Regional ITS Architecture
Update To MOITS March 13, 2007

The Regional ITS working Group Last Met On 2/22/2007, Next Meeting 03/22/2007

- Regional ITS Architecture Use and Maintenance Workshop

  Workshop will help ITS professionals better understand how regional ITS architecture can be used in regional and statewide transportation planning and project development. This is not a training course, but rather an interactive workshop facilitated by the National ITS Architecture Team using interactive lectures, discussions, and group exercises.

- Short Term of the Regional ITS Architecture Update
  - Update Draft will be Done by End of the Month
  - Validation Process Will Begin Soon in Following Categories
    - Traffic , Transit, Emergency, Traveler Information, Archive Data
    - Validation Will Start from April to May

  - Final ITS Architecture Will be Available before FYI 2006
