

## MEMORANDUM

**TO:** TPB Technical Committee  
**FROM:** Charlene Howard, TPB Data Analyst  
**SUBJECT:** PBPP Data Visualizations  
**DATE:** October 4, 2022

---

This memorandum provides a brief overview of the mapping application shared at the October 7, 2022 TPB Technical Committee (Item 7).

The application Performance-Based Planning and Programming: 2021 Bridge Condition (demonstration application) provides visualization of bridge conditions in the TPB Planning Region.

The dashboard reports bridge condition performance for structures on the National Highway System (NHS), a category of the federally required performance-based planning and programming (PBPP) rules for Highway Assets. The dashboard includes performance condition for the current reporting year (2021) as well as the previous two years (2019, 2020).

The application can be viewed at the following link:
