

Update on 1997 Annual PM2.5 NAAQS Maintenance Plan Updates
for Washington Region

Milestone years for the revised plan – 2007, 2017, and 2025

Pollutants for the revised plan – PM2.5-Pri, NOx, SO2, VOC, and NH3

A. Status of Emissions Inventories

a. Point (EGU & Non-EGU), Area, and Nonroad emissions

- i. Emissions Inventory Sub-Committee decided to update EGU and onroad mobile emissions in the PM2.5 Maintenance Plan
- ii. Virginia – Revised EGU emissions for 2017 and 2025
- iii. District & Maryland – No change in EGU emissions for 2017 and 2025

b. Mobile Emissions (MOVES2014)

- i. Annual draft PM2.5, NOx, SO2, VOC, and NH3 emissions (by SCC) being developed for 2007, 2017 and 2025
- ii. **TPB is expected to approve 2017 and 2025 PM2.5 and NOx emissions on October 21, 2015.**
- iii. 2007 onroad emissions for all five pollutants along with 2017 and 2025 emissions for VOC and NH3 will be presented to TPB-Tech on November 6/December 4, 2015 for review

B. Status of PM2.5 Maintenance Plan Update Document

A draft document is currently being developed and will be shared with MWAQC-TAC in November 2015 meeting.

C. Timelines for the PM2.5 Maintenance Plan Update (Subject to TPB approval of mobile emissions in October 2015)

- i. Draft revised plan document for MWAQC-TAC review: December 8, 2015/January 12, 2016
- ii. MWAQC approval for public comment and hearing: February 2016
- iii. Public comment and hearing: March-April 2016
- iv. Final MWAQC approval for EPA submittal: May, 2016
- v. States submit revised plan to EPA: June 2016
