

MFB Early Warning System: Food Emergencies

- ❖ Daniel Sturm, Vice President for Learning, Measurement, Evaluation
- ❖ Sania Shams, Director of Sourcing and Inventory

Aug. 11, 2023

Early Warning System Significance

- Food bank use is like a canary in the coal mine for those facing hunger and hardship.
- Food banks offer a window into understanding the full extent of the coming food crisis: an Early Warning System of the strains on our food systems.

Early Warning System Context

- This is a framework to inform the development of a statewide Food Emergency Early Warning System.
- The framework's goal is to provide input on the development of an Early Warning System and advance discussions with the Maryland Department of Emergency Management on this topic.
- Early Warning System indicators included in this framework are monitored by subject-matter experts at the Maryland Food Bank.

Early Warning System Indicators

Demand

- Food Distribution
- Partner Visits
- Internet Searches
- 211 Calls for Food

Food Supply

- Food Supply
- Movement of Supplies
- Inventory Turnover
- Sourcing Outlook

Hardship

- Consumer Price Index
- Food Affordability
- Food Insufficiency
- Financial Hardship

Early Warning System Indicators

#	Indicator	Early Warning Sign	Significance	Data Sources
1	Demand	Food Distribution	MFB tracks the amount of food it distributes to its 1,200 sites.	MFB Navision
2	Demand	Network Partner Visits	MFB tracks pantry statistics, visitor patterns, demographics.	MFB Link2Feed
3	Demand	211 Calls for Food	MFB evaluates 211 call data to monitor needs trends.	211-Maryland
4	Demand	Search for Free Food	MFB evaluates Google Trends to assess demand and need.	Google Trends
5	Food Supply	Cost of Goods	MFB monitors the cost of good distributed.	MFB Navision
6	Food Supply	Inventory Turnover	MFB tracks movement by item during the last 30 days.	MFB Navision
7	Food Supply	Movement of Supplies	MFB monitors the availability of items.	MFB Navision
8	Food Supply	Cereal Supply	Up-to-date stats of the world cereal market.	FAO
9	Food Supply	Supply Events	Trade news alerts shed light on potential food shortages.	AP, USDA
10	Hardship	Cost of Living	MFB tracks inflation impact on neighbors in need.	U.S. BLS
11	Hardship	Household Expenses	The effects of usual household expenses on financial stability.	U.S. Census
12	Hardship	Food Affordability	Survey results are a pulse of food affordability.	U.S. Census
13	Hardship	Food Insufficiency	MFB monitors food insufficiency rates on a bi-monthly basis.	U.S. Census

