

ROUND 8.2 COOPERATIVE FORECASTING:

**Population and Household Forecasts to 2040
By Traffic Analysis Zone**

**Department of Community Planning and Services
Metropolitan Washington Council of Governments
2013**

ABSTRACT

TITLE: Round 8.2 Cooperative Forecasting: Population and Household Forecasts to 2040 by Traffic Analysis Zone

DATE: July 2013

AUTHOR: Gregory C. Goodwin and Abdurahman Mohammed
Department of Community Planning and Services and Department of Transportation Planning
Metropolitan Washington Council of Governments

AGENCY: The Metropolitan Washington Council of Governments is the regional organization of the Washington area's major local governments and their governing officials. COG works toward solutions to such regional problems as growth, transportation, inadequate housing, air pollution, water supply, water quality, economic development and noise, and serves as the regional planning organization for Metropolitan Washington.

SUBJECT: Forecasts of population, households, and employment were developed through a cooperative process involving the Council of Governments, its member jurisdictions, the Baltimore region, the states and other planning agencies. This report consists of tables of data on existing and forecast population and households for small geographic areas (Traffic Analysis Zones or 'TAZs') in the Washington Region. Maps showing the location of each TAZ are needed to interpret the forecasts.

PUBLICATION NUMBER: 20138465

REPORT PRICE: \$50.00

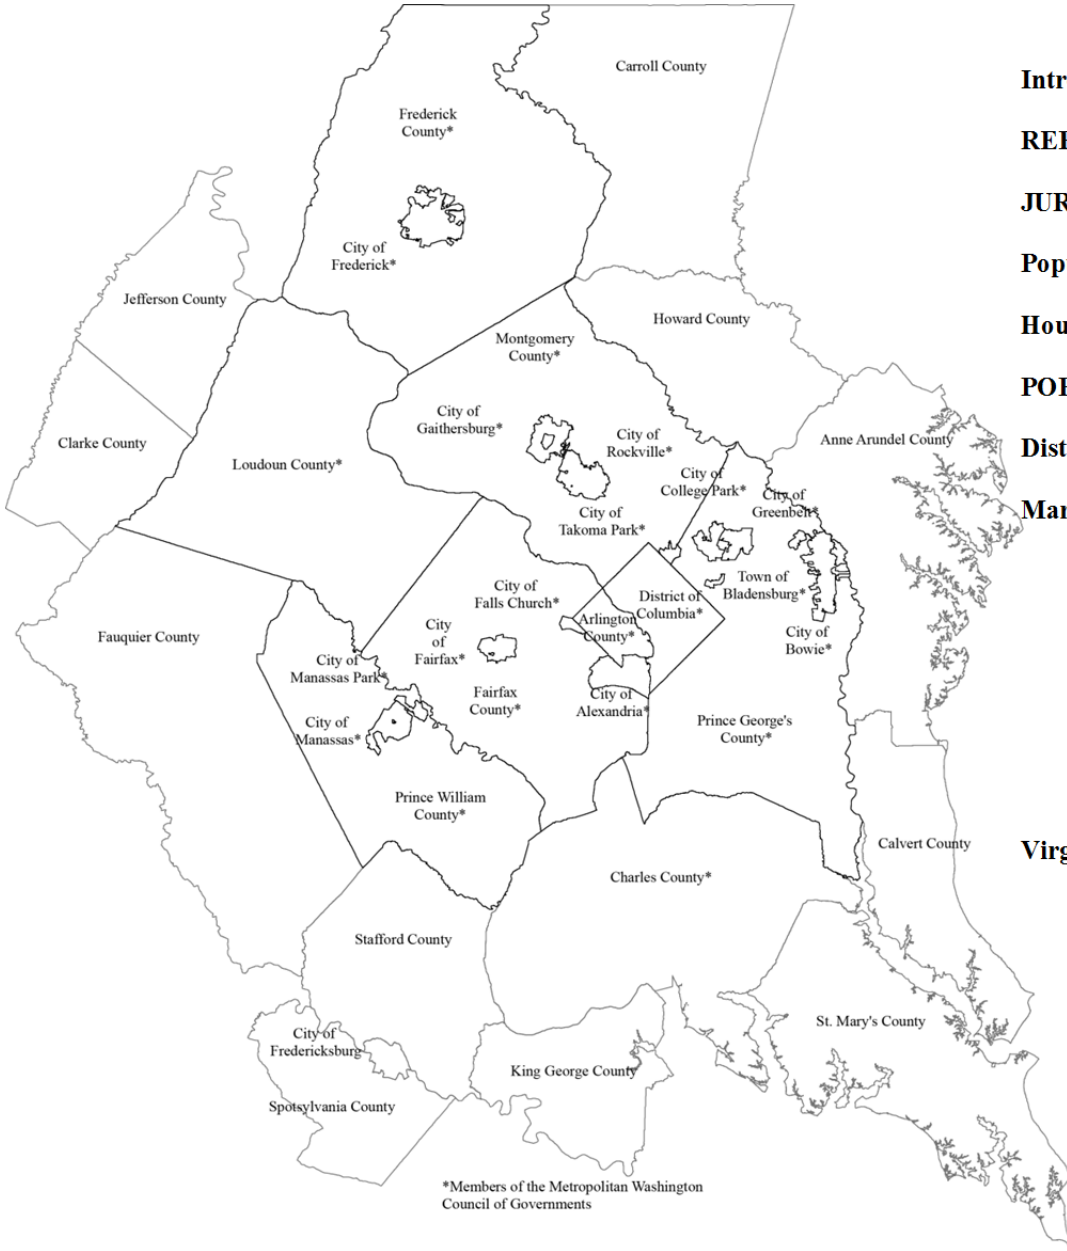

ORDER COPIES FROM: Metropolitan Washington Council of Governments

INTRODUCTION

The Cooperative Forecasting program is a joint effort by the Metropolitan Washington Council of Governments (COG), Federal and local governments of the region to produce a consistent set of long-range economic and demographic forecasts for use in metropolitan and local planning programs. The process provides common assumptions about future growth and development in the region and results in forecasts of employment, households and population by five-year increments for the entire COG region, individual member jurisdictions, and small-area traffic zones within each jurisdiction. The Cooperative Forecasting program was established in 1975 as part of the Metropolitan Growth Policy Program to provide forecasts on which to base functional plans in the areas of transportation, water resources, air quality, housing, land use, and energy. The fourth set of forecasts from the eighth series or “round” of Cooperative Forecasts presented in these data tables was approved by COG’s Board of Directors on July 10, 2013. Round 8.2 is the fourth series of cooperative forecasts prepared for the new “3722 Zone” or “Expanded Cordon” TPB zone system.

Methodology

Both a regional “top-down” and local “bottom-up” approach are employed in the forecasting process. A regional model based upon local and national economic and demographic factors is used to prepare projections for the metropolitan area as a whole. Local projections based on master plans and “pipeline” development are prepared independently by each local jurisdiction. Local government planners, economists, and demographers, working through COG’s Cooperative Forecasting and Data Subcommittee, then reconcile the two sets of projections. Once completed, the forecasts are approved by the COG Board of Directors, which is composed of local elected officials from throughout the region.

