Key Economic Census Terms

- **NAICS** (North American Industry Classification System)
 - Our primary data dimension
- **Establishments** (vs. Companies, Firms, etc.)
 - Our collection/tabulation level
- **Employers** (vs. Nonemployers)
 - EC only covers employer businesses
- U.S. Code **Title 13 and 26**
 - Protects business privacy

Business.Census.Gov

The screenshot displays the Business.Census.Gov website interface. At the top, the United States Census Bureau logo is on the left, and navigation links for 'U.S. Department of Commerce', 'Blogs', 'Index A-Z', 'Glossary', and 'FAQs' are on the right. A search bar is positioned below these links. A main navigation bar contains five categories: 'Topics' (Population, Economy), 'Geography' (Maps, Geographic Data), 'Library' (Infographics, Publications), 'Data' (Tools, Developers), and 'Newsroom' (News, Events, Blogs). The 'Topics' category is circled in green. Below this bar, a featured article titled 'Motion Picture and Video Industry' is visible, accompanied by a bar chart showing industry receipts from 1954 to 2012. A 'Population Clock' widget shows the current U.S. population as 320,328,557 and the world population as 7,223,963,499. A 'Latest News' section highlights 'Declining Drive-Ins' and 'Motion Picture and Video Industry Receipts'. A large, semi-transparent overlay window is open over the 'Topics' menu, showing a list of sub-topics. 'Economy' is circled in red, and a sub-menu for 'Economy' is also visible, with 'Economic Census' circled in red. The 'Economic Census' sub-menu includes links for 'Classification Codes (i.e., NAICS)', 'Economic Indicators', 'Economic Studies', 'Industry Statistics Portal', and 'Other Economic Programs'. A small image of hands exchanging money is shown next to the 'Economy' section.

Advance Report

- National-level data at 2- and 3-digit NAICS
- Released on March 26th, 2014

FOR IMMEDIATE RELEASE: WEDNESDAY, MARCH 26, 2014

Mining, Quarrying, Oil and Gas Extraction Booming, According to First Results from the Census Bureau's 2012 Economic Census

From Utilities to Health Care to Manufacturing, Census Bureau Statistics Provide Look at U.S. Economy Since Recession

The mining, quarrying, and oil and gas extraction sector of the economy showed tremendous growth from 2007 to 2012 as the number of establishments rose by 26.4 percent, according to the *2012 Economic Census Advance Report* released today by the U.S. Census Bureau.

These results provide the first comprehensive look at the U.S. economy since the 2007 recession. The economic census is the most authoritative and comprehensive source of information about U.S. businesses from the national to the local level. It provides the foundation and benchmark for gross domestic product, monthly retail sales, as well as other indicators of economic performance.

"The economic census is one of the Commerce Department's most valuable data resources," U.S. Secretary of Commerce Penny Pritzker said. "By providing a close-up look at millions of U.S. companies in thousands of industries, the economic census is an important tool that informs policy at the local, state and national level, and helps businesses make critical decisions that drive economic growth and job creation. At the Department of Commerce, one of the top priorities of our 'Open for Business Agenda' is to make our data easier to access and understand so that it can continue enabling startups, moving markets, protecting life and property, and powering both small and large businesses across the country."

2012 Economic Census: Advance Report Snapshot

Selected Preliminary Findings

DID YOU KNOW?

The Health Care sector was not only the largest employer in the U.S. in 2012 (with nearly 18.6 million employees) but this sector also reported the highest annual payroll (\$804.4 billion). The Wholesale Trade sector reported the most sales (\$7.2 trillion), and the Retail Trade sector had the largest number of businesses (nearly 1.1 million establishments).

Difference in Sales, Shipments, Receipts, or Revenue for Selected Sectors: 2007 to 2012 (\$ Billion)

Components of Health Care Sector Total Employment Difference: 2002 to 2012

Employment Statistics in Top 5 Economic Census Sectors in the U.S.: 2012, 2007, & 2002

NAICS Code	NAICS Title	Number of Employees (sector ranking criteria)				Annual Payroll per Employee (\$)

The 2012 Economic Census provides a comprehensive view of the American economy for the first time since the 2007 Census. While the economic census occurs every five years, there is a multitude of other programs that provide limited economic data on a monthly, quarterly, annual, and five year basis. To help you arrive at the data you need we have created the following user guide:

Uses of Census Data

[Print](#) | [Share this page](#) | [Connect with us](#)

The Economic Census provides detailed statistics that are important for industries and communities. Trade associations, chambers of commerce, and businesses rely on this information for economic development, business decisions, and strategic planning. Browse the topics below for information on using these statistics, including sample case studies. Full statistical tables from the Economic Census can be found in [American FactFinder](#).

[See uses of the Economic Census](#)

Compare my business to others

Your Business	Industry Average 2007
2,526,478	3,911,027
132,973	165,495

Business owners and managers can compare the operating data for their business to totals and averages for their industry (such as sales per employee) from the national, state, and even local level to evaluate their current operations. Business owners and managers can also compare the data for their business to businesses in related industries and other industries in their local area.

[See Example >](#)

Compare my community to others

Local economic development organizations and chambers of commerce can compare statistics for the industries in their community to identify opportunities for growth. They can also compare statistics for the industries in their community to neighboring communities, their metro area and state, and to national totals to identify market share and trends.

[See Example >](#)

Identify business markets

Business owners and managers can analyze information for their customers at the local level to identify unsaturated or emerging/growing markets for their products and for opportunities for expansion.

[See Example >](#)

Use data in business plans and loan applications

Entrepreneurs can use statistics from the Economic Census for the industry that they are considering starting a business in or for related industries at the local level in their business plans. They can also use this information in loan applications to local business lenders and in government business development agencies to validate the potential market they are considering entering.