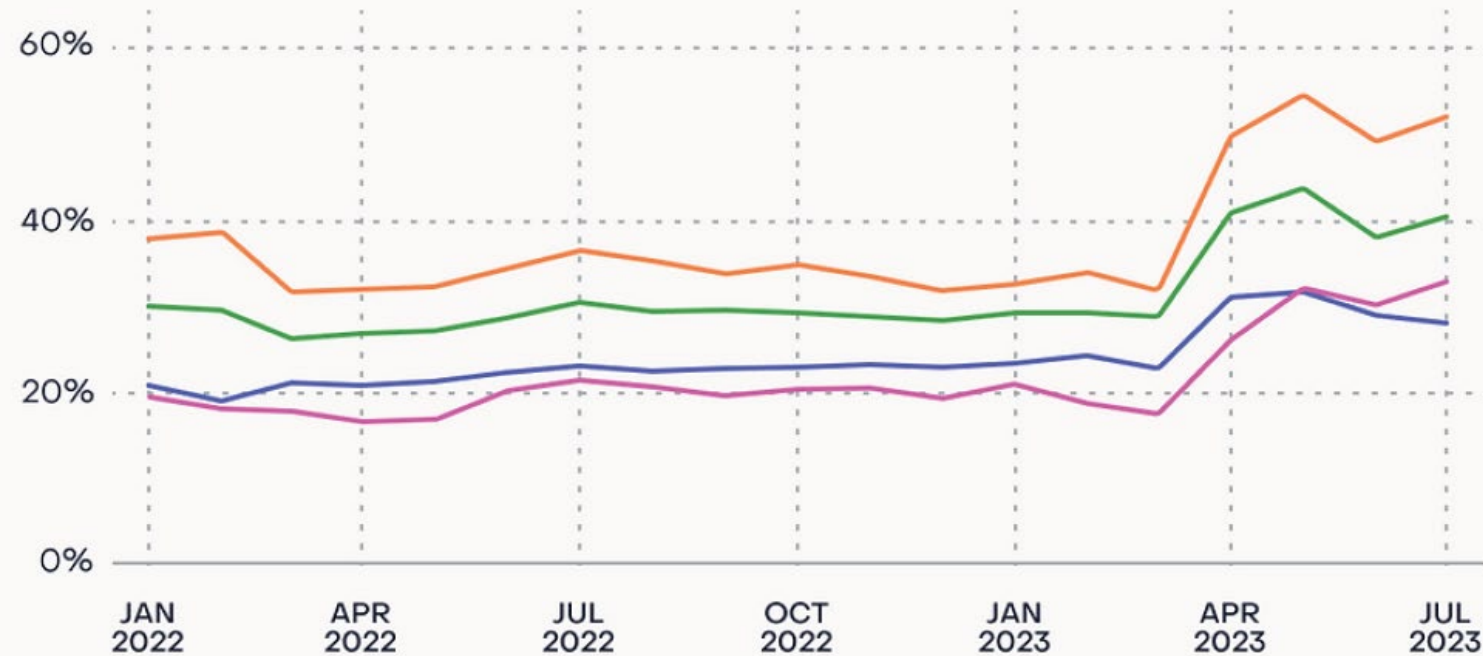

Hardship: Propel Survey (U.S. Data)

Example
#1

In the last 30 days, Providers have:

● Skipped meals ● Eating less ● Visited a food pantry ● Relied on family or friends for meals

n=2,581

Source: Random sample of Providers users. Data presented by Propel, inc

Propel SNAP Household Survey Results, July 2023. <https://www.joinpropel.com/reports/july-2023-pulse-survey>

Hardship: Food Affordability (Md. Data)

