

Dominion: Coal to Clean Energy Campaign

Overview

beyond Coal and the Virginia Chapter

blem

ution

stacle

r plan

now

systematically end the dominance of fossil fu

Establish strategic partnershi

Build a movemen

Explore. Enjoy. Protect.

**YOUR LOCAL
COAL-BURNING POWER PLANT
HAS A NEW FILTER.**

HIS NAME IS JAMES.

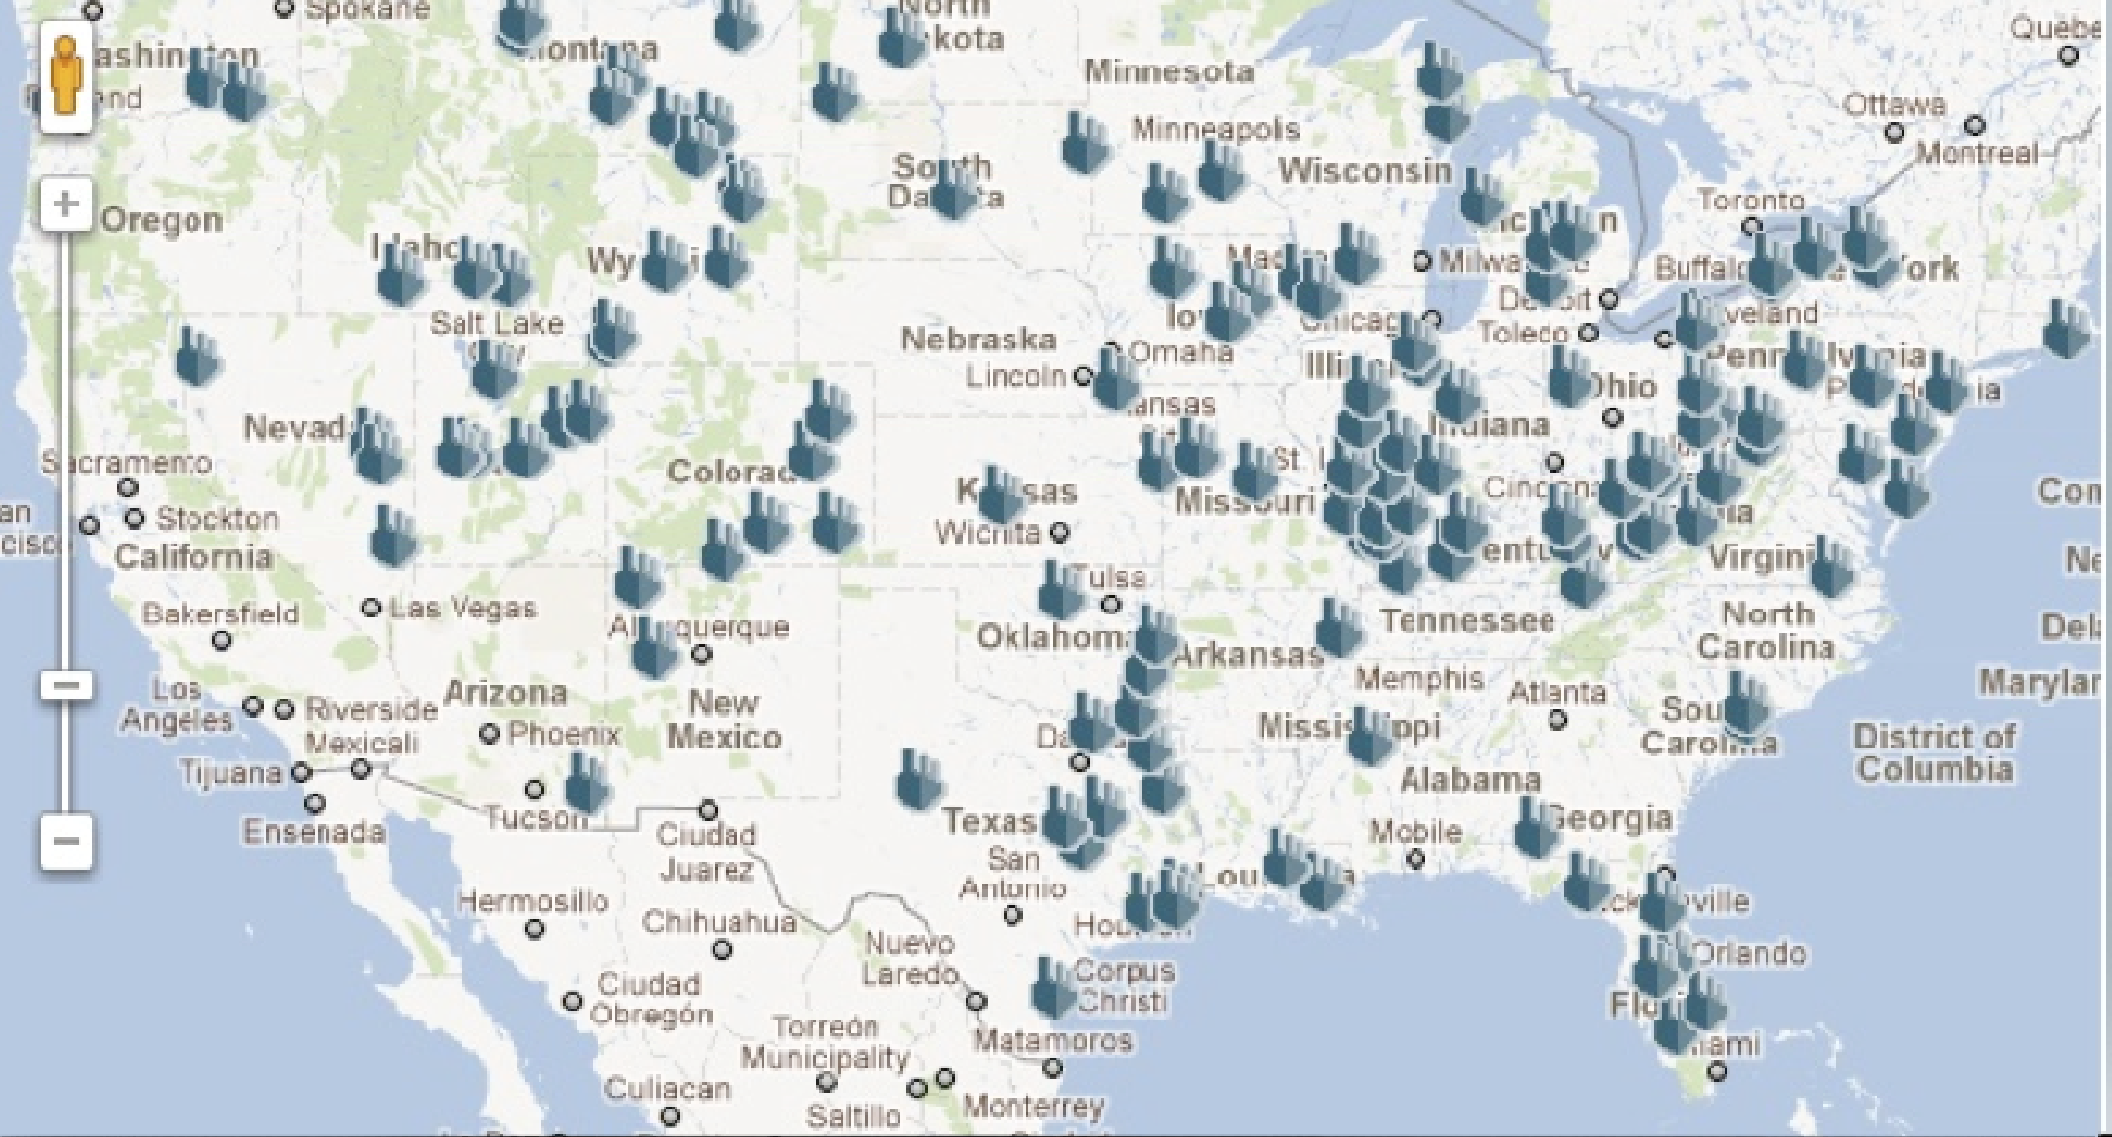

Coal is where the pollution is

