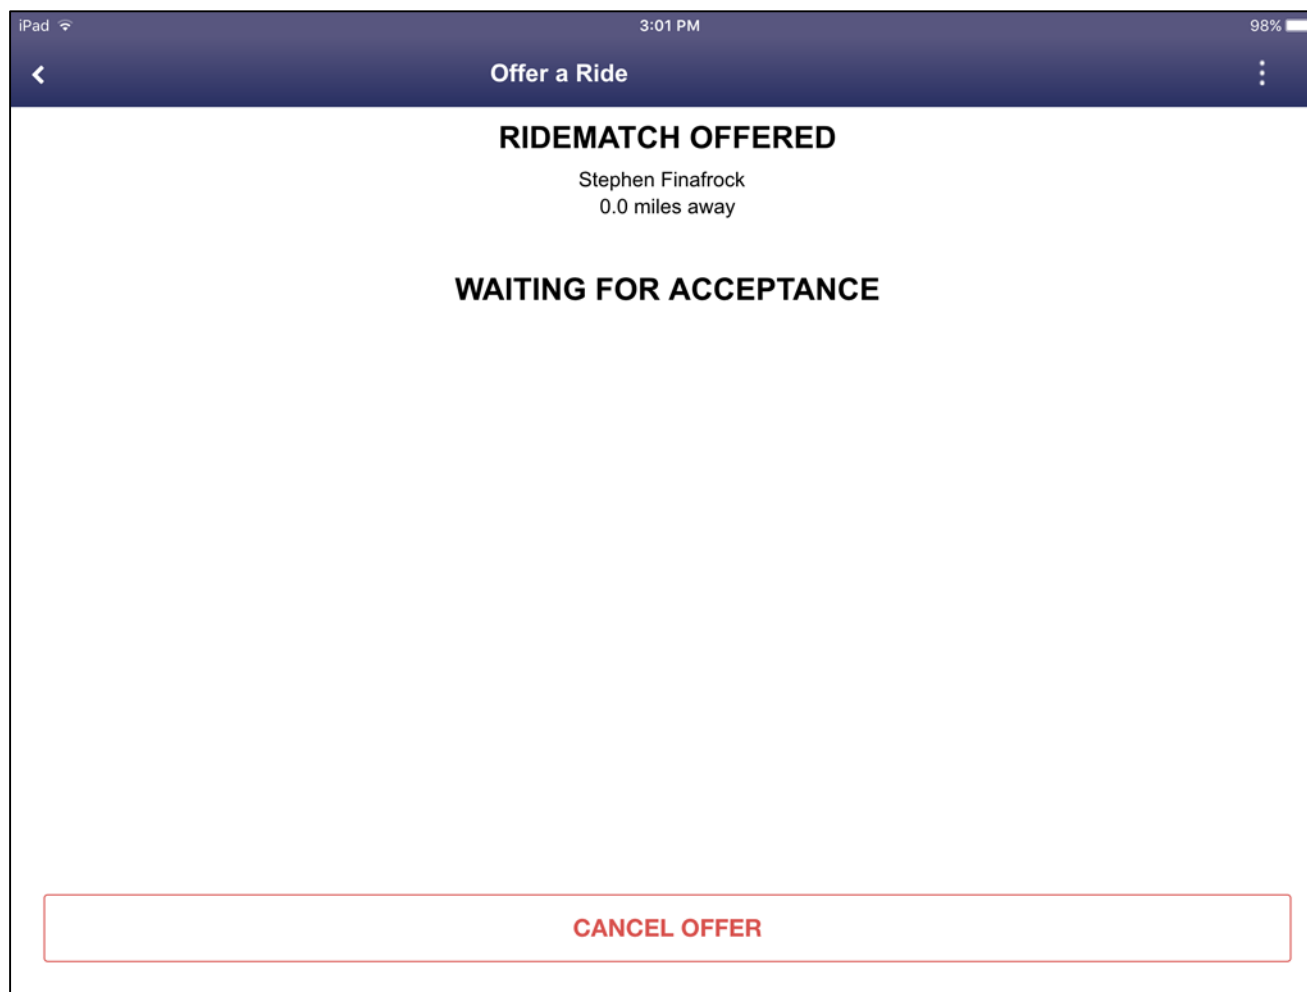

The user can also offer the ride while in the list view

SENDING THE OFFER TO DRIVE

At this point, the driver needs to wait for a response

The rider will receive a notification that their ride has been offered

CONFIRMING PICKUP AND LAUNCHING NAVIGATION

After the rider accepts the offer, the user will have the option to launch their native navigation application or confirm pickup

