

# Make smarter energy choices with EnerNOC

Thousands of customers use EnerNOC because our energy expertise, technology, and market access are transforming the way the world uses energy.

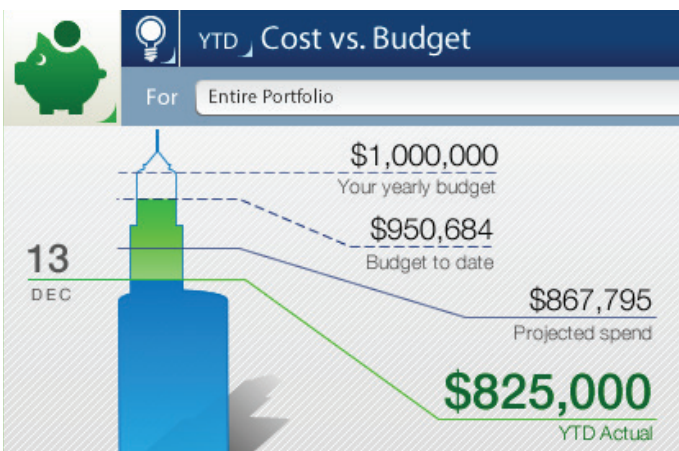

## Lower your overall energy costs by up to 30%

- Earn payments for reducing energy usage during periods of grid constraint
- Reduce peak demand charges with an alert on your phone or in your inbox before your energy usage hits a peak
- Lower base load and shave energy usage outside of operating hours using real-time energy data and analytics software

Put your real-time energy data in the palm of your hand.

“ As soon as you partner with EnerNOC, you realize that there are immense opportunities to drive significant savings by actively managing energy consumption. EnerNOC knows energy markets, understands the unique needs of our institution, and has the tools to help us identify all the different ways we could be earning or saving money through energy intelligence. ”

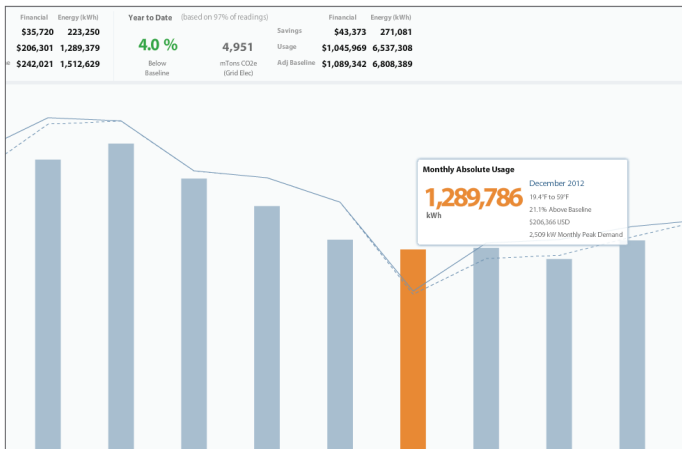

*Len Pettis, Chief of Plant, Energy, and Utilities, California State University*

Track key energy data in intuitive dashboards.

## Meet your energy reduction goals

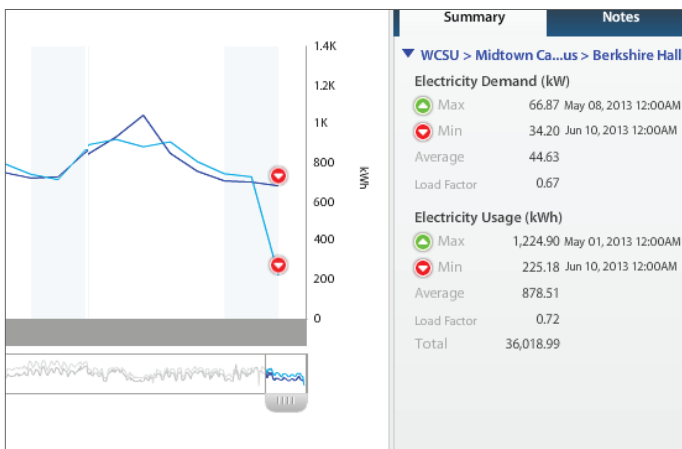

- Obtain advanced metering and access to your real-time energy data with no up-front costs
- Use reports and dashboards to show progress against goals
- Find no-cost and low-cost actionable energy efficiency measures with reports and alerts

Evaluate how key factors like weather and planned occupancy drive consumption.

## Improve your tracking and benchmarking

- Track gas, electricity, water, or any other commodity usage
- Benchmark your consumption against custom targets, historical performance, similar buildings or specific production levels
- Consolidate your data in a unified platform available from anywhere in the world

See your energy usage and spend in real time, before your bill arrives.

## Reduce your energy risk

- Monitor your utility bill and mitigate billing overcharges
- Use your load curve and power factor data to empower smarter buying decisions
- Get advanced notice of potential blackouts
- Support grid stability in your community

## The EnerNOC Difference

EnerNOC combines energy expertise, technology, and market access to maximize our customers' savings.

Energy Expertise	Technology	Market Access
<p>Hundreds of certified energy professionals</p> <p>14,000 sites under management</p> <p>\$600 million total energy savings</p> <p>Author of ISO 50001</p>	<p>\$160M technology investment</p> <p>90 full time R&amp;D employees</p> <p>Winner of Smart Grid Technology of the Year Award</p> <p>1.5 billion energy data points streaming through the Network Operations Center (NOC) monthly</p>	<p>Nearly 30 GW of peak demand under management (&gt;3.5% of total US peak)</p> <p>Largest demand response network in the world</p> <p>Over \$50M in annual demand response payments to customers</p>

All features included with DemandSMART and EfficiencySMART Insight Meter. Find out more today at [www.enernoc.com](http://www.enernoc.com).
