HMDA Dataset – What can it tell us about the regional housing market?

MWCOG Cooperative Forecasting and Data Subcommittee Meeting December 4, 2007

Roberto Ruiz, Arlington County Planning Division

What is Home Mortgage Disclosure Act (HMDA) Data?

December 4, 2007

What is Home Mortgage Disclosure Act (HMDA) data?

- A 1975 Act of Congress, three purposes:
 - Inform are lenders meeting community credit needs?
 - Alert where to target public investment
 - Discern discriminatory lending patterns
- Covers:
 - Depository lenders
 - Nondepository lenders
 - Home purchase and refinance loans equal 10% of its dollar lending activity
 - Or the institution originates \$25 million
 - In 2005, 8,848 financial institutions reported / 36.4 million loan records

December 4, 2007

What is Home Mortgage Disclosure Act (HMDA) data?

- Includes data such information as
 - Income, race, ethnicity, and gender
 - Loan purpose, amount, and lien status
 - Decision taken by lender and reason for denial
 - Housing type
 - Census tract of originated loan
 - Loan pricing information
 - Identify high cost or subprime loans
 - "Rate spread between the APR on a loan and the yield on Treasury securities with comparable maturity periods"
 - 3 percentage points for first lien loans
 - 5 percentage points for subordinate lien loans

Source: Federal Register, Vol. 67, No. 32, 12 CFR Part 203

December 4, 2007

What is a rate spread?

• APR (interest + points + feeds) 30 year first lien mortgage

8.00%

• Yield 30 year treasury

4.56%

= 3.44 rate spread

FFIEC Rate Spread Calculator

IDA reporting institutions with the new Regulation C requirements for reporting Rat Percentage Rate (APR) and the comparable treasury security utilizing the "Treasury s. <u>Rate Spread is a calculated field and is NOT simply the APR on the loan applicat</u> 1 Registers (LARs).

LC " table is available in ASCII comma delimited format to view, print and download

• HOEPA status; they are two different fields which require two different ca

What Loans Were Studied?

December 4, 2007

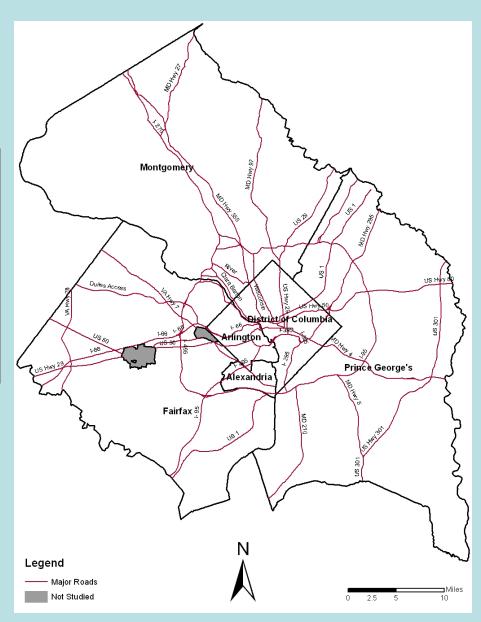

What loans were studied?

- 2005
- Originated loans
- Secured by first lien
- One to four family dwellings
- Home purchase loans (not refinance or home improvement)
- Full and partial Census tract
- 91,119 records studied
 - Out of 603,400

What loans were studied?

District of Columbia	12,532	13.8%
Arlington County, VA	4,529	5.0%
Alexandria City, VA	4,219	4.6%
Fairfax County, VA	28,474	31.2%
Montgomery County, MD	21,464	23.6%
Prince George's County, MD	19,901	21.8%
ৰক্ষা,119 records	91,119	100.0%

Losing Ground: Foreclosures in the Subprime Market and Their Cost to Homeowners

By the Center for Responsible Lending

• Approximately, one out of five (19 percent) subprime mortgages originated in the last two years will end in foreclosure, and go down as the worst foreclosure rate in modern mortgage market history.

• As many as one in eight (13 percent) subprime loans ended in foreclosure within five years of origination even during the recent housing boom.

Trying to Hold Onto Home Metropolitan Money Store Put Their House at Risk, Md. Couple Say By <u>Ovetta Wiggins</u> Wednesday, October 10, 2007; Page B01

"Maryland's foreclosure ranking jumped from 40th in the nation last year to 18th in June, state officials said. <u>Prince George's</u> <u>County</u> has the highest percentage of homes in foreclosure in the state, and Fort Washington is one of the hardesthit communities in the Washington region."

Area Suburbs See Rise in Foreclosures Even Affluent Neighborhoods Feel Effects of Subprime Mortgage Free Fall By <u>Kirstin Downey</u> Saturday, June 30, 2007; Page A01

Tommy Rice, Arlington County's real estate assessor, spotted something troubling on his computer when he returned to work after a three-week vacation early this year: a half-dozen residential property transactions with an unusual code, the numeral 1, which indicates a foreclosure.

Rice was taken aback, because he had seen that code so infrequently in his 22 years as an assessor in the affluent county.

Related Article: Area Suburbs See Rise in Foreclosures, page A01

"It's rare in Arlington and in Northern Virginia, too," he said.

December 4, 2007

Notable Findings and Concluding Thoughts

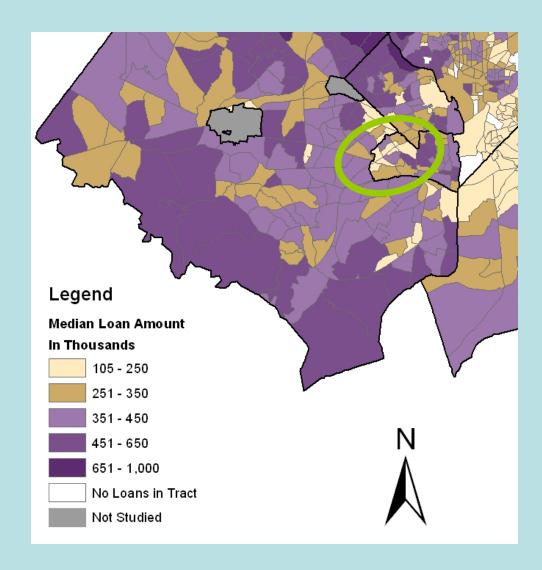

December 4, 2007

Notable Findings

- Most loans-- 39.3% regionally --belong to applicants making between \$51,000 and \$100,000.
- Prince George's County has the largest county share of loans to the above income bracket, 52.8%.
- Regionally nearly 20% of all loans are high cost (subprime) loans.
- 41% of loans issued in Prince George's County are high cost (suprime)—the only county share that exceeds the regional share of 20% for subprime loans.
- The largest relative concentration of high cost (subprime) loans to applicants making \$51,000 or less is in Prince George's County.
- The polar opposite concentration, of applicants making more than \$151,000, for subprime borrowers is found in Arlington County.