Hardship

#12: Food Affordability

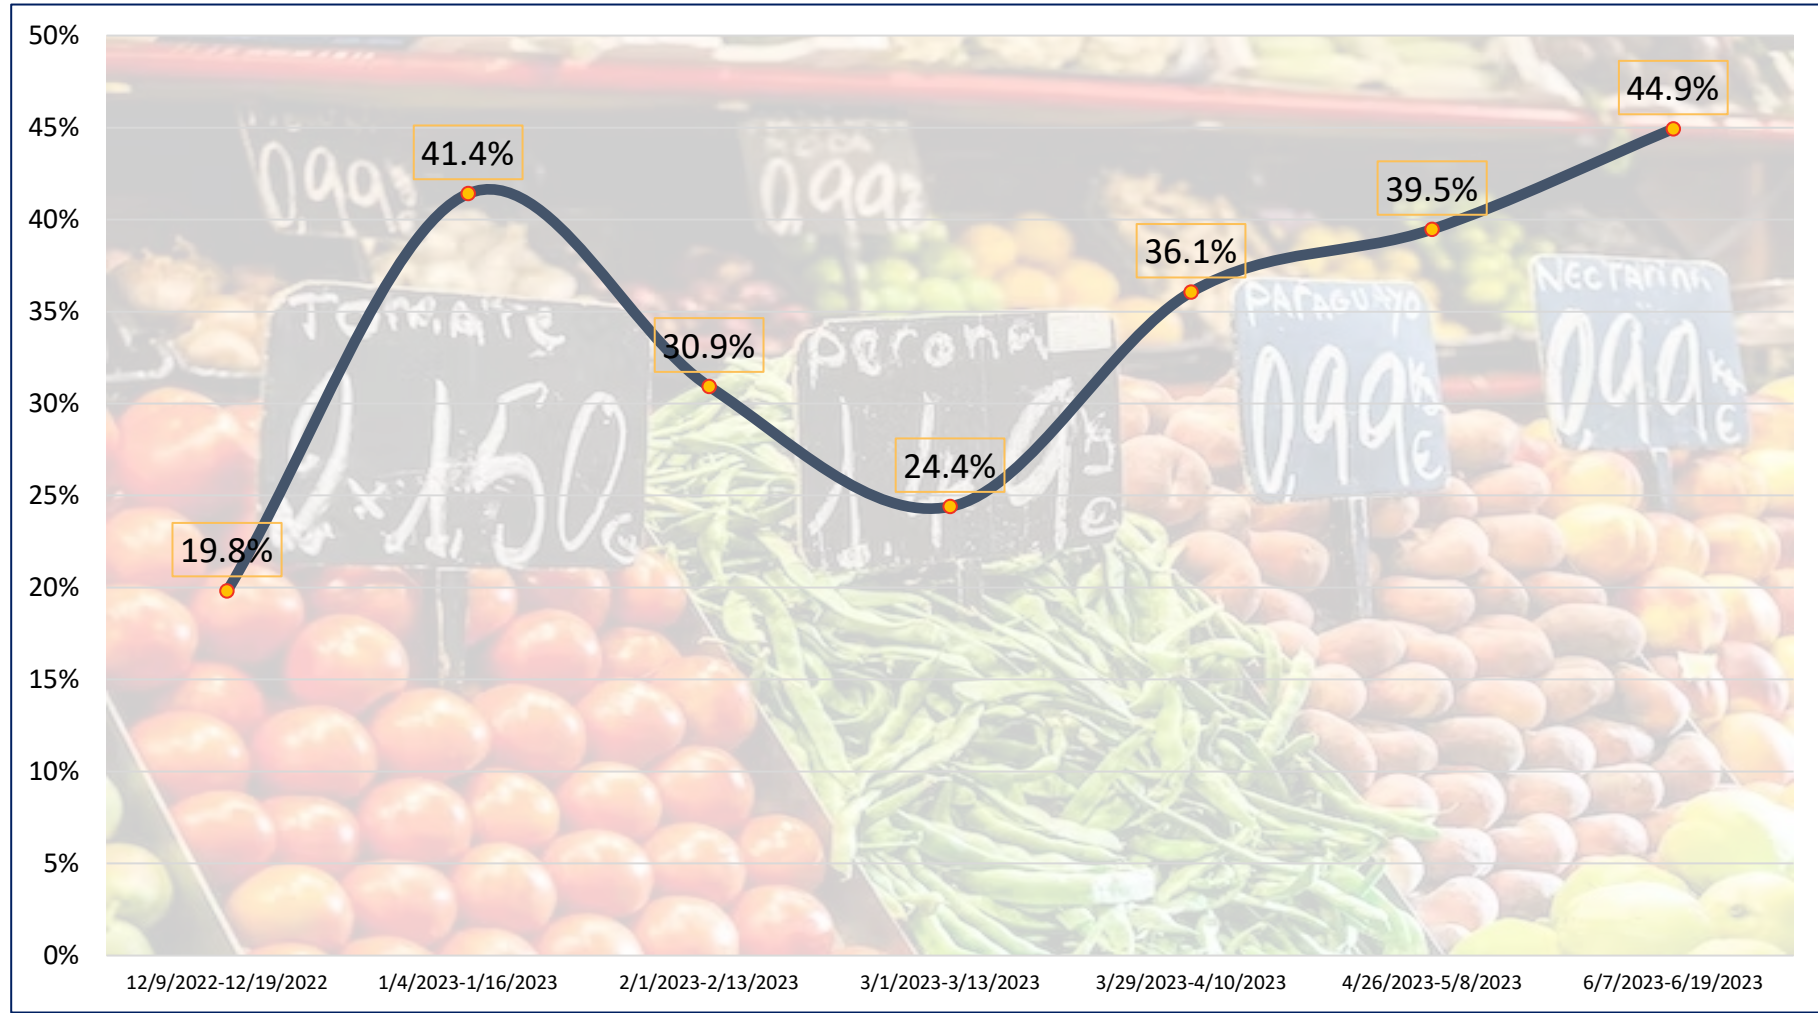

Census researchers ask MD parents if their children were *often, sometimes* or *never* eating enough because the household “just couldn’t afford enough food.” The (bi-)monthly survey results measure a pulse of food affordability.

