VA-DMV Motor Carrier Operations

Wayne Davis
October 2, 2014

Overview

- **13 permanent stations (W.I.M.'s at 9 of them)**
- **12 full-time mobile crews**
- **3 permanent "turn-outs"**

Activity in FY 2013

17,961,609 trucks weighed

37, 851 weight violations

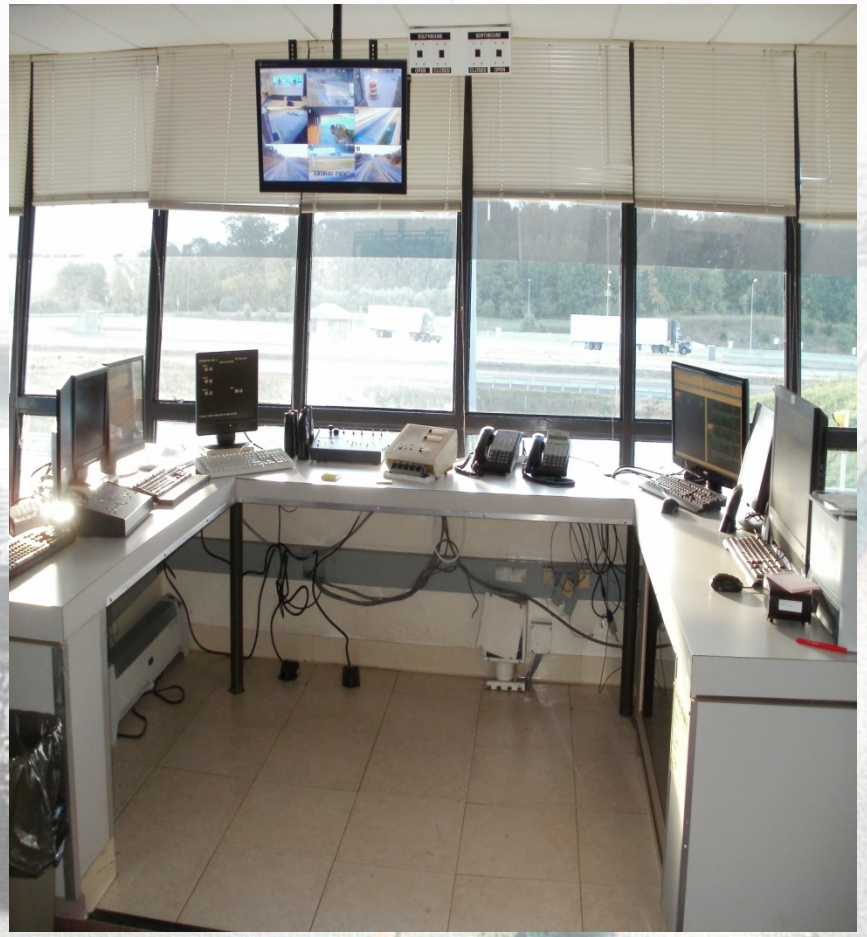
66,999 loads were allowed to shift

88,713 os/ow permits were issued

No longer a “weigh station”…

Technology used within:

- **Prepass** (W.I.M. & transponders)
- **Drivewyze**(sorts via mobile app. Used at all stations and permanent turn-outs)
- **License Plate Readers** (C-VIEW-provides 360 degree view of carrier. 8 permanents and 2 mobiles)



IRIS Technology

Camera uses kinetic energy to capture friction

Successfully locates:

- **Brakes that are inoperable, or out of adjustment**
- **Leaky exhaust systems**
- **Bad tires**
- **Axles that have just been dropped**

Mobile operations

All mobile units have:

- Internet access which allows citations to be electronically submitted
- **Printers** (citations for driver, weight reports, etc)
- **Scanners**

Mobile units also have Bar Code Readers

- Will use them to scan drivers license and registration roadside

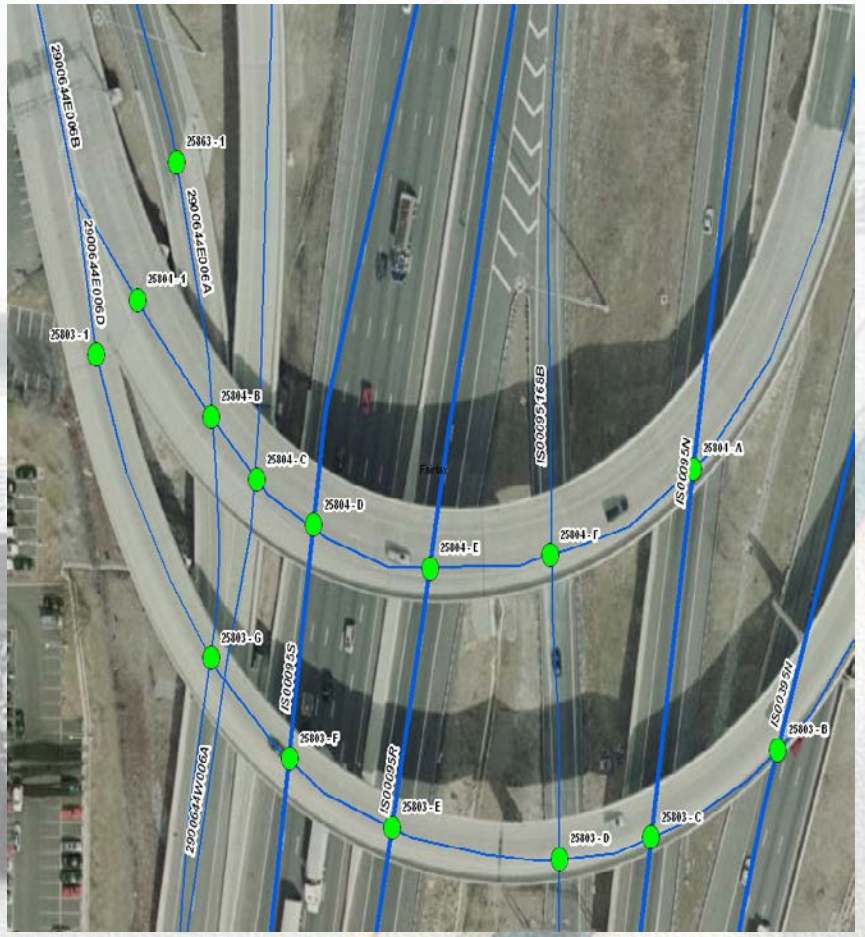
- We will also capture all truck weights and axle spacing

Nomad unit

- **Piezo strips are placed where deemed necessary for 2 weeks (8 portable WIM's)**
- Report generated which reflects type of trucks, weights, time of day, and speed.
- **Allows trucks to by-pass special checks**

OS/OW permitting

- **Auto issue capability since 2010**
- **Electronic permits are allowed in Virginia**
- **Enforcement can validate roadside**



Thank You!
