A low-angle photograph of two police officers in tactical gear rappelling down a rope on a building roof. The officer in the foreground is looking towards the camera, wearing a helmet and goggles. The officer behind is also in gear, looking down. The background shows a clear blue sky and the edge of a building.

# **Annual Report on Crime and Crime Control 2009**

**Metropolitan Washington Council of Governments**

# Overview

The Metropolitan Washington Council of Governments' (COG) annual crime report is based on crime incidents reported by participating agencies in the National Capital Region (NCR). The 2009 COG Report on Crime and Crime Control focuses on Part I offenses, which include the violent crimes of homicide, rape, robbery, aggravated assault; and the property crimes of burglary, larceny, and motor vehicle theft.

A review of the crime statistics submitted by participating COG jurisdictions reveals an overall reduction of 7.98% in Part I Offenses from 2008 to 2009. There were 143,568 crimes reported in 2009, compared to 156,025 reported in 2008, a reduction of over 12,000 crimes. Decreases were

experienced in all Part I categories: rapes (-7.8%), robberies (-7.3%), aggravated assaults (-7.3%), burglaries (-4.2%), and larcenies (-6.1%). Most significantly, a considerable decrease in homicides (-22.6%) should be noted, while motor vehicle thefts also experienced another significant decrease (-15.1%). Both had been focus areas identified by the COG jurisdictions in previous years.

Further analysis of the breakdown between violent and property crime over the past two years suggests that the distribution of the two types of crimes remains unchanged between 2008 and 2009. Violent crimes accounted for 13% of all Part I offenses in both 2008 and 2009, with property crimes accounting for the

remaining 87% of offenses. Law enforcement agencies continue to report increases in larcenies/thefts from autos, larcenies of portable electronic devices, thefts of motor vehicle parts and/or accessories, shoplifting, and in several jurisdictions, larcenies from coin machines.

These categories continue to drive the large percentage of property crime-related offenses experienced in the NCR.

In evaluating NCR Part I Offense data from 2005 to 2009, there continues to be a decrease in homicides, rapes, robberies, aggravated assaults and motor vehicle thefts. However, burglary and larceny trends show an increase across the five-year period, despite the reductions made this year. The NCR has experienced a 6% drop overall in Part I Offenses since 2005. The overall decline in the five-year average of Part I Offenses suggests agencies have been addressing serious crime in their jurisdictions through various crime prevention strategies and initiatives.

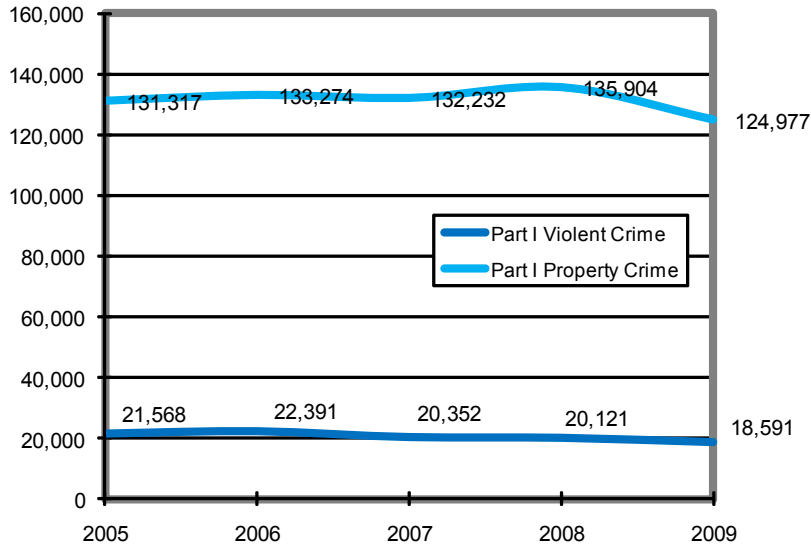

An analysis of statistics by region shows a decline in total Part I Offenses across the board between 2008 and 2009. Maryland had the greatest decrease in overall crimes by almost 11%, followed by the District of Columbia with a 6.2% decrease, and Virginia, with a 4.0% decrease.