Selecting "Rider Picked Up" will confirm ridematch success and prompt the user to logout
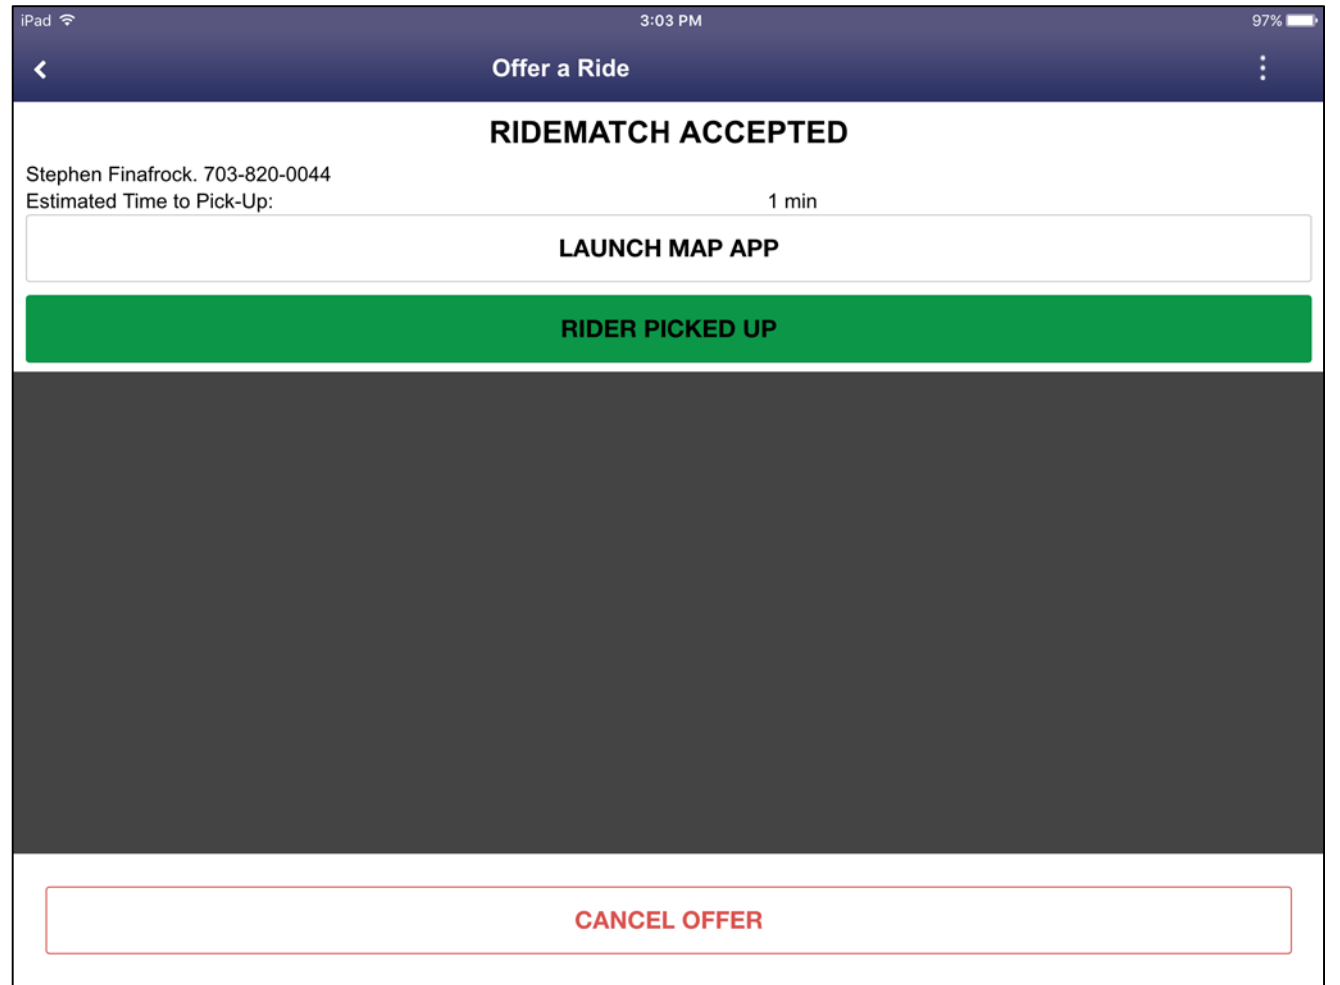

