777 North Capitol Street, N.E., Suite 300, Washington, D.C. 20002-4290 (202) 962-3310 Fax: (202) 962-3202

### **MEMORANDUM**

**October 26, 2012**

**To:** **Transportation Planning Board**

**From:** **Jane Posey**  
**Senior Transportation Engineer**

**Subject: Air Quality Conformity Update for the 2012 Constrained Long Range Plan (CLRP)  
and the FY2013-2018 Transportation Improvement Program (TIP)**

### **BACKGROUND**

EPA's final rule designating nonattainment areas for the 2008 ozone national ambient air quality standards (NAAQS) was published in the *Federal Register* on May 21, 2012 and was effective July 20, 2012. The Washington, DC-MD-VA region has been designated as a marginal non-attainment area. The attainment date for the 2008 ozone NAAQS for marginal non-attainment areas is December 31, 2015. All non-attainment areas must make a conformity determination within one year of the effective date of the initial non-attainment designation.

The current long range plan for the region is the 2012 CLRP. The Transportation Planning Board (TPB) approved a conformity analysis of the 2012 CLRP in July. Forecast years included: 2007, 2017, 2020, 2030, and 2040. Since there are no input changes to that analysis, it is not necessary to rerun all of the forecast years for the conformity determination required for the 2008 ozone NAAQS. However there is a requirement to complete an analysis of the 2015 attainment year. This report includes the data for all forecast years, including 2015, and represents a complete conformity analysis update of the 2012 CLRP.

### **INTRODUCTION**

This memo documents summary results of the updated air quality conformity assessment of the 2012 CLRP and FY2013-2018 TIP with respect to the following pollutants:

- **Ozone Season Volatile Organic Compounds (VOC) and Nitrogen Oxides (NOx).** In May, 2007 the Metropolitan Washington Air Quality Committee (MWAQC) adopted the 8-hour Ozone State Implementation Plan (SIP) which included Mobile Budgets. On September 4, 2009, EPA found adequate the 2008 Reasonable Further Progress (RFP) budgets from that SIP. Once a SIP with budgets has been submitted and EPA finds those budgets adequate or approves the SIP, the budgets must be used for all conformity analysis until new budgets are approved, even if new NAAQS are set. The RFP budget for VOC is 70.8 tons/day, and for NOx is 159.8 tons/day.

- **Fine Particles (PM<sub>2.5</sub>).** In 2008 MWAQC approved a SIP to achieve the 1997 National Ambient Air Quality Standards (NAAQS) for PM<sub>2.5</sub> that included mobile budgets. EPA never approved those budgets. On January 12, 2009, EPA determined that the region had attained the 1997 PM<sub>2.5</sub> NAAQS and issued a clean data determination for the area. In early 2012 Virginia, Maryland, and the District of Columbia withdrew the SIP updates, including the mobile budgets. The withdrawal letters are included as Attachment A. In the absence of approved mobile budgets, EPA allows for an assessment that shows emissions in forecast year scenarios are no greater than those in a 2002 base. This criterion was established and applied, with the concurrence of MWAQC, in prior PM<sub>2.5</sub> conformity assessments.
- **Wintertime Carbon Monoxide (CO).** The region is in maintenance for mobile source wintertime CO, and is required to show that pollutants do not exceed the approved budget of 1671.5 tons/day.

The analysis shows that mobile emissions are well within the mobile budgets for ozone season VOC and NOx, as well as wintertime CO, and are well below the 2002 base year levels for the PM2.5 pollutants.

The results, based upon analyses contained in the technical report, Air Quality Conformity Update Of The 2012 Constrained Long Range Plan and FY2012-2018 Transportation Improvement Program For The Washington Metropolitan Region, will be released for public comment and interagency consultation on November 15, 2012. The public comment period will end on December 15, 2012.

## **TECHNICAL INPUTS**

The Transportation Planning Board (TPB) approved the scope of work for the update to the conformity analysis of the 2012 CLRP and FY2013-2018 TIP on October 17, 2012. It approved the project submissions for this analysis on February 15, 2012.

Key technical inputs to the analysis include:

- Round 8.1 Cooperative Land Activity Forecasts
- The Version 2.3 Travel Demand Model including a 3722 Transportation Analysis Zones (TAZ) area system and updated transit service
- 2012 CLRP and FY2013-2018 TIP Project Submissions
- 2011 Vehicle Registration Data
- EPA's Mobile6.2 Emissions Factor Model.

