

# The Regional Transportation Safety Picture

Crashes, Deaths, & Injuries

Briefing to the Transportation Safety Subcommittee

Thursday, June 18, 2009

Item #4

# Safety Element of the Long-Range Transportation Plan

- A Federal requirement
- Common goals of the State Strategic Highway Safety Plans (SHSP)s of DC, Maryland, & Virginia goals are incorporated into the CLRP Safety Element
- A regional look at Transportation Safety
  - Transportation Planning Board Area
- Update Fall 2009

# Common Emphasis Areas from the SHSP's

- Deaths, Injuries, & Crashes
  - Impaired Driving & Aggressive Driving
  - Occupant Protection (seatbelts)
  - Driver Competence and Licensing
  - Young and Older Drivers
  - Pedestrians
  - Motorcycles
  - Large Trucks
  - Run off the Road
  - Intersections
  - Work Zone
- Information and Decision Support Systems (Traffic Records)

## Traffic Deaths Per 100,000 Population in the Washington Region, 2003-2007

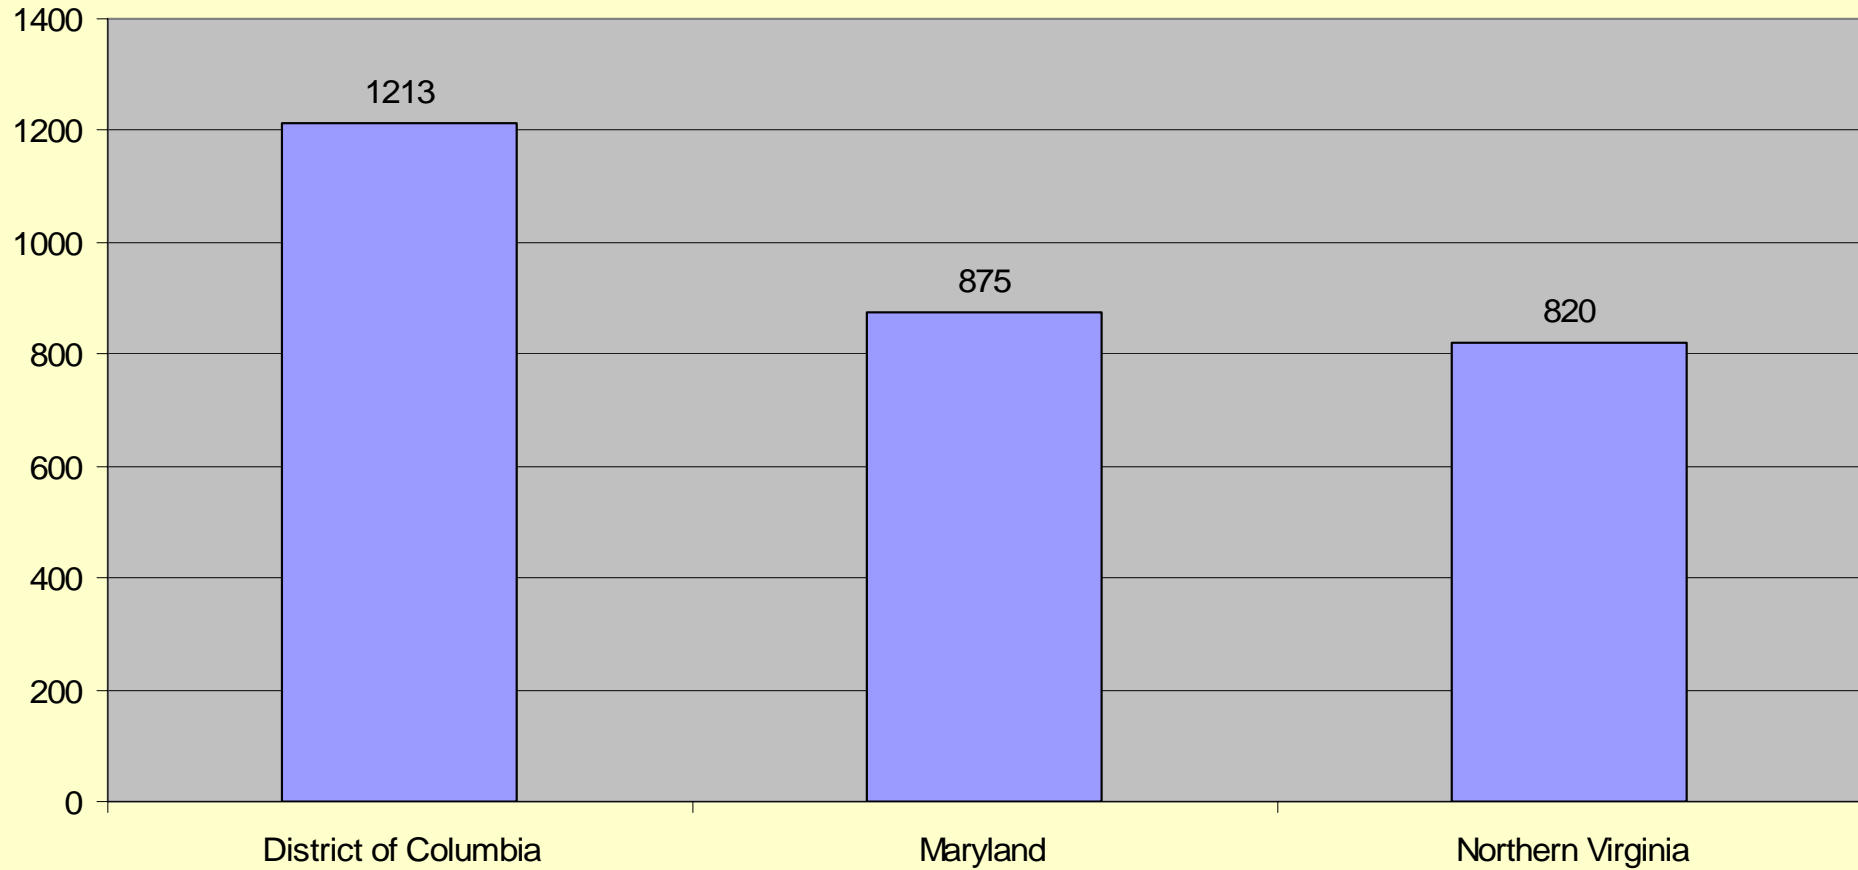

### Traffic Injuries per 100,000 Population in the Washington Region, 2003-2007

Average Annual Traffic Deaths Per 100,000 Population,  
2005-2007

Average Annual Traffic Injuries per 100,000 Population,  
2005-2007

# All Crashes and Crashes per 100,000 Population in the Washington Region 2003-2007

Average Annual Crashes per 100,000 Population  
2003-2007