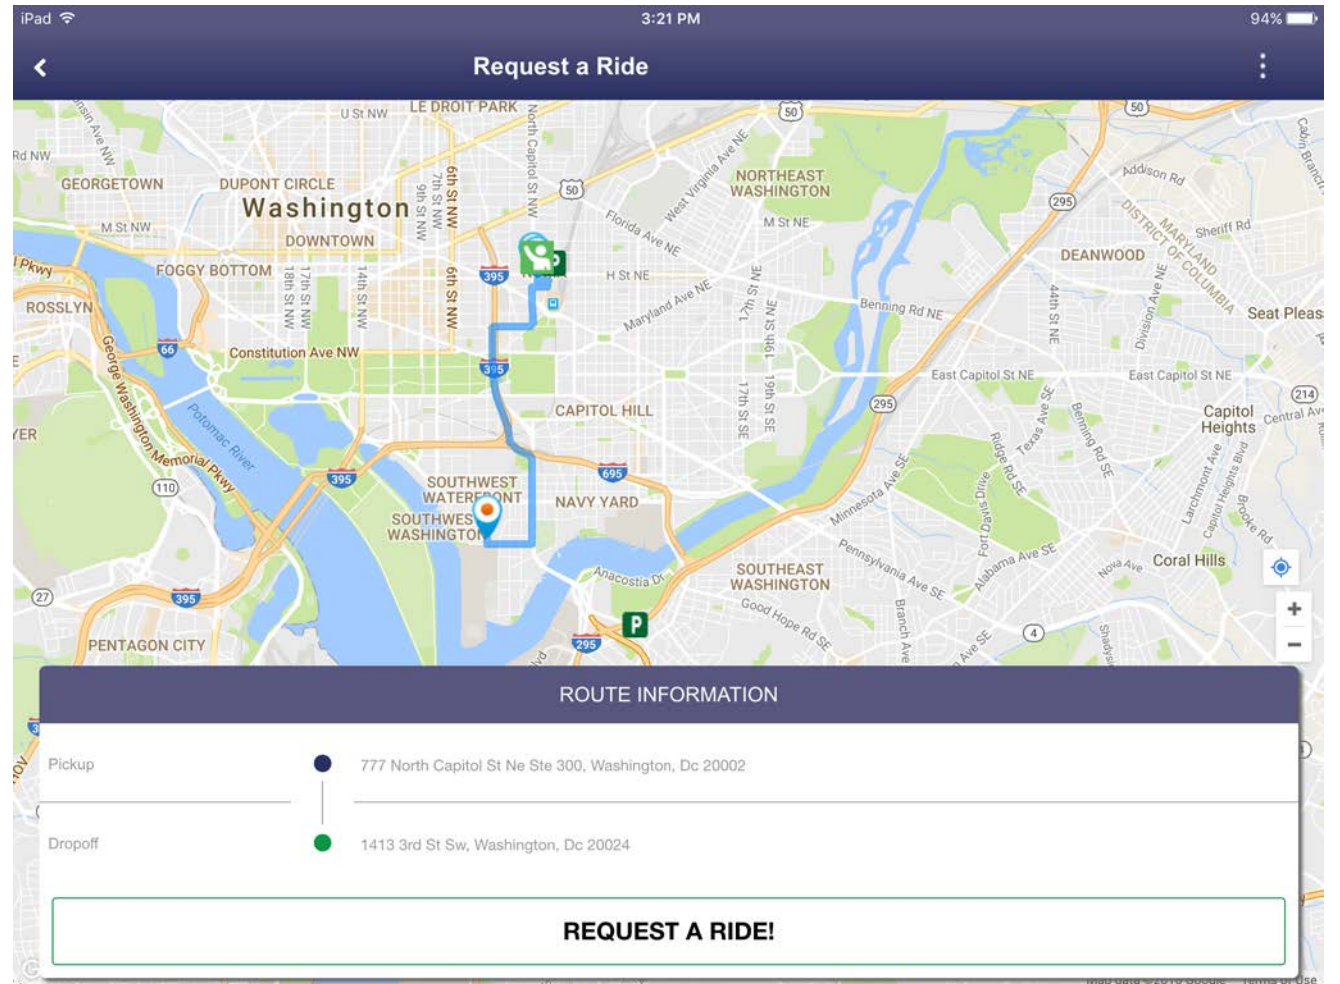

REQUESTING A RIDE

The app will detect your current location

You will need to input your drop off location. This is done by tapping the "Dropoff" section