U.S. Census Household Pulse Survey:
Food Table 4. Recent Food Insufficiency for Households with Children.

Significance

Data

Hardship: Food Affordability (Md. Data)

Example
#2

U.S. Census Household Pulse Survey: *Food Table 4*. Combined share of respondents whose children were “sometimes” or “often” not eating enough because food was unaffordable

Demand: Google Searches for Free Food

Demand

#4: Internet Searches for Free Food

MFB uses daily data from Google Trends for the search terms “Food Pantry,” “Food Bank,” “Free Food” and “Maryland Food Bank” and document the development of a food crisis, as indicated by the number of individuals who need to locate a food pantry through the internet.

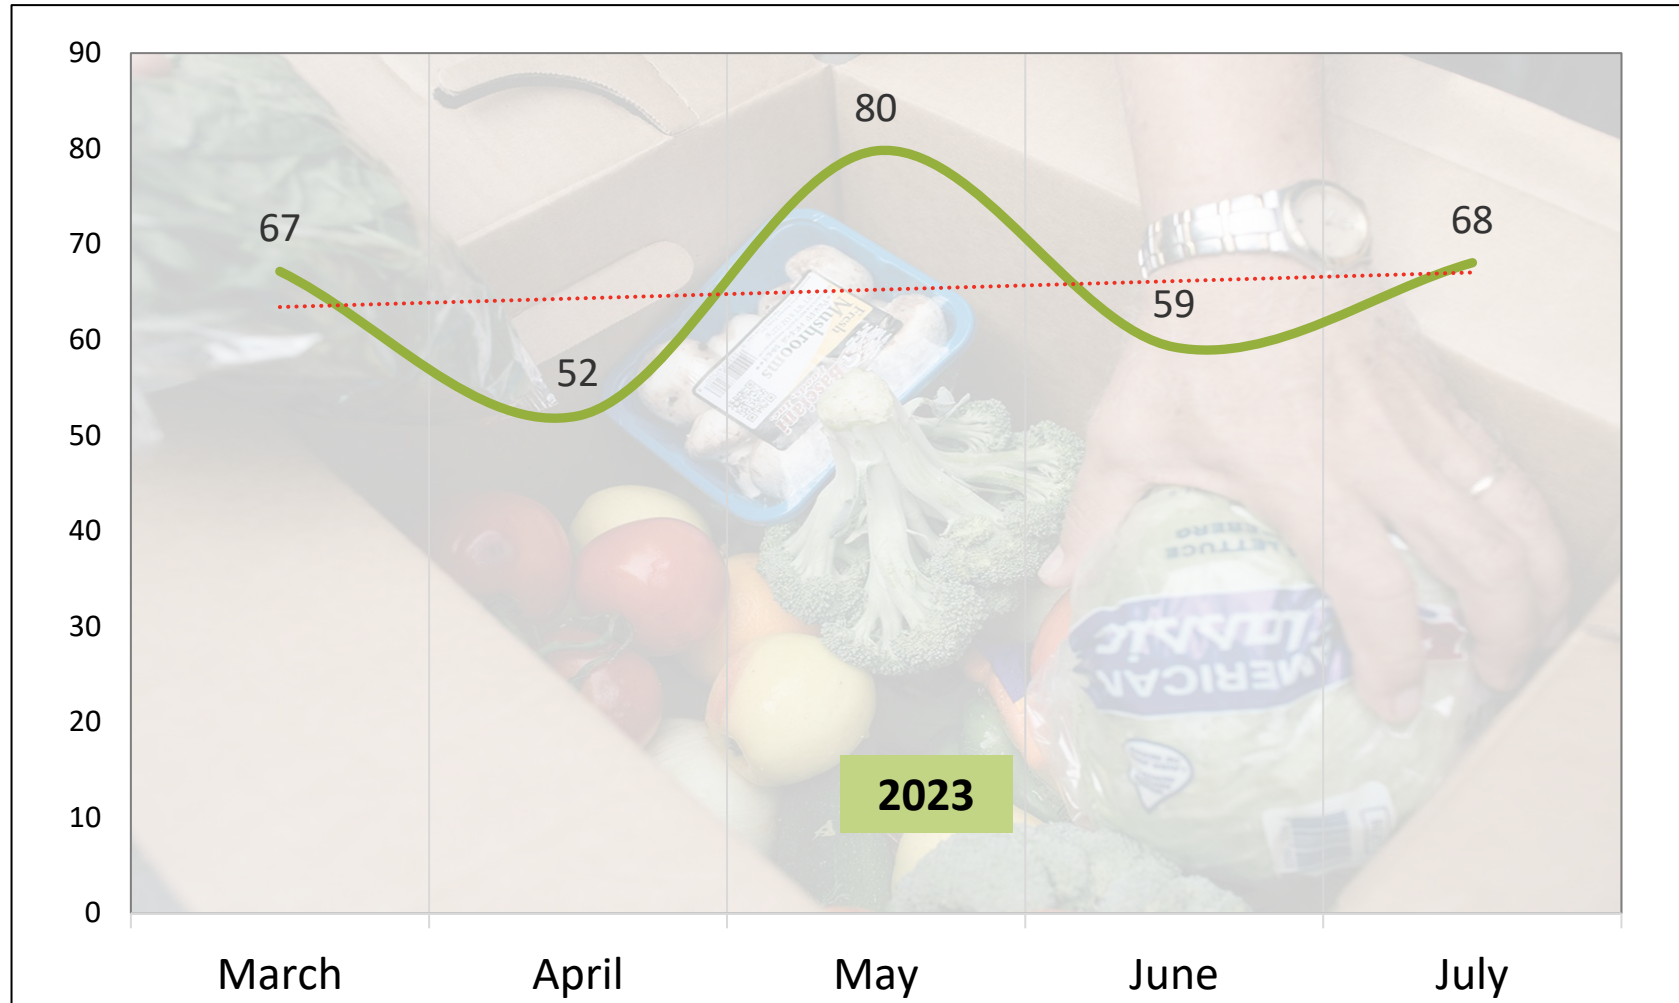

Google Trends. Searches for “Food Pantry,” “Food Bank,” “Free Food” and “Maryland Food Bank”. <https://tinyurl.com/mr2zxcrp>

Significance

Data

Demand: Google Searches for Free Food

Example
#2

Google Trends. Searches for “Food Pantry,” “Food Bank,” “Free Food” and “Maryland Food Bank”. <https://tinyurl.com/mr2zxcrp>

Food Supply: Cost of Goods (Per Pound)

Food Supply

#5: Cost of Goods (Per Pound)

MFB monitors Cost of Goods as a measure of supply chain strains. MOM/YOY comparison informs decision-making regarding vendor searches, efficiency in logistics. MFB flags trends that exceed MDEM 25% threshold for awareness and 45% threshold for mitigation. Baseline: 25 top purchased items (core)

Maryland Food Bank. Tableau/Navision.
Cost of Goods (Per Pound)

Significance

Data

Food Supply: Cost of Goods (Per Pound)

Learning & Research Goal

- Identify Top 25 Items Received FY2019 (Pre-Covid) through FY 2023.

