

AIR QUALITY PLANNING UPDATE

Sunil Kumar
Principal Environmental Engineer

Metropolitan Washington Air Quality Committee
December 7, 2022

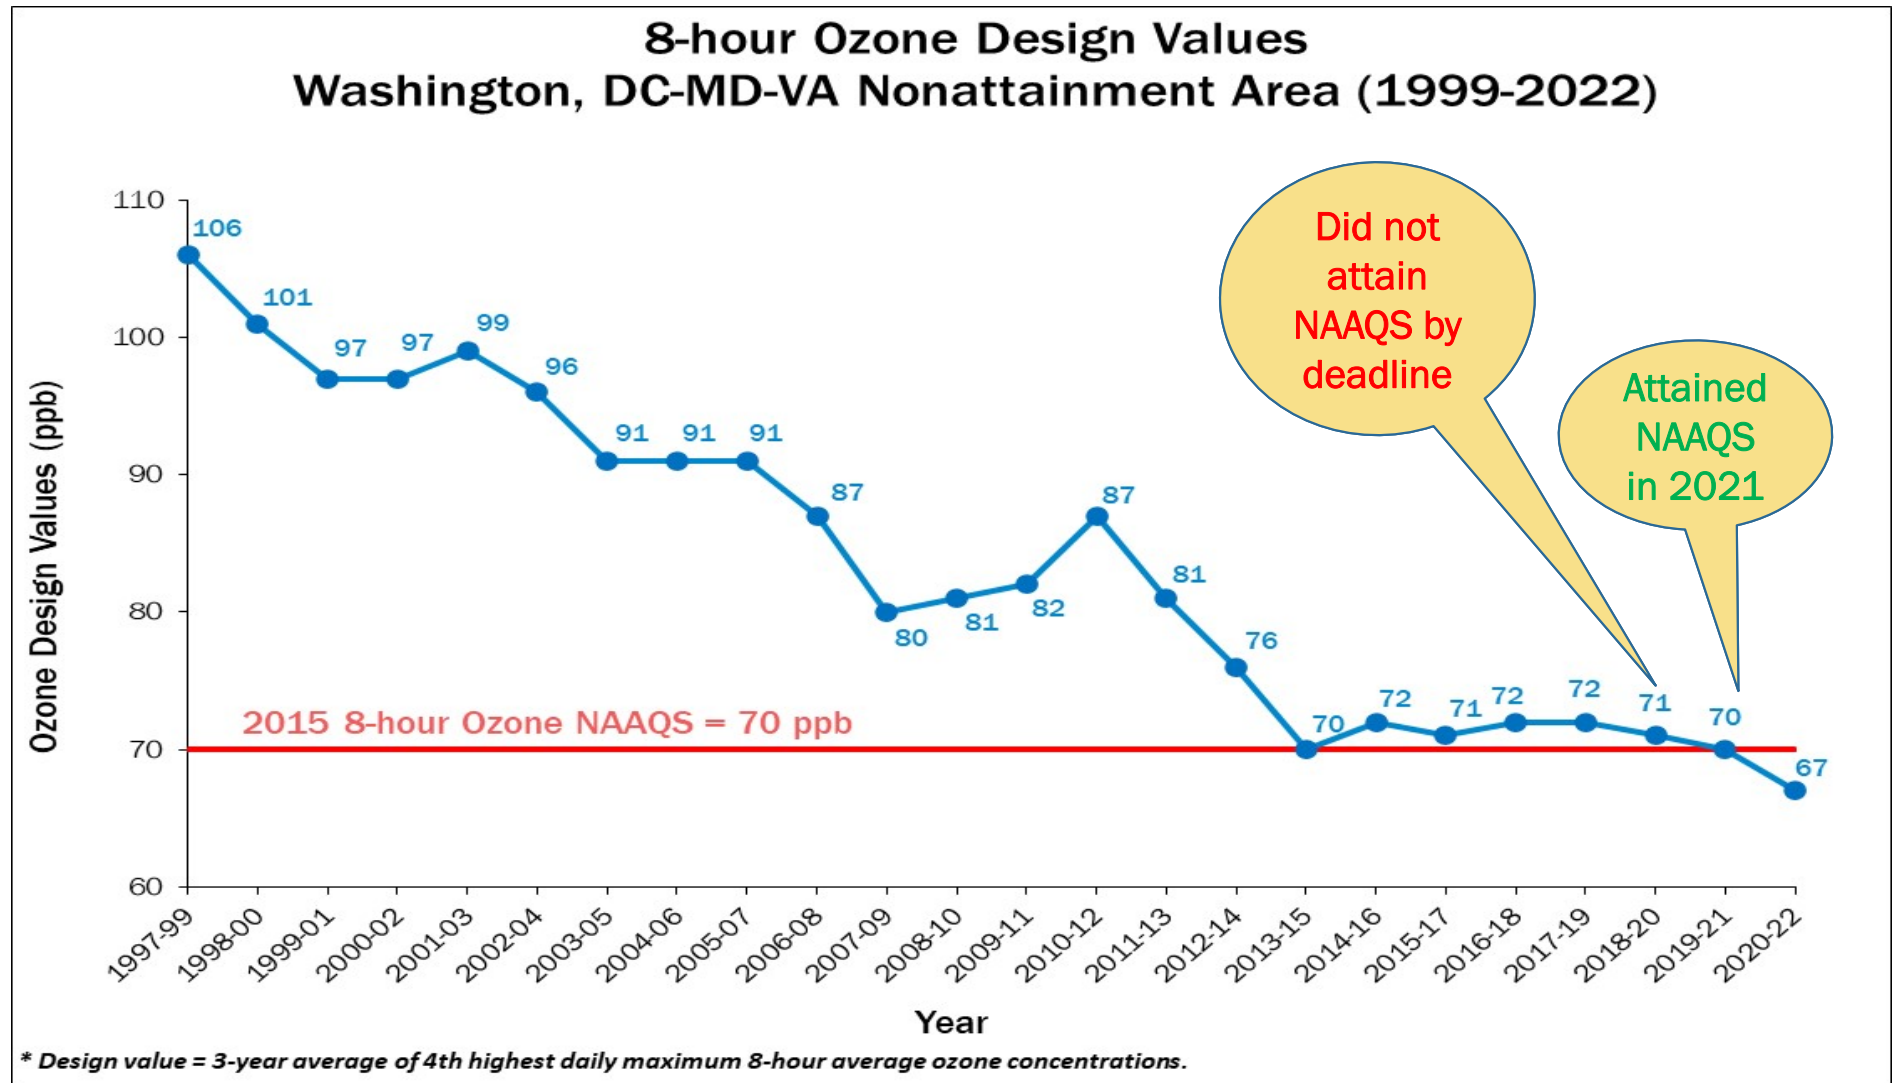

Ozone Exceedance Trend

2022 data is draft.

Ozone Design Value Trend

2022 data is draft.

Current Planning Activities

(2008 Ozone NAAQS Maintenance Plan Update)

- Washington region currently working on updating the 2008 Ozone NAAQS Maintenance Plan.
- Current MVEBs from the above plan were developed using MOVES2014a.
- TPB will have to use MOVES3 starting early next year for demonstrating conformity.
- 2008 Ozone MP MVEBs will be applicable for regional transportation conformity
 - Unless EPA revokes 2008 Ozone NAAQs (no plans at this time) AND
 - New MVEBs are approved or found adequate in the 2015 Ozone NAAQS MP (timing not known)
- TPB's preliminary analysis shows issues with demonstrating conformity using MOVES2014a MVEBs so new MOVES3 based MVEBs needs to be developed.
- COG and states are coordinating with EPA on updating the 2008 ozone MP.
- Staff developed a draft schedule to get updated MVEBs approved by MWAQC in May (for public comments) and in September (final approval).
