Table of Contents

-

1.0 Introduction [Future Update](#)

1.1 Purpose

1.2 Project Background and History

1.2.1 Architecture Development Process

1.3 Final Architecture Rule and Conformity

2.0 Regional Boundaries

2.1 Regional Description [-----Under Update](#)

2.2 Stakeholder Descriptions [-----Under Update](#)

3.0 ITS Systems Inventory

3.1 Element Descriptions [Under Update](#)

3.2 Systems Inventory [Under Update](#)

4.0 OPERATIONAL CONCEPTS [Under Update](#)

4.1 Operational Concept Defined

4.2 Roles and Responsibilities

5.0 Functional Requirements Under Update

6.0 Regional Architecture [Future Update](#)

6.1 High Level Architecture

6.2 Interconnect Matrix

6.3 Information Exchanges

7.0 Agency Agreement [Future Update](#)

7.1 Types of Agreements

7.2 Agreement Focus

7.3 List of Agreements Output

8.0 ITS Standards to Consider [Future Update](#)

8.1 Standards Development Organizations (SDOs)

8.2 Standards Elements

8.3 Decision Making Strategy for Standards

8.4 Standards To Consider

8.4.1 Available ITS Standards for Metropolitan Washington Area

8.5 Critical Standards For Metropolitan Washington Area

8.5.1 Use of NTCIP in Metropolitan Washington Area

8.5.2 Location Referencing Message Specification (LRMS)

8.5.3 Applicable Incident Management Standards

DRAFT

9.0 Sequencing of Projects [Future Update](#)

10.0 Use and Maintenance of the Architecture [Future Update](#)

10.1 Use of Regional Architecture

10.1.1 Support Planning Process

10.1.2 Support Project Development

10.2 Maintenance of the Regional Architecture

10.2.1 Responsibility for Maintaining the Regional ITS Architecture

10.2.2 Items To Be Maintained in the Architecture

10.2.3 Frequency of Updating the Architecture

10.2.4 Update Process

11.0 Next Steps and Future Needs [Future Update](#)