6/18/2009

# 2007 Crash Types in the Washington Region

(Total Crashes = 82,054)

6/18/2009

# 2007 Crash Types as a Percent of Total Crashes in the Washington Region (Total = 82,024)

6/18/2009

# Conclusions

- Regional Fatalities/100,000 are declining slowly
- Injuries/100,000 are declining a little faster
- Significant differences in Fatality, Injury & Crash rates between the States
  - Maryland has the highest death rate
  - DC has the highest injury rate
- As measured by crashes, young drivers and signalized intersections stand out as traffic safety issues

# Sources

- DDOT – Traffic Safety Report Statistics (2005-2007), SHSP
- MHSO – County Spreadsheets, Issue Area Spreadsheets
- VDOT – Access database of Statewide crashes

# Caveat Emptor

- Missing data
  - DC publishes deaths, injuries, and crashes by mode and crash type
  - Maryland publishes fatal *crashes*, injury *crashes*, and crashes by mode and crash type
  - Apples and Oranges
- VDOT Access Database
  - Good: Custom Queries
  - Bad: Unfamiliar database, software = opportunities for error

# Next Steps

- Get at least deaths and injuries for all modes and crash types
  - In many cases fatalities and injuries tell a different story from crash rates
  - Motorcyclists, pedestrians
- Check Access Queries
  - More than one route to an answer
  - Data quality may vary
