

**National Capital Region
 Transit Information Questionnaire
 TPB Regional Public Transportation Subcommittee**

Name of Transit Service					
Contact Information					
Name		E-mail		Tel	

The TPB Regional Public Transportation Subcommittee (RPTS) is conducting information collection on a number of topical issues to determine the most recent date of accomplishment and upcoming plans. Information is requested on the following:

- Transit Development Plan (TDP) or Transit Strategic Plan (TSP) Status,
- Equity Analyses,
- Connected and Automated Vehicles Planning,
- Transit Travel Surveys,
- Ridership and Fare Data Analysis.

The collected information will be used in support of a number of TPB planning activities and will be provided to the TPB RPTS members for their use as well.

The Questionnaire:

TDP/TSP STATUS

Please provide dates and any links for the following:

Date of last completed TDP/TSP?	
Web link to document(s)?	
Scheduled Date for completion of next TDP/TSP?	
Has work started? When?	
Are you planning any new or innovative work for your new TDP/TSP? Unfunded sections? Fleet Electrification options? Equity analyses?	

EQUITY ANALYSES

Has your agency conducted any new or innovative analysis on transit equity, such as on mapping of service levels vs. low-income or disadvantaged populations? We are looking for any accomplishments beyond standard FTA-required Title VI work, for lessons learned or best practices to be shared across the region.

AUTOMATED VEHICLES (AV) PLANNING

Is your agency conducting any planning for or assessment of Automated Vehicles (AV) or Connected Automated Vehicle (CAV) technology? This could include consideration of new transit signal priority technologies or other vehicle-to-infrastructure technology, as well as driver assist technology, collision avoidance systems or other new sensors, and of course driverless technology. We are looking for any planning that is new or innovative that could be shared across the region. Please provide any links to published information as well.

TRANSIT TRAVEL SURVEYS

Travel survey data, particularly origin and destination (O-D) information, is vital to the work of the TPB. A comprehensive regional bus transit travel survey has not been conducted in some time, for a variety of reasons. TPB staff would like to know the status of transit travel surveys among the region’s operators, to assist in determining ways in which improved regional transit travel data could be collected.

Date of last agency-wide transit travel survey?	
Did the survey collect O-D data?	
If not, how does your agency collect O-D data or otherwise analyze person trips?	
Web link to document(s)?	
Scheduled date for next transit travel survey?	
Will the survey collect O-D data?	
Would you be interested in participating in an inter-agency transit travel survey?	

RIDERSHIP AND FARE DATA ANALYSIS

Due to the pandemic, fare collection was suspended by the region’s local bus operators. Fare collection has now been reinstated by WMATA Metrobus and some other agencies, with others planning to do so in the near future. The TPB staff have been asked to assess the impact of the restoration of fare collection on ridership, and we would like to collect information on ridership

immediately preceding and post-reinstitution of fare collection. Could you please provide the following information:

Date or planned date of reinstating fare collection?	
If you have reinstated fares, please provide agency ridership data for preceding month	Link, or please provide document
Provide agency ridership data for the month following:	Link, or please provide document

Please provide your completed form to Eric Randall (erandall@mwkog.org) and Antonio Castañeda (acastaneda@mwkog.org)
