2. Briefing on a Study to Identify Pedestrian/Bicycle Access Improvements at Select Rail Stations

The TPB in 2012 received a grant from the FHWA's Transportation, Community, and Systems Preservation (TCSP) Program to develop an inventory of pedestrian and bicycle improvements near 25 rail stations that currently have capacity to accommodate more riders and are anticipating ridership growth. The capital improvements included in this inventory, which were largely derived from local plans and studies, would enhance station access, helping to maximize use of the existing rail system.

10:30 am

3. Briefing on Metro's Connecting Communities Key Performance Indicator, Walkability Research and Station Area Strategic Investment Plan

Metro's strategic goal to 'connect communities' seeks to improve regional mobility by enhancing access to our transit system. This briefing will explain the framework for measuring this goal, explore new research on walkable station areas that builds the case for station connectivity, and discuss a new study that leverages the TCSP by compiling and prioritizing walk/bike access projects within ½ mile of all of Metro's 91 stations.

10:50 am

4. Preliminary Assessment of Commercial Real Estate Vacancy Rates

Vacancy rates in the office real estate market have increased over the past several years. John Kent of COG staff will present data on regional and submarket vacancy rates in office buildings from the CoStar database. This presentation will be a modified version of earlier presentations made to the Cooperative Forecasting Data Subcommittee and the Chief Administrative Officers Committee.
