

## MEMORANDUM

**TO:** Commuter Connections Subcommittee  
**FROM:** Erin Morrow, TPB Staff  
**SUBJECT:** Local Jurisdictional Travel Demand Management Strategies for the 2016 Congestion Management Process (CMP) Technical Report  
**DATE:** March 15, 2016

---

TPB Staff are preparing the 2016 Congestion Management Process (CMP) Technical Report. The CMP Technical Report is updated every two years. In order to provide the most up-to-date information, TPB Staff are requesting that members of the Commuter Connections Subcommittee review the attached table "Ongoing Local Jurisdictional Demand Management Strategies" from the 2014 CMP Technical Report and provide any updated information regarding ongoing local jurisdictional travel demand management strategies. For your reference, the full 2014 CMP Technical Report can be located at the following URL and the attached table can be found on pages 130-145.

[http://www.mwcog.org/clrp/elements/cmp/files/2014CMPTechReport\\_Final%202014-06-27.pdf](http://www.mwcog.org/clrp/elements/cmp/files/2014CMPTechReport_Final%202014-06-27.pdf)

The purpose of this table in the CMP Technical Report is to document the demand management strategies that are being undertaken by various agencies in the region. Federal regulations require the long-range plan and CMP to include consideration and implementation of demand management strategies, along with other potential CMP strategies. Fortunately, the Washington region has a wealth of demand management strategies implemented for which we can take credit in the CMP Technical Report.

We appreciate the efforts of members of the Commuter Connections Subcommittee to review the attached table. Please provide any changes or deletions to the listed strategies or additions of new strategies **by April 12, 2016**. Please send suggested changes to Erin Morrow ([emorrow@mwcog.org](mailto:emorrow@mwcog.org)). Should you have any questions please feel free to e-mail me or contact me via phone (202-962-3793)
