

What if . . . the Washington region grew differently?

A public forum on alternative land-use and transportation scenarios

*Wednesday, December 8, 2004 — 7:30 to 9 pm
Activity Center at Bohrer Park, Summit Hill Farm
506 South Frederick Avenue, Gaithersburg, MD*

- What if** people lived closer to their jobs?
- What if** people lived and worked closer to transit?
- What if** new roads and transit were built?
- How would travel conditions change?**

On the evening of December 8, citizens will have a chance to learn how different patterns of growth might affect driving, congestion, transit use and quality of life in the Washington region.

The region's Transportation Planning Board (TPB) is interested in getting citizen feedback on a current study of land use and transportation scenarios for the future. Montgomery County Councilmember Michael Knapp, who is also vice chairman of the TPB, will moderate the session.

The meeting will be hosted by the National Capital Region Transportation Planning Board's Citizen Advisory Committee, chaired by Dennis Jaffe.

Everyone is welcome. No RSVP necessary. For more information, please contact TPB staff member John Swanson at 202-962-3295.

Ride-On Buses from Shady Grove Metro leave every 10-15 minutes. The bus trip is about 10 minutes. Take #55 ("Germantown/Dorsey Mills") or #59 ("Montgomery Village Mall").