## **WORK ACTIVITIES**

Staff prepared inventories for each pollutant for six forecast years (2007, 2015, 2017, 2020, 2030 and 2040). Ozone season pollutants (VOC and NOx) and wintertime CO are inventoried for average weekday conditions, and precursor NOx and direct PM<sub>2.5</sub> are inventoried to reflect emissions on a yearly total basis. Staff applied seasonal adjustment factors to convert daily travel (annual average weekday traffic or AAWDT) to annual values.

These inventories address a primary conformity assessment criterion to demonstrate that emissions associated with the plan do not exceed the approved budgets.

## **Land Activity Forecasts**

The COG Board approved the draft Round 8.1 Cooperative Forecasts for use in the air quality conformity analysis of the 2012 CLRP and FY2013-2018 TIP in February, 2012. The forecasts reflect both the small area land use distributions throughout the Washington region, and also the latest planning assumptions for areas that are outside the Washington region. Attachment B shows a summary of the Round 8.1 data.

## **Travel Modeling Process**

Staff prepared travel demand forecasts for each of the analysis years using the Version 2.3 travel demand model. Exhibit 1 presents the geographic areas for travel modeling and for emissions reporting for each pollutant. Exhibit 2 presents the resulting average weekday transit trips, vehicle trips, and vehicle miles traveled (VMT) results through time for each conformity analysis year, for the full modeled area.

## **Emissions Factors**

Staff developed emissions factors using EPA's MOBILE6.2 emissions model. This year's rates include 2011 VIN data. Emissions rates for each pollutant – shown illustratively for Fairfax County in Exhibits 3 and 4 -- were developed following execution of the model in one mph speed increments, by jurisdiction, for each analysis year. The chart shows significantly reduced rates through time, primarily due to the impacts of having cleaner fuel and vehicles in the fleet. Exhibit 5 presents direct PM<sub>2.5</sub> emissions rates through time for each of the three seasons; data are arrayed in a bar chart since these emissions rates do not vary by vehicle speed.

## **Mobile Emissions Inventories**

### *Ozone Season and Wintertime CO – Daily Emissions*

The average annual weekday travel forecasts (AAWDT) generated by the travel demand model were adjusted, using a 1.03 ozone season factor or a 0.96 winter season factor, to develop seasonally appropriate VMT estimates. Staff then applied the appropriate Mobile6.2 emissions factors to the travel demand forecasts to prepare mobile source emissions inventories for each forecast year. These emissions results for ozone season pollutants are summarized in Exhibits 6 and 7 and indicate total VOC and NOx emissions for each analysis year. The charts show dramatic reductions throughout the period. Historical emissions reductions from the Clean Air Act amendments 1990 base have been well documented in the past. 2040 VOC and NOx emissions represent about 14 percent and 9 percent, respectively, of their 1990 levels. The results reflect the impact of the cleaner fuel / fleet and related programs.

### *PM<sub>2.5</sub> – Yearly Emissions*

To develop the yearly total PM<sub>2.5</sub> emissions, travel and emissions were estimated by applying (three) seasonal factors to the primary travel data, followed by applying emissions rates for each of the seasons, and summarizing to obtain yearly totals. Direct PM<sub>2.5</sub> and precursor NOx emissions are shown in Exhibits 8 and 9. The emissions reductions through time are largely attributable to Tier II vehicle standards, cleaner fuels, and the heavy duty engine rule.

### *2012 CLRP Emissions Inventories vs. Budgets*

Exhibits 6-9 display net emissions for each forecast year. The charts show that emissions are within the mobile budgets for ozone season pollutants, and are not greater than 2002 levels for fine particles pollutants, for all forecast years. Wintertime CO emissions (contained in a full technical report but not summarized here) are also within the CO emissions budget.

### **Net Emissions Analysis**

The emissions inventory data contained in Exhibits 6-9 reflect total mobile source network and off-network emissions. However, there are also emissions benefits associated with certain other transportation programs and projects. These benefits, estimated on an off-line basis, are also creditable in conformity analyses. Attachment C represents a summary table of these transportation emissions reduction measures, or TERMS, which have been previously planned or programmed by the TPB. They are arrayed in a ‘Tracking Sheet’ format to document the implementation status of each, with part A of the table documenting ozone season and part B documenting PM<sub>2.5</sub> pollutants. The result of these measures, shown as the bottom line for each section of the table, amounts to additional reductions available for each of the pollutants. The benefits of these projects are not included at this time in the conformity analysis summary tables, but are available, if needed, to offset future emissions. Combining the emissions results in Exhibits 6-9 with the additional reductions from TERMS would further improve the emissions margins for each pollutant.