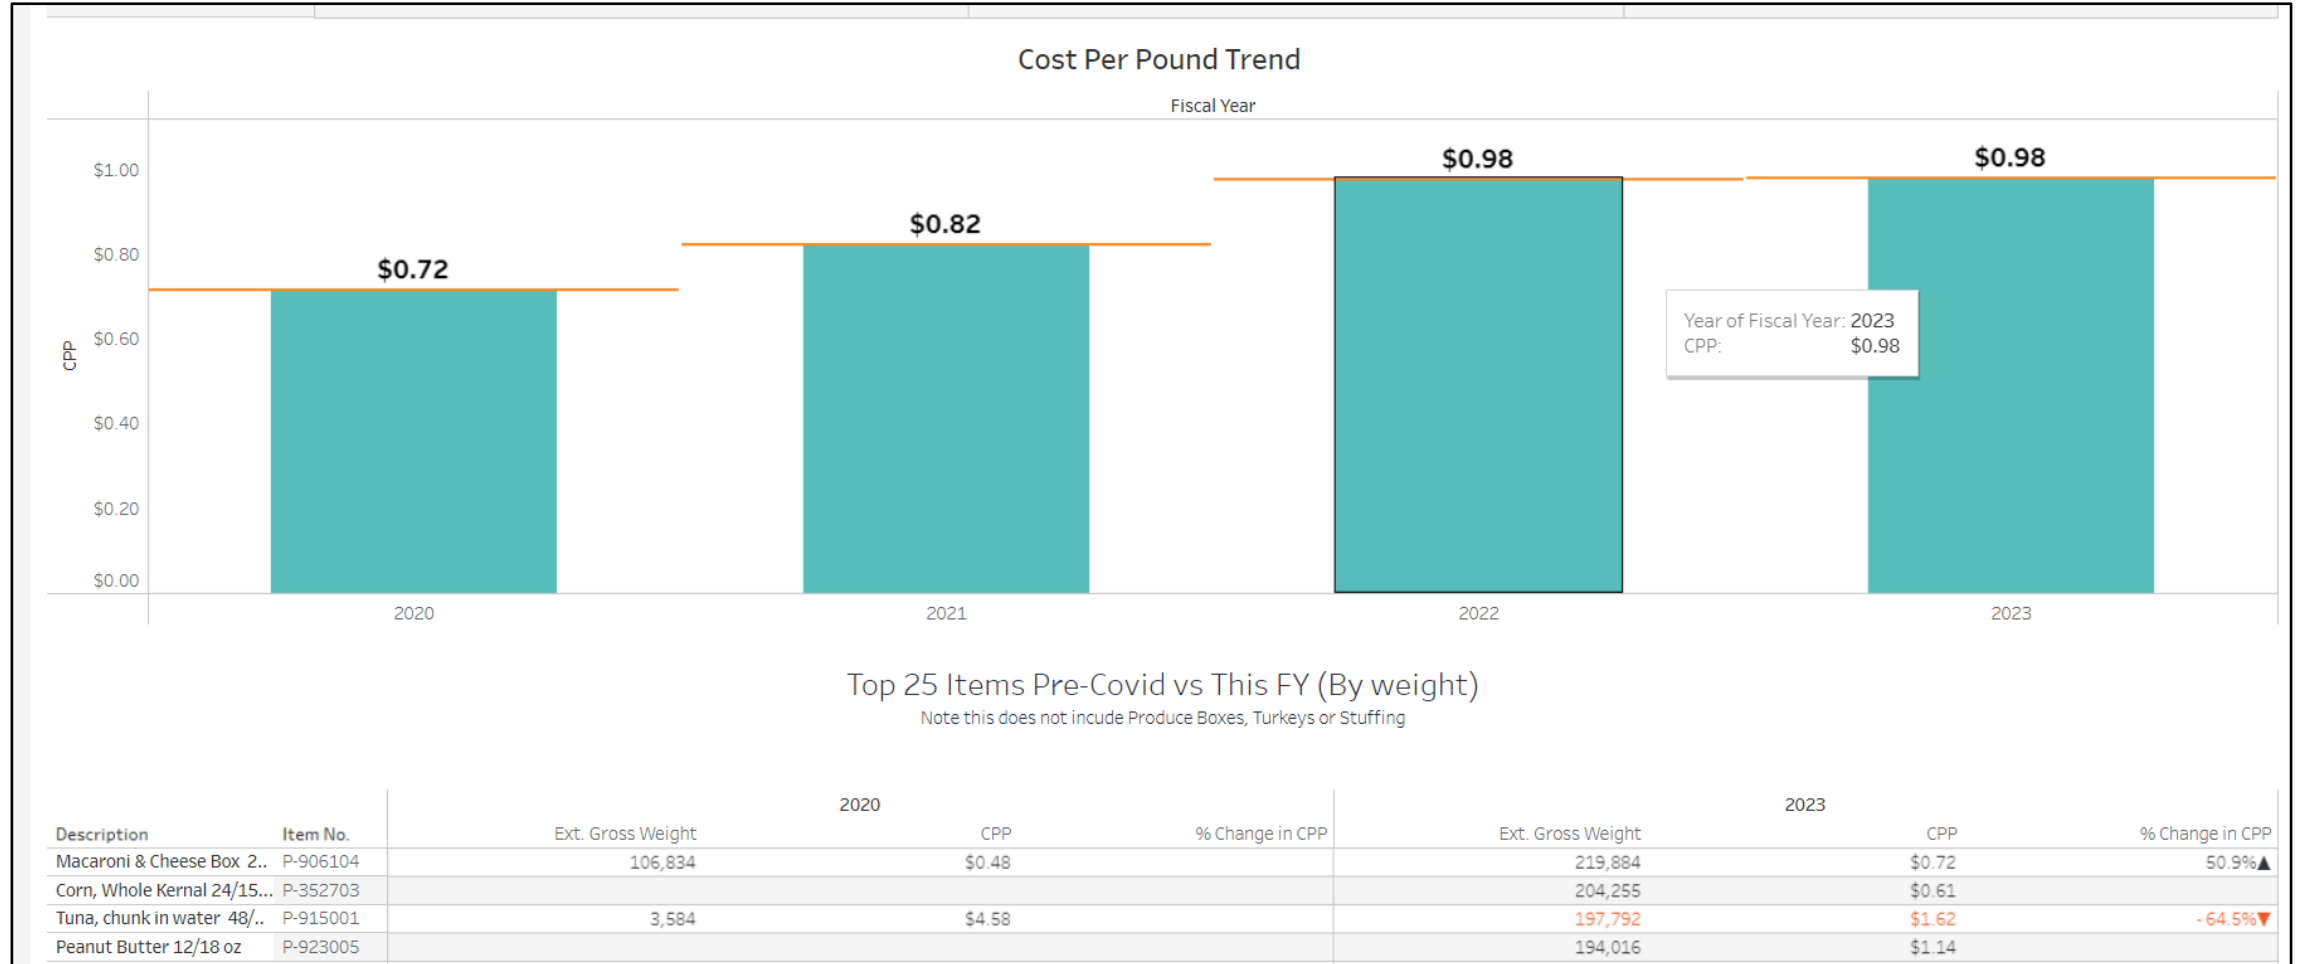

Data Analytics/Visualization:

- Compare Pricing: Pre-Covid to Current for Top 25 Items.
- Quarterly Increments, 2019-2024 for Top 25 items.

Data Visualization

- Develop Tableau dashboard for trend analysis.

Food Supply: Cost of Goods (Per Pound)

Food Supply: Cost of Goods (Per Pound)

Cost Per Pound Trend (Last 3 Months Rolling)

Overall Trend: Quarter over quarter has gone up by 8%

Trend for Select Product Types

- **Peanut butter up by 24.5%**

We are no longer getting Feeding America subsidy on this, we were previously getting a discount on this item. This also is an item that had supply chain issues late last year

- **Tuna up by 49%**

Previously getting a discount on this item as above. We are now going with the preferred tuna that is better quality and nutrition, hence price hike.

Example
#4

June 2023 Report (Highlights)

Food Supply: Cost of Goods (Per Pound)

FBC Product Type - Description	Item No.	Description	2023						2023
