Kanti Srikanth, TPB Staff Director
- Based on the results of a recent TPB member survey and on discussions at two TPB work sessions (held on April 20 and May 18), the TPB has expressed an interest in establishing on-road, transportation-sector greenhouse gas (GHG) reduction goals for 2030 and 2050, which would support the region's existing, non-sector-specific GHG reduction goals that had been adopted by both COG and TPB. The TPB has also identified seven GHG reduction strategies that are supported, according to the recent TPB member survey, by a majority or plurality of members. Mr. Srikanth will discuss some options for reaching TPB agreement on these two climate change mitigation topics.
