

Restore I-66 Improvements Now!

I strongly urge the Transportation Planning Board to restore I-66 westbound Spot Improvements to the 2009 Constrained Long Range Plan and FY 2010-2015 Transportation Improvement Program for air quality conformity testing.

Numerous VDOT and private sector studies show, and the more than 70,000 motorists using I-66 westbound daily can attest, these improvements will provide significant congestion and air quality relief to one of the region's worst chokepoints.

The TPB's February 18th decision to remove these projects was a major setback for responsible regional planning. It should be reversed at the TPB's March 18th meeting.

Restore I-66 Improvements Now!

I strongly urge the Transportation Planning Board to restore I-66 westbound Spot Improvements to the 2009 Constrained Long Range Plan and FY 2010-2015 Transportation Improvement Program for air quality conformity testing.

Numerous VDOT and private sector studies show, and the more than 70,000 motorists using I-66 westbound daily can attest, these improvements will provide significant congestion and air quality relief to one of the region's worst chokepoints.

The TPB's February 18th decision to remove these projects was a major setback for responsible regional planning. It should be reversed at the TPB's March 18th meeting.

I strongly urge the Transportation Planning Board to restore I-66 westbound Spot Improvements to the 2009 Constrained Long Range Plan and FY 2010-2015 Transportation Improvement Program for air quality conformity testing.

Numerous VDOT and private sector studies show, and the more than 70,000 motorists using I-66 westbound daily can attest, these improvements will provide significant congestion and air quality relief to one of the region's worst chokepoints.

The TPB's February 18th decision to remove these projects was a major setback for responsible regional planning. It should be reversed at the TPB's March 18th meeting.

I strongly urge the Transportation Planning Board to restore I-66 westbound Spot Improvements to the 2009 Constrained Long Range Plan and FY 2010-2015 Transportation Improvement Program for air quality conformity testing.

Numerous VDOT and private sector studies show, and the more than 70,000 motorists using I-66 westbound daily can attest, these improvements will provide significant congestion and air quality relief to one of the region's worst chokepoints.

The TPB's February 18th decision to remove these projects was a major setback for responsible regional planning. It should be reversed at the TPB's March 18th meeting.

I strongly urge the Transportation Planning Board to restore I-66 westbound Spot Improvements to the 2009 Constrained Long Range Plan and FY 2010-2015 Transportation Improvement Program for air quality conformity testing.

Numerous VDOT and private sector studies show, and the more than 70,000 motorists using I-66 westbound daily can attest, these improvements will provide significant congestion and air quality relief to one of the region's worst chokepoints.

The TPB's February 18th decision to remove these projects was a major setback for responsible regional planning. It should be reversed at the TPB's March 18th meeting.

Restore I-66 Improvements Now!

I strongly urge the Transportation Planning Board to restore I-66 westbound Spot Improvements to the 2009 Constrained Long Range Plan and FY 2010-2015 Transportation Improvement Program for air quality conformity testing.

Numerous VDOT and private sector studies show, and the more than 70,000 motorists using I-66 westbound daily can attest, these improvements will provide significant congestion and air quality relief to one of the region's worst chokepoints.

The TPB's February 18th decision to remove these projects was a major setback for responsible regional planning. It should be reversed at the TPB's March 18th meeting.

Restore I-66 Improvements Now!

I strongly urge the Transportation Planning Board to restore I-66 westbound Spot Improvements to the 2009 Constrained Long Range Plan and FY 2010-2015 Transportation Improvement Program for air quality conformity testing.

Numerous VDOT and private sector studies show, and the more than 70,000 motorists using I-66 westbound daily can attest, these improvements will provide significant congestion and air quality relief to one of the region's worst chokepoints.

The TPB's February 18th decision to remove these projects was a major setback for responsible regional planning. It should be reversed at the TPB's March 18th meeting.
