NOT MY CHILD Overview

The "*Not My Child*" program is focused on providing awareness by providing the facts of abuse of prescription drugs and the escalation of heroin use in our communities. The "*Not My Child*" discussion taking place in our communities provides an open, honest conversation regarding the use of drugs by children and adults in every community, the issue does not discriminate.

"*Not My Child*" is a collaborative effort supported by multiple county agencies, non-profits and community members working together to educate parents, families and communities on the impact of addiction on the individual, family and community.

Our NMC program begins with a short 7 minute video featuring Anne Arundel County residents who courageously share the impact of addiction on the individual and family.

The presentation is designed to be educational:

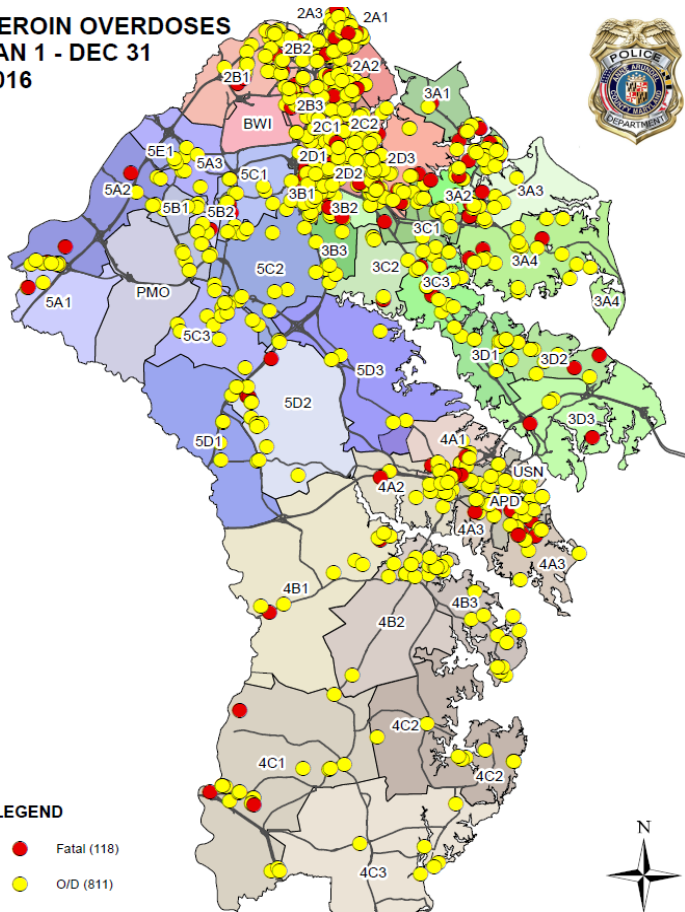

1. Parent who has lost a loved one to heroin overdose
2. Young person in recovery
3. Prevention and Environmental Specialists from non profit and our Health Dept.
4. Mobile Crisis, AAMHA, our core service agency for mental health
5. State's Attorneys Office – Wes Adams – primary
6. Fire Department
7. Police Department
