

Update on the Development of a Regional List of Unfunded Transportation Projects

Transportation Planning Board
Robert Griffiths, Director Plan Development & Data Programs
June 17, 2015

Background

- **September 2014:** TPB asked staff to develop a list of unfunded projects.
- **October 2014:** Citizens Advisory Committee passed resolution supporting the development of the list and calling for its use in regional planning and public involvement.
- **February-May 2015:** TPB staff solicited projects from members, which have been compiled and mapped.

Pulling Together the List

- More than 1,000 projects submitted
- Main project sources:
 - *moveDC*
 - Maryland county priority letters and other county projects
 - Maryland SHA *Highway Needs Inventory*
 - NVRTA's *TransAction 2040*
 - WMATA's *Momentum* and *Connect Greater Washington*

Challenges

- Regional balance
- Cost estimates
- Pedestrian and bicycle projects

The list should not be viewed as a final product but as a resource for regional discussion and analysis.

Future Direction

Possible Uses:

- Use the list to define overall unfunded needs.
- Conduct regional analysis using the list.
- Identify subsets of highlighted projects.
- Promote project implementation.

Next Steps

Steering Committee recommendation:

- Establish a working group, chaired by a TPB member, to develop a scope and approach for future work.
- At the TPB meeting on June 17, TPB staff will seek Board concurrence to set up a working group.
