Conclusions from Crash Data

- ▶ Decline in overall fatalities, injuries, and crashes over the past ten years has slowed
- ▶ In 2013, the region saw an increase in population and VMT, but fatalities have not increased as drastically – resulting in lower fatality rates
- ▶ 2013 tied with 2012 and 2003 for fewest cyclist and pedestrian fatalities
- ▶ Decrease in pedestrian fatalities as a percentage of total since 2010
- ▶ Rise in pedestrian and cyclist injuries – both in absolute numbers and as a percentage of total
- ▶ Decrease in motorist injuries – both in absolute numbers and as a percentage of total