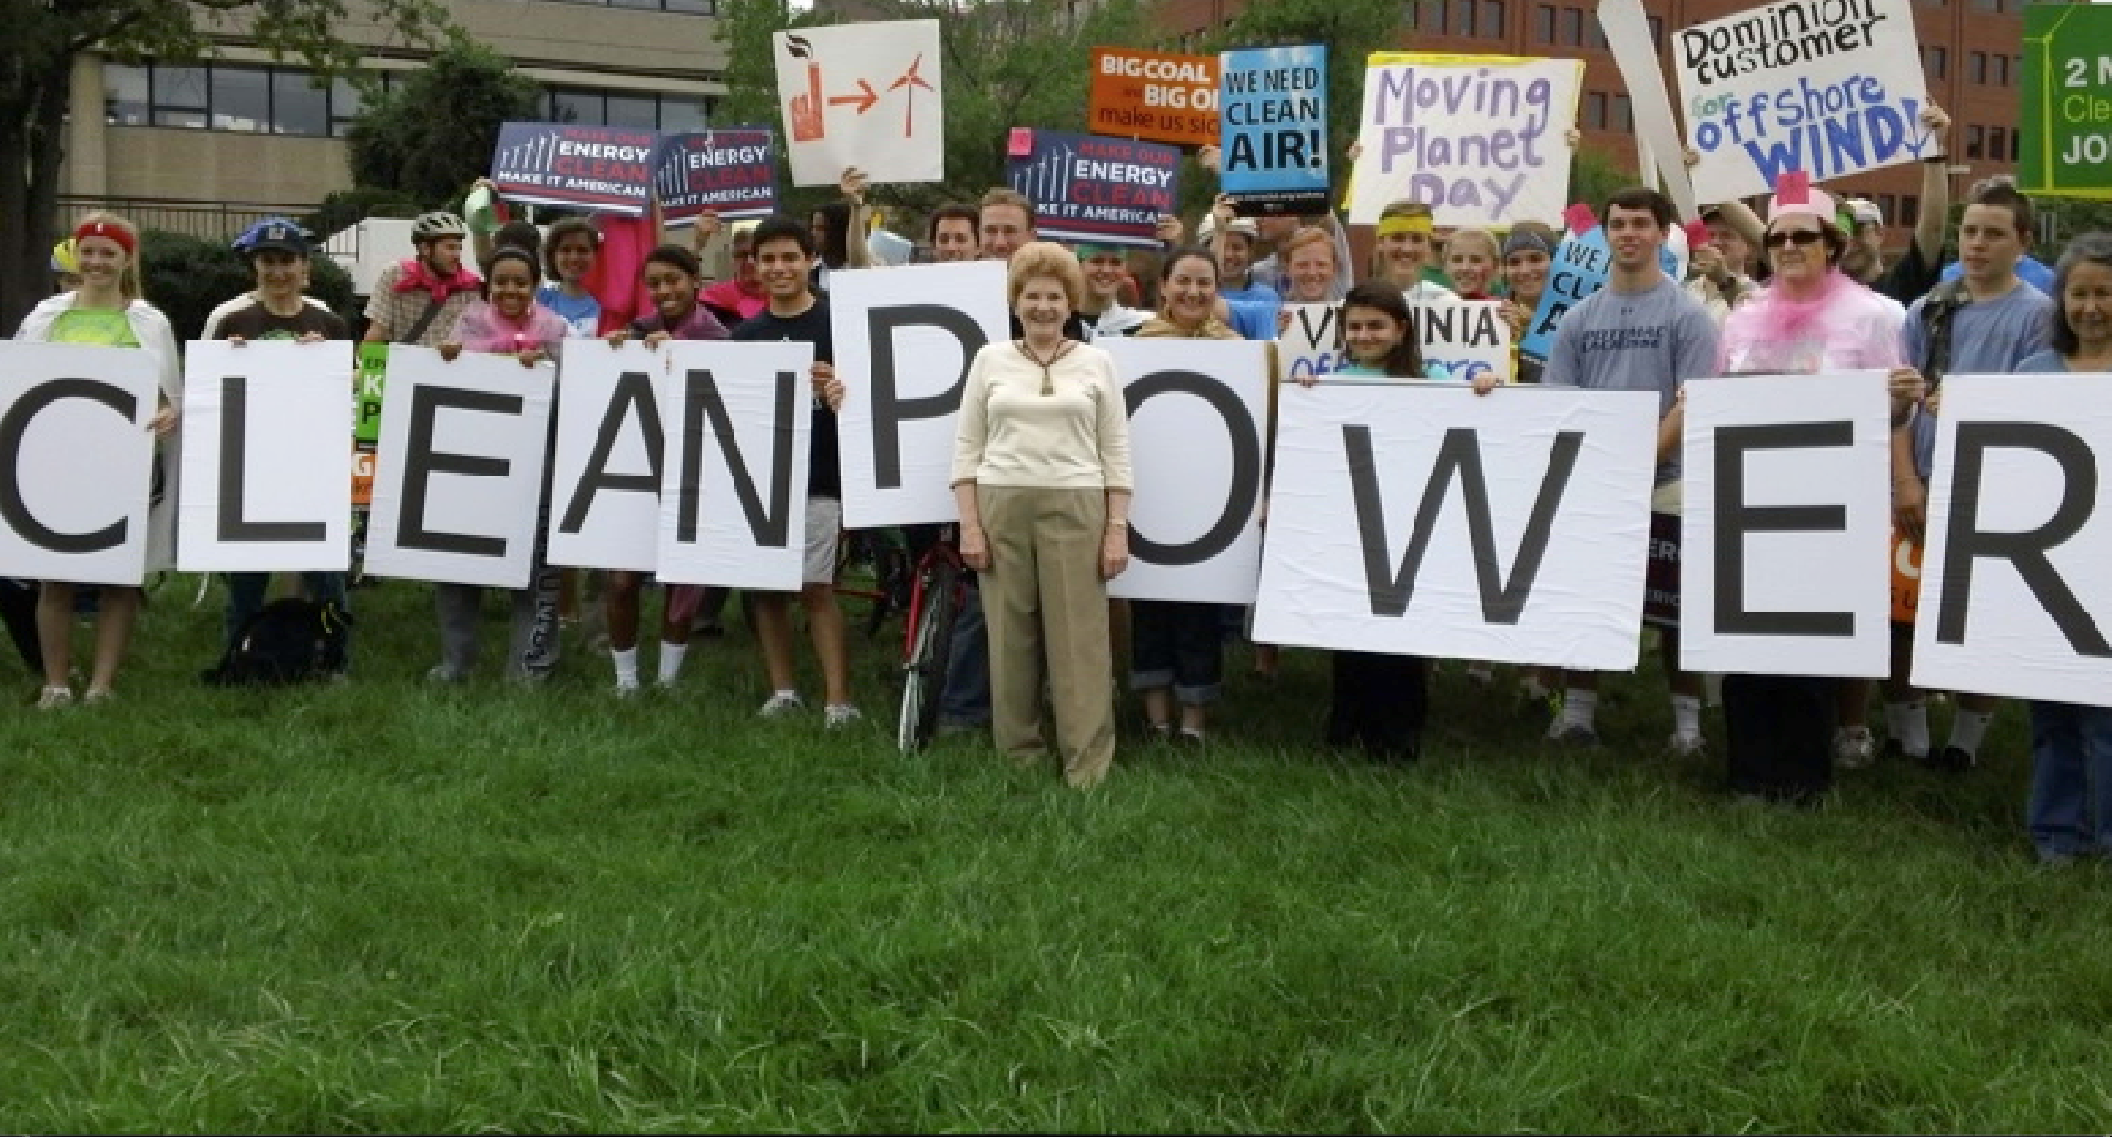

Headquarters for Dominion

Passed the biggest environmental safeguard
in the last decade!

