

**Regional Action Plan – Updates to State Measures**

**Maryland**

POINT SOURCE

Power Plant Controls Updates:

Phase I - Existing

Phase II - In Development

Phase II of MD's NOx regulations is designed to achieve further NOx emission reductions beyond 2015. Phase II requires the owner or operator of units that have not installed SCR technology to choose from four options. Install SCR, permanently retire the unit, switch to NG, or meet stringent systemwide 24-hour and 30-day limits.