at the bottom of the UI
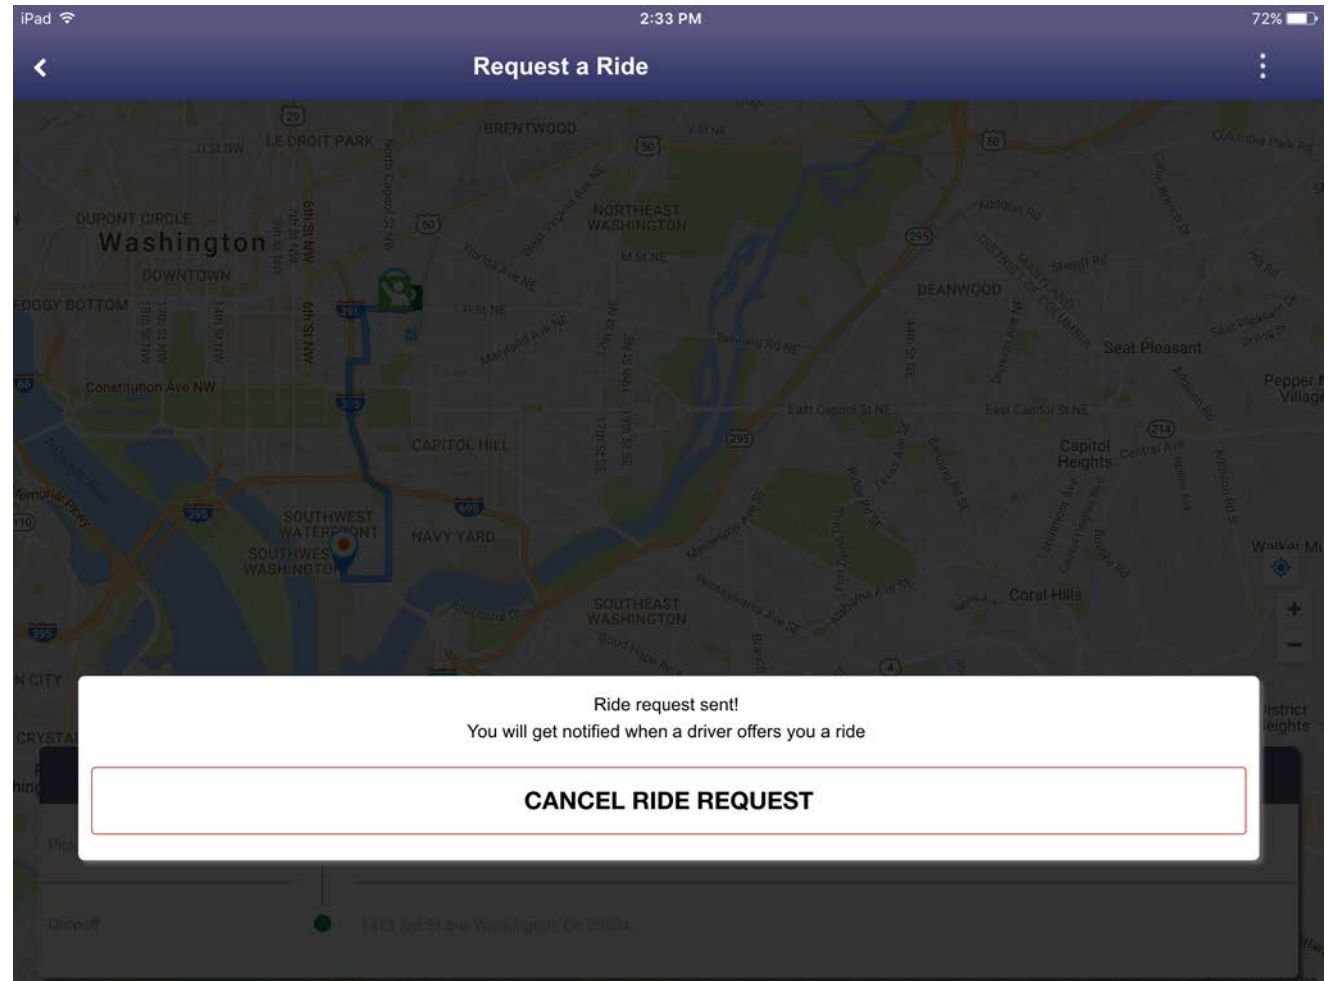

Users will have the option to select the home address listed in their profile or select the "Pick from Map" option

