### Permanent Housing Placements Have Constrained the Growth in Homelessness While Region's Population Has Soared

# Recommendations and Challenges to Reducing Homelessness

#### Recommendations:

- Continue implementing Housing First and Rapid Re-housing models that provide homeless residents with needed wraparound services to assist them in their efforts to live as independently as possible.
- □ Provide more housing subsidies for low-income households;
- Implement shelter diversion programs and prevention strategies that identify households at risk of homelessness and prevents their need to be housed in local shelter programs.
- Increase and improve outreach efforts to unsheltered homeless people living in the woods and on the street.

## Recommendations and Challenges, continued

 The region should create affordable housing opportunities across income levels.

#### **Challenges:**

- Federal budget uncertainty, cuts in grant funding and limited availability of Housing Choice Vouchers may limit progress on providing permanent housing;
- Increasing housing prices in the region further constrain affordable housing options.