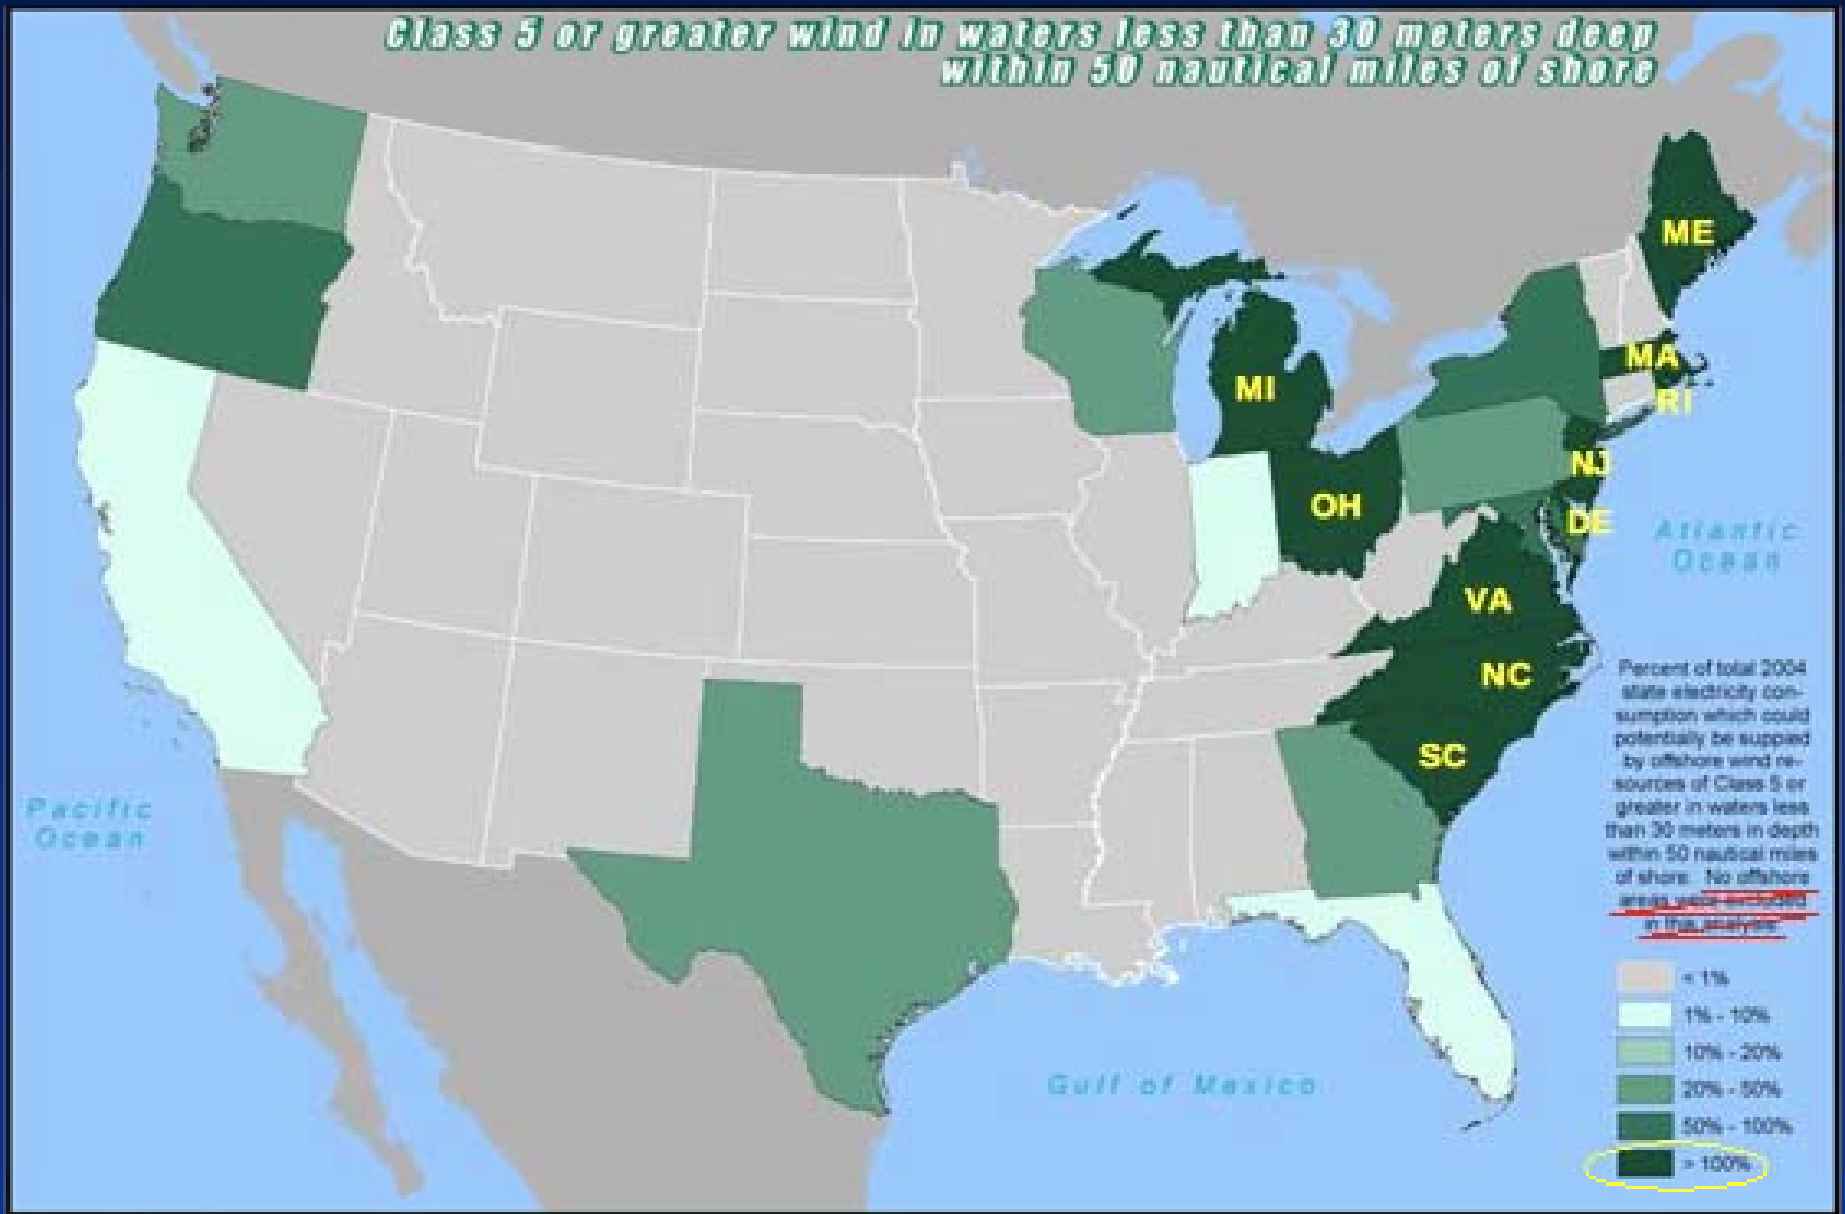

Proposed coal plants
that have been defeated

The next step is to ensure we move beyond coal to safe, clean energy

*Class 5 or greater wind in waters less than 30 meters deep
within 50 nautical miles of shore*