SUBMITTING THE REQUEST

The request has been submitted and will now appear available to any user offering a ride
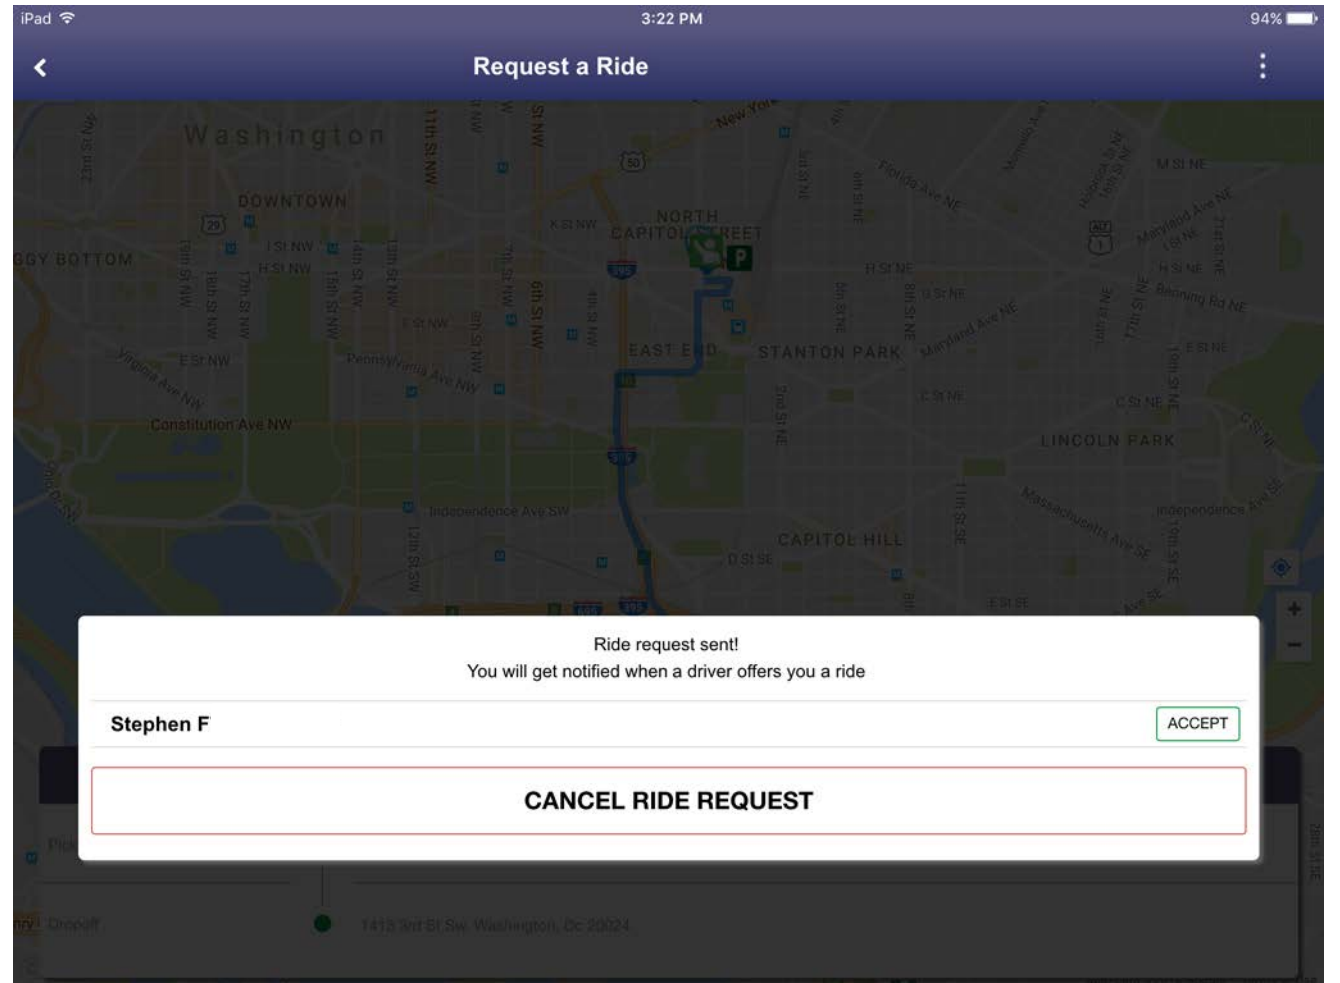

Users have the option to cancel the request at any point in time

REQUEST ACKNOWLEDGMENT

If the ride request is acknowledged by a driver, the user will receive a notification and will need to accept the ride

Accepting the ride will give you an estimated pick up time and let you know when the driver has arrived

YOUR DRIVER HAS ARRIVED

Once the driver has arrived, you will be notified of the ridematch success and will be prompted to logout of your account
