BuroHappold Engineering

2030 Regional Climate and Energy Action Plan

The Metro Washington **2030 Regional Climate and Energy Action Plan** will be developed by CEEPC with support from GCoM and IUC, and technical assistance from BuroHappold Engineering.

What will the 2030 Action Plan include?

The **2030 Regional Climate and Energy Action Plan** will build from previous initiatives and incorporate:

- Regional GHG inventory and “business as usual” (BAU) projections.
- GHG emissions mitigation targets and low-carbon scenarios for 2030.
- Regional climate risk and vulnerability assessment.
- Climate mitigation and adaptation actions for 2021-2025 and 2026-2030.

2030 Action Plan Development Timeline	2019				2020									
	9	10	11	12	1	2	3	4	5	6	7	8	9	10
Regional GHG Inventory and BAU Projections			W											
Mitigation Targets and Low-Carbon Scenarios			W				W							
Regional Climate Risk and Vulnerability Assessment			W				W							
Climate Mitigation and Adaptation Actions							W							

W = Workshops

The GCoM Common Reporting Framework

The **Common Reporting Framework (CRF)** was developed to align city and regional climate action with global best practices, and provide a standardized platform for reporting and tracking progress.

The CRF provides guidance for climate action planning

The CRF includes **measurement** and **reporting procedures** for:

- GHG Inventory
- GHG Reduction Targets
- Climate Risk and Vulnerability Assessment (CRVA)
- Sustainable Energy Access Planning
- Subsequent Progress Reports

GCoM Pledge Commitments	Reduce/Limit GHG Emissions	Prepare for Climate Change Impacts	Increase Access to Sustainable Energy	Track Progress
CRF Reporting Elements	GHG Inventory			
	GHG Reduction Targets			
		CRVA		
	Climate Action Plan			Progress Report

CRF Reporting Timeline	Year 0	Year 1	Year 2	Year 3	Year 4	Year 5
GHG Inventory	Within 2 Years				Every 2-4 Years*	
GHG Reduction Targets	Within 2 Years					
CRVA	Within 2 Years					
Climate Action Plan	Within 3 Years					
Progress Report					Every 2 Years	

* Guidance for North America to be determined.

***Metro Washington
already meets most
requirements.***

The **2015 GHG Inventory** meets best practices for emissions accounting.

The **CEEPC Action Plan** establishes ambitious targets for climate mitigation.

Previous **climate adaptation planning** initiatives have identified key hazards and risks facing the region.

The 2030 Action Plan will consolidate this work and develop mitigation and adaptation actions with CRF guidance.
