

Medication Assisted Treatment Extended Release Naltrexone Local Detention Center

Rebecca Hogamier, MBA, LCADC
Day Reporting Center Program Director
Washington County Sheriff's Office

May 9, 2017

How was the Initiative Funded?

- Second Chance Grant – Family Based Prisoner Substance Abuse Treatment
- State of Maryland, Department Health and Mental Hygiene, Behavioral Health Administration

Initiative Goals

- Decrease recidivism
- Increase engagement and retention in community based behavioral health treatment
- Reduce opioid overdoses

Partnership

- Washington County Health Department
- Washington County Detention Center
- Correct Care Solutions, formerly Conmed Healthcare Management, Inc.

Why Vivitrol?

- Poor follow through upon release
- Resumed use upon release
- Increasing overdose deaths

Existing Program Components

- Established jail based treatment for substance use disorders,
- Established outpatient treatment for substance use disorders, that provided medication assisted treatment, using Vivitrol

Who is Eligibility

- Multiple treatment experience
- Multiple criminal charges or convictions due to substance use

Medication Assisted Treatment

- Assessment
- Referral
- Medical Evaluation
- Blood Work
- Prescribe the Medication
- Drug Test
- Administer Injection

Results After the First Year

- 21 individuals participated in medication assisted treatment,
- 92% receiving medication continued in treatment upon release, prior to program implementation, 50% would continued in treatment upon release,
- 80% of those individuals remained in treatment 90 days or longer, and
- 85% reported a reduction in substance use.
