

DRAFT 2019 HIGHWAY SAFETY TARGETS FOR THE NCR

Performance Based Planning & Programming

Jon Schermann
TPB Transportation Planner

Technical Committee
January 4, 2019

Purpose

- Provide background about updating highway safety targets
- Share proposed updates to the highway safety targets adopted last year
- Highlight trends revealed by latest safety data
- Review qualifying language for TPB resolution to adopt updated highway safety targets

Background (or Why, What, and How)

- Federal requirement for MPOs to update highway safety targets on an annual basis
- TPB adopted first set of safety targets on Jan 17, 2018. An updated set of targets needs to be adopted by Feb 27, 2019
- Highway safety targets to be set for 5 performance measures
- Targets shall be data-driven and realistic
- Targets are averages for a given 5-year period (ex., 2014-2018, 2015-2019, etc.)

Adopted 2014-2018 Highway Safety Targets*

Performance Measure	Targeted Average 2014-2018
Number of Fatalities (5 year rolling average)	253.0
Rate of Fatalities per 100 million VMT (5 year rolling average)	0.588
Number of Serious Injuries (5 year rolling average)	3,007.3
Rate of Serious Injuries per 100 million VMT (5 year rolling average)	6.791
Number of Non-Motorized Fatalities and Serious Injuries (5 year rolling average)	528.8

Note: These targets were set before 2017 and 2018 data were available.

* TPB Resolution R10-2018 (Jan 17, 2018)

Comparison of 2014-2017 Data with 2014-2018 Targets

Performance Measure (5-year rolling average)	2014-2017 Actual*	2014-2018 Target
# of Fatalities	278.5	253.0
Fatality Rate (per 100 MVMT)	0.640	0.588
# of Serious Injuries	2,769.0	3,007.3
Serious Injury Rate (per 100 MVMT)	6.332	6.791
# Nonmotorist Fatalities & Serious Injuries	549.0	528.8

* Four year average data

Observations

- With 2017 data now in, it is challenging to meet the adopted 2014-2018 fatality and fatality rate targets
- Preliminary data show that 2018 was not good for fatalities
- However, serious injuries and serious injury rates look better
- Nonmotorist numbers decreased in 2017 - still possible to meet the target
- No regulatory consequences for MPOs that do not meet the targets, unlike state DOTs
- TPB staff are commissioning a study to better understand what's driving our numbers and how we can move them downward

Draft 2019 Highway Safety Targets for the NCR

Performance Measure	Proposed 2015-2019 Target	Adopted 2014-2018 Target	Compared to Previously Adopted Target
# of Fatalities	253.0	253.0	no change
Fatality Rate (per 100 MVMT)	0.588	0.588	no change
# of Serious Injuries	2,919.6	3,007.3	88 fewer serious injuries
Serious Injury Rate (per 100 MVMT)	6.564	6.791	3% lower
# Nonmotorist Fatalities & Serious Injuries	508.6	528.8	20 fewer

Note: These targets were set before 2017 and 2018 data were available.

* TPB Resolution R10-2018 (Jan 17, 2018)

Draft Resolution Clauses (1)

- WHEREAS, safety of all modes of travel is an important element of TPB's Vision, and a regional priority, with many its member jurisdictions having adopted aspirational safety goals associated with Vision Zero and Towards Zero Deaths; and
- WHEREAS, the TPB encourages every member jurisdiction in the region to adopt similar aspirational goals and calls on the transportation agencies of the region to redouble their efforts to develop projects, programs and policies to achieve dramatic reductions in fatalities and serious injuries; and

Draft Resolution Clauses (2)

- WHEREAS, the TPB acknowledges that recent trends for both fatalities and the rate of fatalities per 100 million vehicle miles travelled are moving in the wrong direction, which does not match regional aspirations; and
- WHEREAS, the TPB remains focused on achieving its aspirational goals and will use the annual regional highway safety targets and the target setting process to evaluate the region's progress toward achieving its aspirational goals

Next Steps

- Present and request board approval of highway safety targets at the January 2019 TPB meeting