### **COMMENTS / RESPONSE TO COMMENTS**

None at this time.

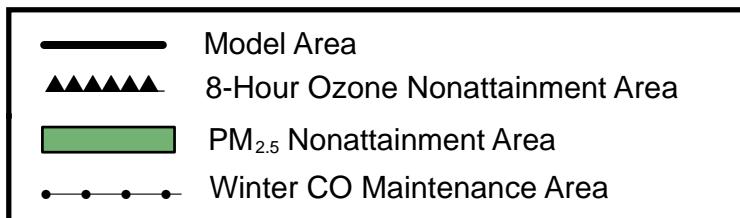

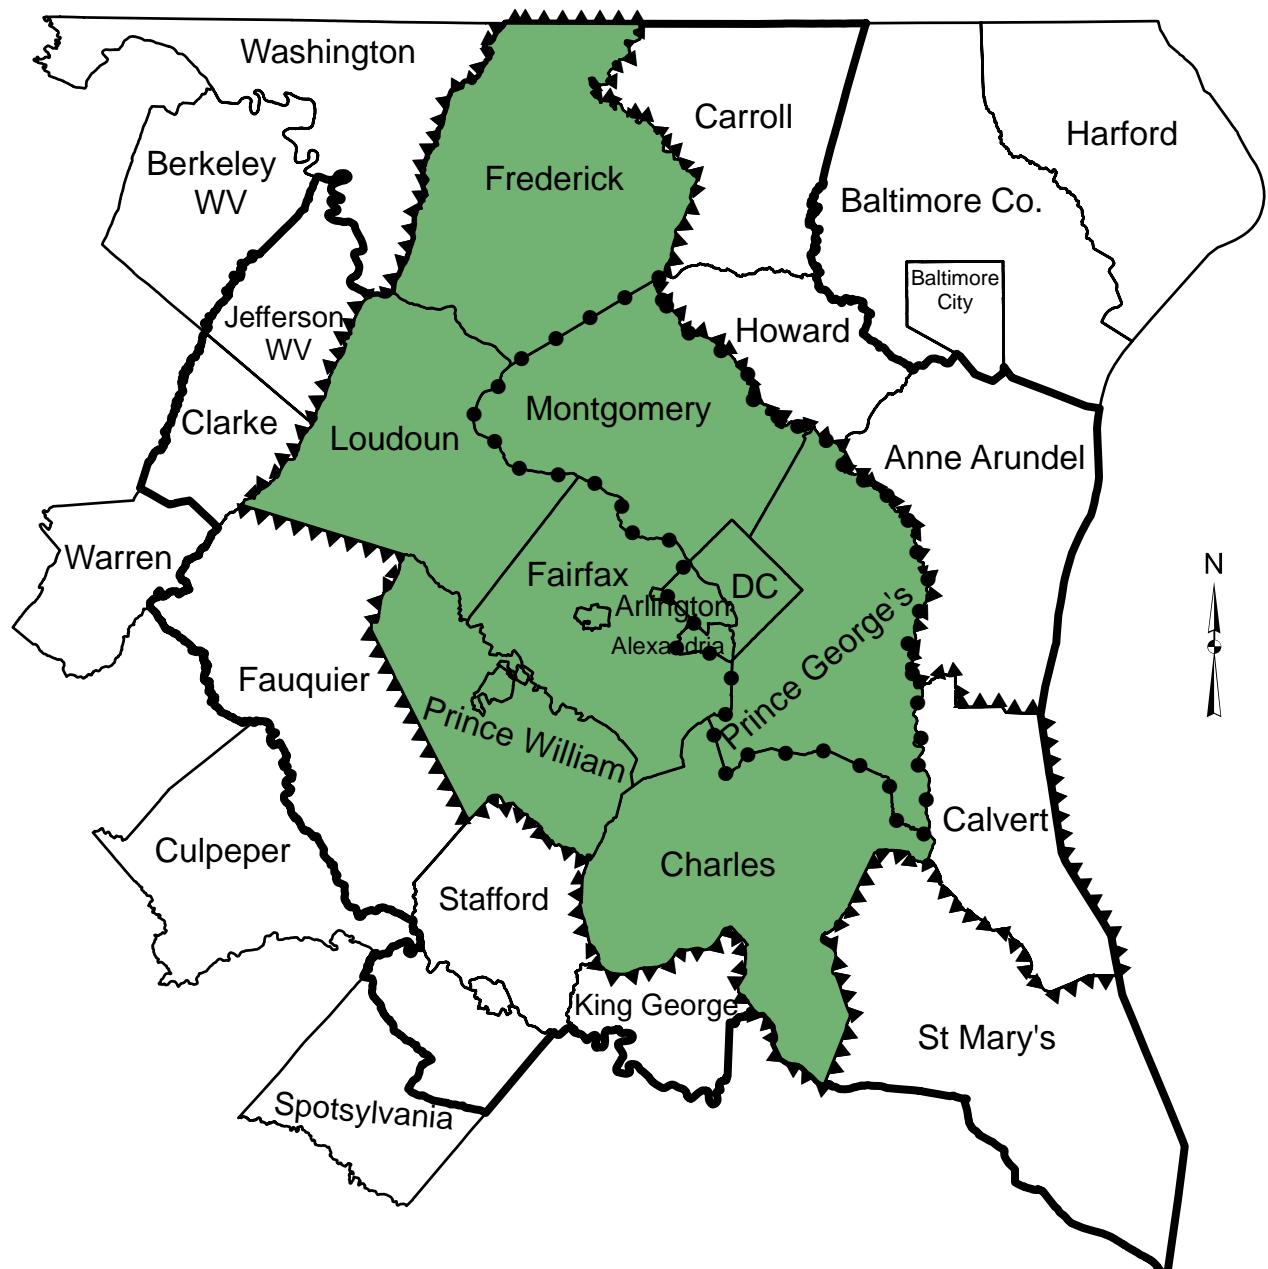

### **SUMMARY**

The analytical results described in this air quality assessment provide a basis for a determination by the TPB of conformity of the 2012 CLRP and FY2013-2018 TIP.

1650 Arch Street  
Philadelphia, Pennsylvania 19103-2029

Reference: Withdrawal of the  
Virginia Portion of 1997 PM<sub>2.5</sub>  
NAAQS Attainment SIP Revision  
for the Washington DC-MD-VA  
Nonattainment Area

Dear Ms. Esher:

On April 4, 2008, Virginia officially requested approval of a revision to the Commonwealth of Virginia State Implementation Plan (SIP). The revision demonstrated the improvements made to the air quality in the Washington DC-MD-VA Nonattainment Area and the efforts taken to achieve the 1997 national ambient air quality standards (NAAQS) for PM<sub>2.5</sub> by 2009. This SIP revision for the Washington DC-MD-VA area included (i) the attainment plan, (ii) analysis of reasonably available control measures, (iii) attainment demonstration, (iv) contingency plans for failure to attain the air quality standard, (v) mobile source budgets, and (vi) the base year 2002 air pollutant emissions inventory.

Air quality has significantly improved in the Washington DC-MD-VA area. On January 12, 2009 (74 FR 1146), EPA determined that the area had attained the NAAQS and issued a clean data determination for the area. This determination suspended the requirements for the Commonwealth to submit attainment demonstrations and associated reasonably available control measures, reasonable further progress plans, contingency measures, and other planning SIPs related to attainment of the NAAQS in the area. The purpose of this letter is to withdraw these portions of the April 4, 2008 submittal. Specifically, the Commonwealth hereby withdraws the (i) attainment plan, (ii) analysis of reasonably available control measures, (iii) attainment

Ms. Diana Esher

Page 2

demonstration, (iv) contingency plans for failure to attain the air quality standard, and (v) mobile source budgets, all of which were submitted on April 4, 2008. To ensure that Virginia has met the requirements of § 172(c)(3) regarding inventory submittals, the Commonwealth is not requesting the withdrawal of the base year 2002 air pollutant emissions inventory, which comprised Chapter 3 and Appendix B of the April 4, 2008 document.

