

Status of Emissions Inventory – 2011 & 2017

Following table provides the emissions inventories that are currently available and the ones that need to be developed for the base year 2011 and 15% Reasonable Further Progress (RFP) milestone year 2017 as part of the requirements for the 2008 ozone standard (75 ppb).

| Base Year | Point | | Area | | Nonroad | | Onroad | |
|-----------|--|--------------------------|--|--------------------------|---|--|---|---------------------------------------|
| | Annual | OSD | Annual | OSD | Annual | OSD | Annual | OSD |
| 2011 | Available (NEI) | To be developed (States) | Available (NEI) | To be developed (States) | Mar & NMIM - Available (NEI) | MAR – To be developed (States) NMIM – To be developed (COG) | Available (NEI), but needs to be re-developed with TPB inputs (COG) | To be developed with TPB inputs (COG) |
| 2017 | OSD | | OSD | | OSD | | OSD | |
| | Annual – Available (PM2.5 RR/MP) OSD - To be developed (States) | | Project 2017 emissions from 2011 using COG Cooperative forecasts (COG) | | MAR – Project 2017 emissions from using COG Cooperative forecasts (COG) NMIM – To be developed using 2011 met and 2017 fuel & other inputs (COG) | | To be developed with TPB inputs (COG) | |
