

Water Resources Technical Committee report

Meeting of Nov. 6, 2020

- WRTC Climate Resilience / Flooding Work Program
 - By request, the WRTC will launch a new focus on climate resilience and flood mitigation efforts in its 2021 work program
 - Need to focus on both **water quality** and **water quantity**
 - Speakers, workshops and other initiatives will focus on these topics
 - Work to be conducted in concert with Northern Virginia Regional Commission
- WRTC Stream Restoration Focus
 - Members will form a workgroup to exchange and enhance the best technical practices and the best means of public engagement
 - The workgroup will report to the WRTC and provide the CBPC and others with information on the role of stream restoration projects in overall stormwater management programs
- Reports from Frederick County on flooding mitigation efforts, DC Water on green infrastructure implementation
- Briefing materials on Conowingo WIP and the reliance of the Phase 3 WIPs on unprecedented levels of ag BMP implementation