As a related matter, Virginia, in cooperation with the District of Columbia, Maryland, and the Metropolitan Washington Council of Governments, is developing a redesignation request and maintenance plan for the Washington DC-MD-VA area with respect to the 1997 PM<sub>2.5</sub> NAAQS. This request and plan, which will contain mobile vehicle emissions budgets developed using MOVES2010, is expected to be ready for final submittal to EPA in 2012.

If you have any questions or need additional information, please let us know.

Sincerely,

David K. Paylor

Feb 29 2012

Mr. Shawn M. Garvin  
Regional Administrator  
U.S. Environmental Protection Agency, Region III  
1650 Arch Street (3RA00)  
Philadelphia, PA 19103-2029

Dear Mr. Garvin:

On April 3, 2008, Maryland officially requested EPA approval of the following state implementation plan (SIP) revision:

### **Maryland State Implementation Plan (SIP) for Fine Particle (PM<sub>2.5</sub>) Standard and 2002 Base Year Inventory for the Washington DC-MD-VA Nonattainment Area**

The plan revision demonstrated the improvements made to the air quality in the Washington DC-MD-VA Nonattainment Area (“the Area”) and the efforts taken to achieve the 1997 national ambient air quality standard (NAAQS) for PM<sub>2.5</sub> by 2009. This SIP revision for the Washington DC-MD-VA area included: (i) the attainment plan; (ii) an analysis of reasonably available control measures; (iii) an attainment demonstration; (iv) contingency plans for failure to attain the air quality standard; (v) mobile source budgets; and (vi) the base year 2002 air pollutant emissions inventory.

Air quality has significantly improved in the Washington DC-MD-VA area. On January 12, 2009 (74 FR 1146), EPA determined that the Area had attained the NAAQS and issued a clean data determination for the Area. This determination suspended the requirements for Maryland to submit attainment demonstrations and associated reasonably available control measures, reasonable further progress plans, contingency measures, and other planning SIPs related to attainment of the NAAQS in the Area. The purpose of this letter is to withdraw these portions of the April 3, 2008 submittal.

Specifically, the State of Maryland hereby withdraws: (i) the attainment plan; (ii) the analysis of reasonably available control measures; (iii) the attainment demonstration; (iv) the contingency plans for failure to attain the air quality standard; and (v) the mobile source budgets, all of which were submitted on April 3, 2008. To ensure that Maryland has met the requirements of Section 172(c)(3) of the Clean Air Act regarding inventory submittals, the State is not requesting the withdrawal of the base year 2002 air pollutant emissions inventory, which comprises Chapter 3 and Appendix B of the original April 3, 2008 SIP submission.

On a related matter, Maryland, in cooperation with the District of Columbia, Virginia, and the Metropolitan Washington Council of Governments, is developing a redesignation request and maintenance plan for the Washington DC-MD-VA area with respect to the 1997 PM<sub>2.5</sub> NAAQS. This request and plan, which will contain mobile vehicle emissions budgets developed using MOVES2010, is expected to be ready for final submittal to EPA in 2012.

If you have any questions regarding these matters or require additional information, please contact Mr. George (Tad) S. Aburn, Jr., Director of the Air and Radiation Management Administration at 410-537-3255, or by email, at [gaburn@mde.state.md.us](mailto:gaburn@mde.state.md.us).

Sincerely,

Secretary

1650 Arch Street  
Philadelphia, Pennsylvania 19103-2029

Subject: Withdrawal of the District of Columbia Portion of 1997 PM<sub>2.5</sub> NAAQS  
Attainment SIP Revision for the Washington DC-MD-VA Nonattainment Area

Dear Mr. Garvin:

*Shawn —*

On April 2, 2008, the District of Columbia submitted a revision to its State Implementation Plan (SIP) for attaining the 1997 national ambient air quality standards (NAAQS) for PM<sub>2.5</sub> and requested U.S. Environmental Protection Agency's (EPA) approval. The revision demonstrated the anticipated improvements to the air quality in the Washington DC-MD-VA Nonattainment Area and the efforts being taken to achieve the 1997 PM<sub>2.5</sub> NAAQS by 2009. The April 2, 2008, SIP revision for the Washington DC-MD-VA area included (i) the attainment plan, (ii) analysis of reasonably available control measures, (iii) attainment demonstration, (iv) contingency plans for failure to attain the air quality standard, (v) mobile source budgets, and (vi) the base year 2002 air pollutant emissions inventory.

