## Activity Centers 2012 Update

Activity Centers are the locations that will accommodate the majority of the region's future growth. They include existing urban centers, priority growth areas, traditional towns, and transit hubs. Together, Activity Centers will play a central role in achieving *Region Forward*'s prosperity, sustainability, accessibility, and livability goals.

- Hybrid Policy/Technical Approach
- Grounded in Local Planning
- Reinforces Region Forward
- Aligned with Existing and Planned Transportation System
- Consistent with Environmental Goals

- Existing Urban Centers
- Priority Development Areas
- Traditional Town Centers
- Employment Centers

- Analysis
- Planning
- Investment

## Key Outcomes of the 2012 Update

#### More, Smaller Centers

- Current: 59; New: 136
- · Most centers located within current center boundaries
- Better scale for implementation

#### Aligned with Major Infrastructure

- Include several additional Metro and rail stations as centers
- 70% of new centers served by transit by 2040
- Aligned with major highway network

#### **Links Local and Regional Priorities**

- Selection criteria includes Region Forward priorities
- Provides tool for local governments to support regional goals
- Supports local and regional environmental goals

## Core Attributes

Any 2 Additional Attributes

# Concept

#### Background

Activity Centers originally emerged from the Transportation Planning Board's (TPB) vision for the region, adopted in 1998. Among other things, the vision and its related goals and objectives called for better interjurisdictional coordination of transportation and land use planning through the development of a regional map that identified Activity Centers and major transportation corridors.

The first Activity Centers map was approved in 2002, and a second version of the map was adopted in 2007. The 59 Activity Centers on that map were identified based on job concentrations in COG's Cooperative Forecasts and reflected major employment centers in the region. For the past ten years, COG and the TPB have used Activity Centers for technical purposes, including growth forecasts and scenario analysis for transportation planning.

#### **A New Selection Approach**

For the 2012 update, COG developed a new approach to identify Activity Centers. As the spatial component of *Region Forward*, Activity Centers will be used as both a technical *and* policy tool. Aligning Activity Centers with *Region Forward* will help ensure that the dramatic growth anticipated through 2050 will enhance the region's prosperity and sustainability. Consequently, the selection criteria for the 2012 update are a hybrid of policy-oriented measures and technical guidelines.

The criteria also provide flexibility in how places can qualify as Activity Centers, and are designed to be consistent with local planning priorities. As a result, the new Activity Centers are diverse, including existing urban centers, priority growth areas, historic towns, and transit hubs in jurisdictions throughout the region.

To qualify as an Activity Center, some of the needed attributes must be present today, while others must be accomplished by 2040. A location must meet both of the two core attributes and at least two additional attributes by the noted year (either 2012 or 2040).

### Core Attributes (required)

**Policy:** In 2012, the center or priority growth area should be designated in a jurisdiction's adopted comprehensive/ general plan or other locally-adopted land use plan.

### Additional Attributes (any 2 required)

**Intersection Density:** In 2012, have at least 55 intersections per square mile.

**Transit Capacity:** In 2012, have existing high-capacity/ performance transit (e.g. Metrorail, commuter rail, light rail, or bus rapid transit), have a planned transit station identified in the CLRP, or have a planned transit station with a dedicated local funding source. *(Region Forward Target)* 

**Land Use Mix:** In 2012, have a locally-adopted land use plan/ordinance that encourages mixed-use development through such features as a mixed-use designation, formbased codes, or overlay zoning.

**Housing & Transportation Affordability**: In 2012, demonstrate combined housing and transportation costs of no more than 45% of regional median income, as measured by the H + T Index. (*Region Forward Target*)

## Places

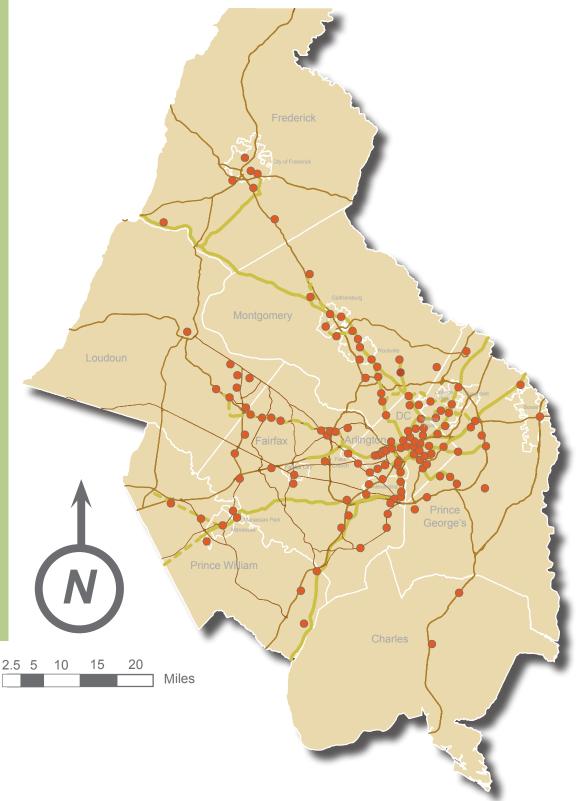

Activity Centers are the locations that will accommodate the majority of our region's growth in the coming decades. As such, they play a central role in fulfilling the vision of *Region Forward*. They include existing urban centers, priority growth areas, traditional downtowns, and transit hubs. Centers include established communities like Georgetown, as well as newly emerging places like Wheaton. A majority of these Activity Centers are mixed-use communities. Others are primarily employment centers or are dominated by major civic or federal facilities.

