together with USEA and the Metropolitan Washington Council of Governments
presents

Energy from sewage

May 1st ; 2012

10:00 am to 11:30 am

at United States Energy Association
1300 Pennsylvania Avenue, Suite 550
Washington, DC 20004

2:30 pm to 4:30 pm

**at Metropolitan Washington Council of
Governments**

777 North Capitol St NE Ste 300
Washington, DC 20002

Did you know that sewage treatment plants are the largest energy users in most cities?

Come listen, learn and exchange ideas about ways to generate energy from sewage to

- increase our energy security;
- reduce the levels of damaging greenhouse gas emissions in the atmosphere;
- save cities real money.

Delegations from two German Cities, Bottrop and Lingen, will share their innovative approaches to saving money and becoming more energy efficient.

Speakers are:

- Bernd Tischler, Lord Mayor of Bottrop
- Ekkehard Pfeiffer, Head of River Basin Management, *Emscher River Collaborative*
- Arno Ester, Managing Director of Stadtwerke Lingen GmbH (Municipal Services)
- Klaus Herrmann, PhD, Professor emeritus, Purdue University , Scientific Consultant New Technologies (Hydrothermal Carbonisation), Lingen