Population, households and at-place (place of work) employment data cover the District of Columbia; Anne Arundel, Calvert, Carroll, Charles, Frederick, Howard, Montgomery, Prince George’s, and St. Mary’s counties in Maryland; the cities of Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park, and Arlington, Clarke, Fairfax, Fauquier, King George, Loudoun, Prince William, Spotsylvania (northern portion), and Stafford counties in Virginia; and Jefferson County in West Virginia.

Data is presented in five-year increments: Population and Households- 2010 (Census) base year information and forecasts for 2015 through 2040. Used for both short- and long- range planning, these data are the only official planning forecasts accepted by those who make government policy decisions for the region.

Definition of Terms

Jurisdiction: Although jurisdiction is the territory controlled by a unit of government, state governments define their jurisdictions differently. COG's Metropolitan Washington region is composed of the single jurisdictions of the District of Columbia and jurisdictions in the State of Maryland and the Commonwealth of Virginia. The Virginia jurisdictions are composed of both counties and "independent cities" separate of any county, while in Maryland, jurisdictions are counties that contain both cities and towns.

Traffic Analysis District (TAD) and Traffic Analysis Zone (TAZ): The borders of TADs and TAZs are formed by jurisdictional boundaries, major highways, and barriers to travel such as rivers. Traffic Analysis Districts (TAD), 333 region wide, are used for small-area analysis. When these districts are further segmented, 3,675 Traffic Analysis Zones (TAZ) are formed. Due to the Takoma Park Boundary jurisdiction change to Montgomery County some adjustments were made to the TAD boundaries to accommodate these changes.

Acres: A new field was added to the Round 6.2 report – Acres. The total "gross" area of the TAZ (Acres) was determined by dividing the square footage of the TAZ (shape polygon) by 43,560. The density of the TAZ can be determined by dividing the TAZ forecast data by the number of acres.

Use of Data Tables

Two sets of data tables are available: population and households, or employment forecasts for the COG/TPB Model Region, presented in 3,675 small-area analysis zones.

Accompanying each set of data tables are regional maps. Maps show all roads and number Traffic Analysis Zones and Traffic Analysis Districts. Boldly outlined areas indicate Traffic Analysis Districts, while the lightly-lined areas show all the small area zones (TAZs) contained in each district. Locate the area you want to analyze and record all TAZs and TADs in that area. Next, in your data tables, find those specific map numbers by looking under the "TAD" column for districts or "TAZ" column for zones.