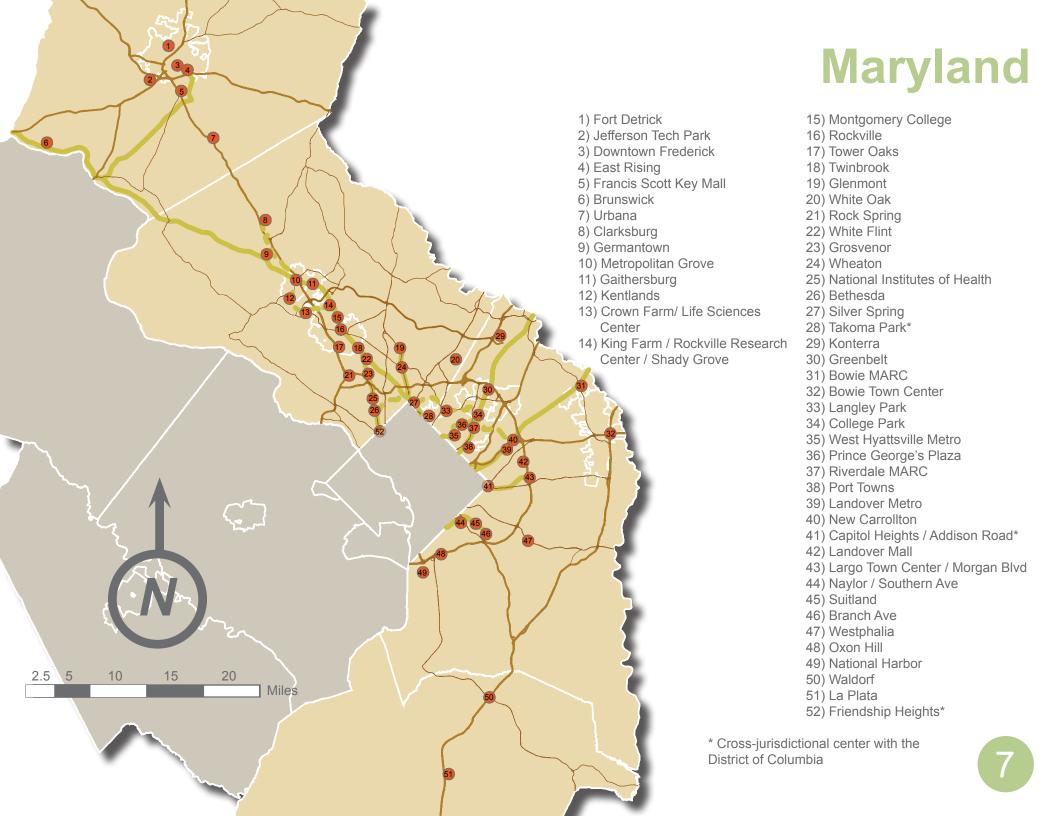

Activity Centers provide a way for all jurisdictions to contribute to our shared regional goals.

#### **Key Facts**

- There are 136 Activity Centers
- Centers are located in every COG member jurisdiction
- 70% of centers will be served by high-capacity transit by 2040
- 60% fall within old Activity Center boundaries

# **Applications**

Activity Centers have been designed to be used by diverse stakeholders for a variety of purposes, including technical analysis, planning policy, and investment activities. Activity Centers provide a way to coordinate programs and resources at the local and regional levels. They can facilitate new initiatives and partnerships across sectors and boundaries to achieve regional goals and fulfill the *Region Forward* vision.

### **Stakeholders**

**Regional:** Metropolitan Washington has several organizations such as COG, The Board of Trade, WMATA, and other transit operators that can use Activity Centers for regional programs and activities.

**Government:** Local, state, and federal governments can use Activity Centers to guide their decisionmaking in numerous policy areas.

Business, Civic, & Philanthropic: Leaders in these fields can use Activity Centers to guide key investment decisions.

## Analysis

## Planning

### Investment

- Growth Forecasts
- Transportation Modeling
- Demographic Analysis

- Transit Corridor and Station Area Planning
- Transportation Priorities and Scenario Planning
- Wastewater Planning
- Transportation Land Use Grants

- Activity Center Strategic
  Investment Plan
- Financially Constrained Long Range Transportation Plan

- Comprehensive, Sector, and Master Plans
- Affordable Housing Planning
- Facility Location Planning

- Competitive Grant Programs
- Capital Improvement Plans

• Facility Location Selection

- GreenPATH (affordable housing fund)
- Site Selection
- Place-Based Services

# Schedule

### July:

- Planning Directors Technical Advisory Committee approved illustrative Activity Center Map
- Activity Centers introduced to COG Board at annual retreat
- Seek Region Forward Coalition approval of centers for public comment

### July – August:

Develop technical boundaries for Activity Centers

#### August – September:

- Outreach to city councils and county boards
- Launch Strategic Investment Plan work

#### **November:**

• COG Board and TPB approval of Activity Centers