Air quality has significantly improved in the Washington DC-MD-VA area. On January 12, 2009, EPA issued a clean data determination for the area (74 FR 1146). The clean data determination suspended the requirements for the District of Columbia to submit attainment demonstrations and associated reasonably available control measures, reasonable further progress plans, contingency measures, and other SIPs related to attainment of the 1997 PM<sub>2.5</sub> NAAQS in the area. The purpose of this letter is to withdraw those portions of the April 2, 2008, submittal. Specifically, the District of Columbia hereby withdraws the (i) attainment plan, (ii) analysis of reasonably available control measures, (iii) attainment demonstration, (iv) contingency plans for failure to attain the air quality standard, and (v) mobile source budgets, all of which were submitted on April 2, 2008. To ensure that the District of Columbia has met the requirements of § 172(c)(3) of the Clean Air Act regarding emissions inventory submittals, the District of Columbia is not requesting the withdrawal of the base year 2002 air pollutant emissions inventory, which comprised Chapter 3 and Appendix B of the SIP revision documents submitted on April 2, 2008.

As a related matter, the District of Columbia, in partnership with Virginia, Maryland, and the Metropolitan Washington Air Quality Committee, is developing a redesignation request and a maintenance plan for the Washington DC-MD-VA area with respect to the 1997 PM<sub>2.5</sub> NAAQS. This request and plan, which will contain mobile vehicle emissions budgets developed using MOVES2010, is expected to be ready for final submittal to EPA in 2012.

Should you have any questions or require additional information, please contact me at (202) 535-2615, or Ms. Cecily Beall, Associate Director for the Air Quality Division, at (202) 535-2626.

Sincerely,

Christophe A.G. Tulou  
Director

DEFINITIONS: Project Numbers implemented fully prior to 2000 were removed from the TERM Tracking Sheet

CREDIT TAKEN ( X means emissions reduction credits taken):

TIP - Emissions credits are taken for projects being implemented, according to the progress reporting schedules provided by the implementing agencies (contained in Appendix J of Conformity Document). No credit has been taken for projects in which only some components of the measure have been implemented.

CLRP - Credit is taken for each of these elements of the CLRP according to the schedule provided by the implementing agency.

IMPLEMENTATION STATUS:

FULL = project is completed as planned at the time of analysis.

SCALED BACK = project is completed, but at a different level than assumed at the time of analysis (i.e., purchased 50 buses instead of 100)

UNDERWAY = project is not complete, but is close enough that credit may be taken (i.e., under construction, NOT just out for bid)

REMOVED = project no longer expected to be implemented or constructed

COMPLETION DATE:

PROJECTED = project completion date originally expected (i.e., at time of emissions analysis)

ACTUAL = actual year project was open for use, or expected to be open for use if under construction

REMOVED

projects Emissions credits are not counted in total available emissions credits

<sup>1</sup> Line items 218, 216, 179, 92 are all credited as part of M-92 Regional Telecommute Support TERM, line item # 75

<sup>2</sup> Line item 108 & 219 credits are taken only for year 2010

DEFINITIONS: Project Numbers implemented fully prior to 2000 were removed from the TERM Tracking Sheet

CREDIT TAKEN ( X means emissions reduction credits taken):

TIP - Emissions credits are taken for projects being implemented, according to the progress reporting schedules provided by the implementing agencies (contained in Appendix J of Conformity Document). No credit has been taken for projects in which only some components of the measure have been implemented.

CLRP - Credit is taken for each of these elements of the CLRP according to the schedule provided by the implementing agency.

IMPLEMENTATION STATUS:

FULL = project is completed as planned at the time of analysis.

SCALED BACK = project is completed, but at a different level than assumed at the time of analysis (i.e., purchased 50 buses instead of 100)

UNDERWAY = project is not complete, but is close enough that credit may be taken (i.e., under construction, NOT just out for bid)

REMOVED = project no longer expected to be implemented or constructed

COMPLETION DATE:

PROJECTED = project completion date originally expected (i.e., at time of emissions analysis)

ACTUAL = actual year project was open for use, or expected to be open for use if under construction

REMOVED

projects Emissions credits are not counted in total available emissions credits

1 Line items 218, 216, 179, 92 are all credited as part of M-92 Regional Telecommute Support TERM, line item # 75

2 Line item 108 & 219 credits are taken only for year 2010
