

## **Instruction on how to merge Appendix B part1 & part 2 after downloading them from this web-site**

Appendix B is a very large size zip file, which could not be uploaded as a single file due to restrictions placed on the file size on this web-site. Therefore, it is divided in two separate zip files - Appendix B2\_NMIM\_Input.Output\_2025\_Part 1.zip & Appendix B2\_NMIM\_Input.Output\_2025\_Part 2.zip.

While “Appendix B2\_NMIM\_Input.Output\_2025\_Part 1.zip” contains the majority of the NMIM database (NMIM20090910) files besides runspec and output files, “Appendix B2\_NMIM\_Input.Output\_2025\_Part 2.zip” contains the rest of the files belonging to the above NMIM database. In order to properly combine the two sets of the NMIM database files, please copy the files in the folder “NMIM20090910\_2” from the “Appendix B2\_NMIM\_Input.Output\_2025\_Part 2.zip” file to the folder named “NMIM20090910” in the “Appendix B2\_NMIM\_Input.Output\_2025\_Part 1.zip” file. Now you have all the files needed in the NMIM database to run the NMIM model.
