

Item 9: Update of the Multi-sector greenhouse gas working group

Sharon Bulova Motion:

1 - The Board acknowledges and formally expresses its gratitude to the members of the Multi-Sector Greenhouse Gas Working Group.

2 – The Board directs the staff to prepare a consensus recommendation consisting of a package of greenhouse gas emission reduction strategies for incorporation into a regional action plan for consideration by the Board in January, 2016. The consensus recommendation would also address the exploration of goals and target that is part of the Multi-Sector workgroup mission.

3 – The consensus recommendation would be developed with the assistance of a policy level working group made up of elected official representatives drawn from the COG Board, TPB, MWAQC and CEEPC.

Jonathan Way friendly amendment:

The final report shall include the legal authority for any recommendation for mandatory actions or exclusions related to greenhouse gases.
