

Gen3 Model Development Project

Travel Forecasting Subcommittee Meeting
May 15, 2020

IN PARTNERSHIP WITH

Metropolitan Washington
Council of Governments

Task Order 1: FY20 Program Administration (through June 30, 2020)

1. Attend meetings and prepare summaries: In progress
 - Bi-weekly conference calls
 - TFS briefings
2. Prepare Project Management Plan: Completed February 11, 2020
3. Provide training to COG staff
 - 1.5 day activity-based model training held May 12-14, 2020
4. Respond to on-call requests: In progress

AB Model Training Agenda – Day 1

- Welcome, Opening & Introductions, agenda review
- What is an AB model?
- Logit Model Primer (logit math, Monte Carlo simulation, elasticities, calibration)
- Population Synthesis (Input data, algorithms, outputs)

AB Model Training Agenda – Day 2

- Long-term & Mobility Models (ActivitySim work and school location choice models, auto ownership model, optional models)
- Day-Pattern Models (ActivitySim Day-pattern model, tour generation models, joint tour participation, destination choice models, and time-of-day choice models)
- Tour and Trip Models (ActivitySim tour mode choice model, intermediate stop model, and trip mode choice model)

AB Model Training Agenda – Day 3

- Tour and Trip Models continued
- Implementation (ActivitySim implementation software, Python pandas)
- ActivitySim Enhancements
- Q&A, Discussion, and Wrap-up

Task Order 2 Deliverables

- Draft Model Assessment and Model Specification Report
 - Draft delivered May 4
- Presentation slides on the various design alternatives/model features
 - “Treatment of Space” webinar held April 2, 2020
 - “Pricing and Reliability” webinar held April 2, 2020
 - “Special Travel Markets” webinar held April 14, 2020
 - “Transit Path Finding and Transit Capacity Restraint” webinar held April 15, 2020

Model Assessment and Model Specification Report Review Schedule

- COG staff review through May 25
- RSG responses to COG comments May 27 through June 3
- TFS review June 4 through June 11
- COG review of TFS comments June 11-13
- RSG review and finalization June 15-19

Task Order 2 Draft Report

Metropolitan Washington Council of Governments

GEN3 MODEL DESIGN PLAN

Gen3 Model Development Project | May 4, 2020

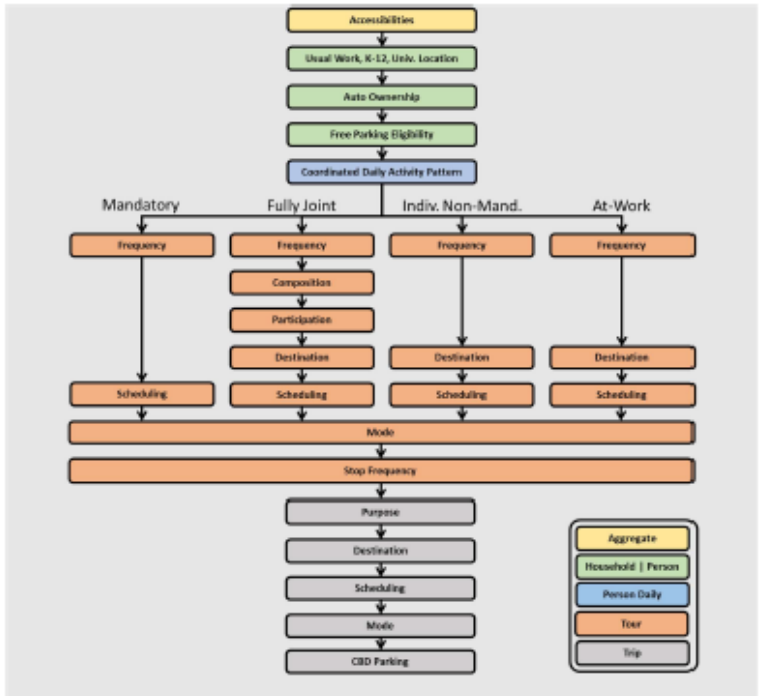

PREPARED FOR:
METROPOLITAN WASHINGTON COUNCIL OF GOVERNMENTS

SUBMITTED BY:
RSG
With

VERSION 1.0

FIGURE 3: EXISTING ACTIVYSIM MODEL DESIGN

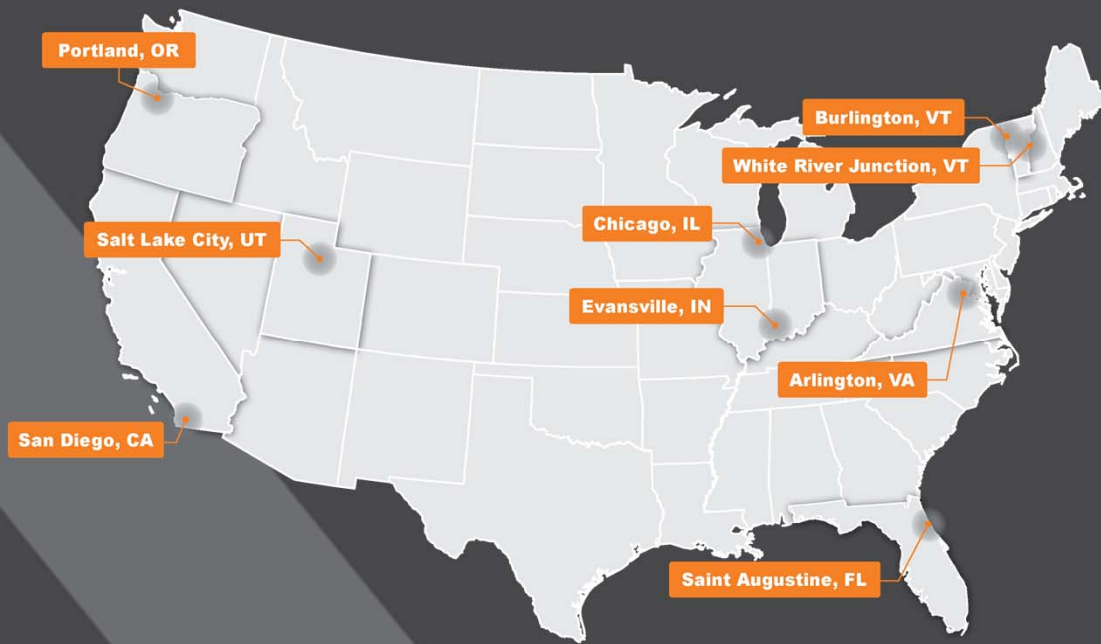

ActivitySim represent all internal travel made by residents of the MWCOG region. The decision-makers in the model system include both persons and households. These decision-makers are created (synthesized) for each simulation year and land-use scenario based on Census data and forecasted distributions of households and persons by key socio-economic categories. The decision-makers are used in the subsequent discrete-choice models in a microsimulation framework where a single alternative is selected from a list of available alternatives according to a probability distribution. The probability distribution is generated from a logit model which considers the attributes of the decision-maker and the attributes of the various alternatives. The application paradigm is referred to as Monte Carlo simulation, since a random number draw is

Task Order 2 Draft Report Chapters

- 1.0 Introduction
- 2.0 Overview Of Gen3 Product Requirements
- 3.0 Strengths And Weaknesses Of The Current Travel Model
- 4.0 Introduction To ActivitySim
- 5.0 Model Development Plan
- 6.0 Current And Future Data
- 7.0 Traffic And Transit Assignment
- 9.0 Software Approach
- 10.0 Quality Control And Quality Assurance (Qc/Qa)