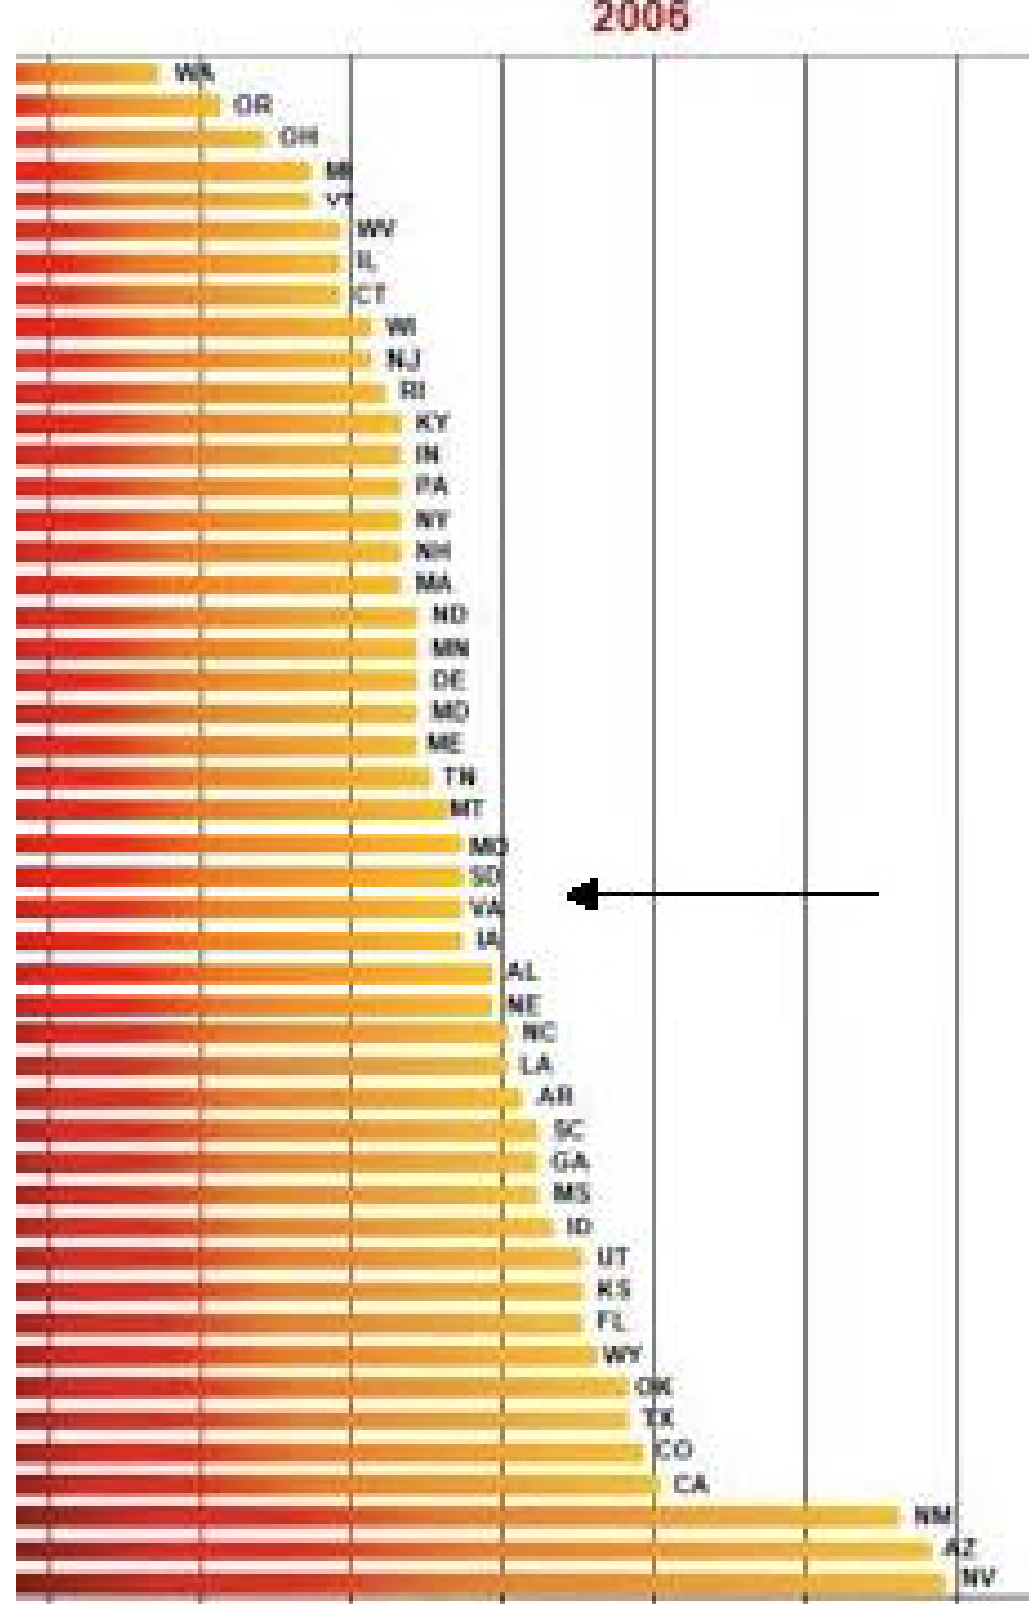

Off-shore wind potential is great

ar could produce
9% of Virginia
electricity demand

MW currently installed

w Jersey — 650MW

An obstacle to our clean energy future

Sizing the problem

Dominion spews more industrial carbon and mercury
emission than any other business in Virginia

Dominion has developed one single wind farm or solar project
in the entire state

In 2015, Dominion projects that it will spend \$3.8
billion to build new power plants

A monopoly with influence

controls 70% of Virginia's energy and is a major economic and political player

loopholes in the Renewable Portfolio Standard

\$5 million for coal subsidies each year

lowers the cost of fossil fuels and value of price stability

puts a back on small, solar businesses

creates obstacles to wind power

The plan

customer
campaign

EPA
Defender

Dominion should lead the way by creating 3,000 megawatts
enough to power 700,000 homes — of new Virginia

SAFEGUARD

Dominion — biggest
source of toxic-mercury in
Virginia

Major factor in retiring out-
dated coal plants

Must defend the
safeguard from constant
attacks

This much
mercury can
contaminate
a 20-acre lake

U.S. coal-fired power plants produce 48 tons of

<http://sc...>

Is there coal
in your tuna?

EPA Defenders Industrial Carbon Pollution Safeguards

Dominion is the biggest source of industrial carbon pollution in Virginia

Could prevent any future coal-fired plants in Virginia

Help our EPA defenders

Why now?

BEYOND
COAL

Dominion.

Coal to Clean Energy

Move beyond coal

Find an energy solution

Domination is the obstacle

1000 MW's of Virginia-made
clean energy by 2020

We need you on our team

Let's continue this movement
