

10 Possible Regional Actions to Better Protect Public Health in the Washington D.C. Region

Initiative	Reduction potential (small/medium/large)	Any current Action	How to implement
Updated power plant controls	Large NOx reductions	Yes, MD is adopting regulations.	A MD only issue.
Aftermarket Catalyst Program	Large NOx reductions	Yes. MD has initiated regulation development. OTC has adopted a model program.	Can be implemented through state regulations but it can also be implemented at the federal level.
Distributed Generation Data Collection	Potentially large NOx reduction on peak days	Yes. MD is initiating a regulation adoption process to simply collect data.	Could be done on a voluntary basis, regionally. Recent changes at PJM may help us with this.
Smartways Partnerships	Medium to Large NOx reductions	Yes. OTC has initiated an effort. MD is participating.	Voluntary effort.
OTC Architectural Coating and Industrial Maintenance (AIM) Coatings Model Program	Large VOC Reductions	Yes. MD is adopting regulations.	Credit in VA may be available without a regulation.
OTC Consumer Products Model Program	Large VOC reduction	Yes. MD is adopting regulations.	Credit in VA may be available without a regulation.
OTC Mobile Equipment Repair Model Program	Large VOC reduction	Yes. MD is adopting regulations	Credit in VA may be available without a regulation.
Onroad and Offroad Idling Reduction Efforts	Medium NOx reductions	Yes. DC is already implementing a program.	Regional effort with COG involved a possibility.
Onroad Emissions (ORE) Monitoring Expansion	Medium NOx and VOC reductions	Yes. Law and rule have been adopted in VA.	Through VA's I&M program.
Reduction from EE/RE Programs	Small NOx Reductions	Yes. MD is moving along with this.	Regional effort with COG involved would work very well.
