Fleets for the Future Workshop:
An Aggregate Procurement Opportunity
for Fleets in the Mid-Atlantic Region

at the

2017 Washington Auto Show

Walter E. Washington Convention Center

801 Mt. Vernon Place, NW

Washington, DC 20001

Room 206

10:00 -11:30 am

Are you a public fleet looking to save money, purchase clean fueled vehicles, and install infrastructure at a deep discount?

Are you a dealership and interested in learning more about clean, advanced vehicle technologies and cooperative contracts with public agencies?

Then this session is for YOU!

Come learn about a cooperative solicitation underway that will buy down the cost of clean, alternative fuel vehicles (electric, compressed natural gas (CNG), propane, and ethanol) and infrastructure for fleets across the mid-Atlantic region.

The session will discuss best applications for plug-in electric vehicle technology and gaseous fuels, including CNG and propane. It will also cover evaluation options and planning procurement initiatives, best practices for solicitation development, technical considerations for deployment, and fleet transition planning. Eligible vehicles include heavy- and light-duty vehicles. Eligible fleets include of federal, state, and local governments, school districts and universities, and public utilities.

Following the session, technical experts will be available for one-on-one dialogue to explore and investigate specific options for individual fleets.