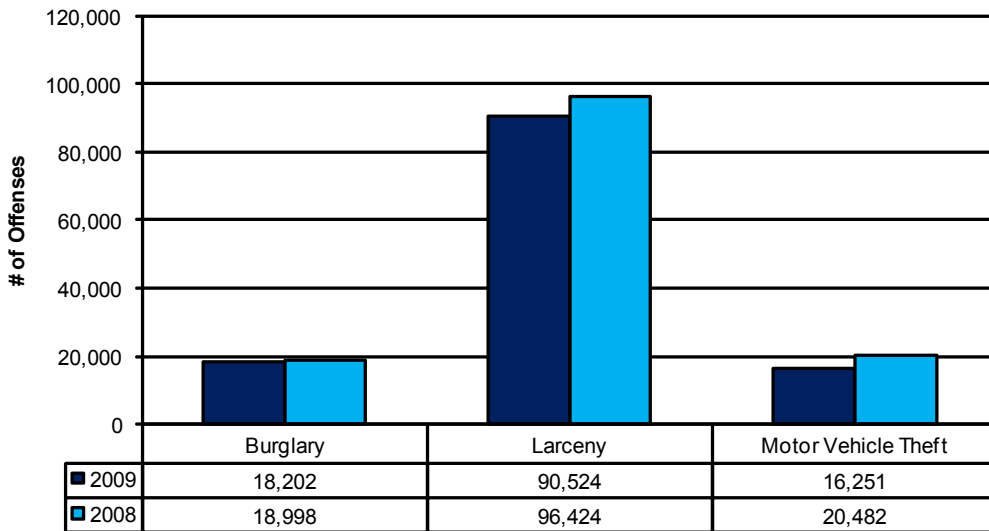

Continued cooperation and communication among agencies throughout the NCR will further enable jurisdictions to work toward continued reductions in major crimes. The use of innovative technologies, including License Plate Readers, and computers and GPS in police cars, as well as other enhanced data sharing technologies available to officers, such as LInX, has enabled the NCR to improve its crime reduction efforts during this period of economic downturn.

# 2009

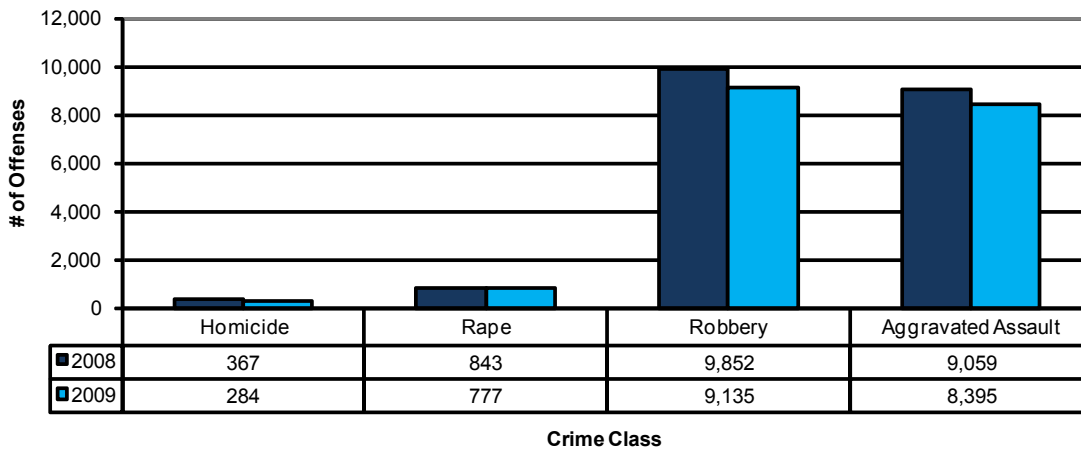

### Crime Trends 2005-2009

### Property Crime: 2008 vs. 2009

### Violent Crime: 2008 vs. 2009

# Crime Trends

## 2009 Violent Crime vs. Property Crime

(Total Part 1 Offenses: 143,568)

It must be noted that reporting methods are not uniform throughout this report since some departments used the Uniform Crime Reporting (UCR) while others used the National Incident Based Reporting System (NIBRS). Recognizing the need for additional information about crime, the FBI launched NIBRS as an enhanced UCR Program. The FBI recognized that conversion to the new system would be gradual, so it is appropriate for agencies to still report under UCR. As a general rule, NIBRS crime rates tend to be higher than UCR rates, primarily because NIBRS statistically counts all separate violations within a single criminal event. UCR counts only the most serious crime. The average difference, however, is small.

<sup>1</sup> On October 4th, 2009, the CAD system underwent a platform change. The change incorporated an alternate call classification system, causing incompatibilities between data produced from the separate platforms. Due to this anomaly, the Fairfax County Police Department has provided an estimate of CY 2009 calls based on an Exponential Smoothing (ES) technique. The above forecast is based on call totals from CY 2003-2008.

# Recommendations

from the COG Police Chiefs Committee

1. Educate the public and reduce opportunities for crimes.
2. Encourage cooperation between communities, business leaders, and law enforcement.
3. Expand the use of innovative technologies:
  - Data Sharing (LInX)
  - Crime Analysis
  - Automated License Plate Readers (LPR)
  - GPS
